## Robeco Global Value Equities D EUR shares (LU0203975437)

This fund is a subfund of Robeco Capital Growth Funds, SICAV

Management Company: Robeco Luxembourg S.A.

### Objectives and investment policy

Robeco Global Value Equities invests worldwide in large value stocks; these are what are perceived to be temporarily undervalued stocks of healthy companies. Undervaluation is often caused by short-term factors, which means that value stocks provide good returns in the long run. Value stocks usually perform better than growth stocks in years when market performance is poor.

Active currency policy allows the fund to anticipate currency movements to enhance performance.

Benchmark: MSCI World Value IMI Index (Net Return) (EUR).

The fund focuses on capital preservation and aims to outperform by taking positions that deviate

from the benchmark. This share class of the fund does not distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorisation may shift over

time. The lowest category does not mean a risk-free investment.

Equities in general are more volatile than bonds. Equity funds with a global and or regional focus on developed markets are well diversified over

countries and sectors making them less sensitive to price movements within the equity fund range.

For a complete overview of all risks attached to this fund we refer to section Risk considerations within the prospectus.
