RobecoSAM Global SDG Equities D USD (LU2145460437)

This fund is a subfund of Robeco Capital Growth Funds, SICAV.

Management Company: Robeco Institutional Asset Management B.V.

Objectives and investment policy

The RobecoSAM Global SDG Equities Fund is an actively managed strategy that invests globally in companies that positively contribute to the achievements of the UN Sustainable Development Goals. Its objective is to achieve a better return than the index in the long-term by participating in opportunities but limiting volatility to avoid large drawdowns. Following a fundamental approach, the strategy invests in 40-70 attractively valued, high quality stocks which are broadly diversified over regions and SDGs. A proprietary research framework is applied to assess a company's impact on the SDGs by analysing its products & services, operational practices and involvement in controversies (more information on www.robeco.com/si).

The fund has sustainable investment as its objective within the meaning of Article 9 of the European Sustainable Finance Disclosure Regulation. The fund advances the UN Sustainable Development Goals (SDGs) by investing in companies whose business models and operational practices are aligned with targets defined by the 17 UN SDGs. The fund integrates ESG (i.e. Environmental, Social and corporate Governance) in the investment process, applies an exclusion list basis

controversial behavior, products (including controversial weapons, tobacco, palm oil and fossil fuel) while avoiding investment in thermal coal, weapons, military contracting and companies that severely violate labor conditions, next to voting and engaging.

The fund is allowed to pursue an active currency policy to generate extra returns and can engage in currency hedging transactions.

Benchmark: MSCI World Index TRN

The majority of stocks selected will be components of the Benchmark, but stocks outside the Benchmark may be selected too. The investment policy is not constrained by a benchmark but the fund may use a benchmark for comparison purposes. The fund can deviate substantially from the issuer, country and sector weightings of the Benchmark. There are no restrictions on the deviation from the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the sustainable objective of the fund.

This share class of the fund does not distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

Equities in general are more volatile than bonds. Equity funds with a global and or regional focus on developed markets are well diversified over countries and sectors making them less sensitive to price movements.

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- The product invests or may invest in China A-shares. Investing in China A-shares carries increased risk, most notably liquidity, regulatory, quota, custody and broker risks.
- The product invests or may invest in emerging markets. Shares listed in emerging markets are by their nature sufficiently liquid, yet may under certain circumstances have a low level of liquidity impacting the liquidity of the product.
