

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Robeco Emerging Conservative Equities C EUR (LU0792910217)

This fund is a subfund of Robeco Capital Growth Funds, SICAV

Management Company: Robeco Luxembourg S.A.

### Objectives and investment policy

Robeco Emerging Conservative Equities invests in low-volatile stocks in emerging markets across the world. The fund's long-term aim is to achieve returns comparable to those on emerging-markets stocks, but at a distinctly lower level of downside risk. The selection of these low-volatile stocks is carried out using a quantitative model, which ranks stocks in a variety of ways, including market sensitivity, volatility, distress risk, valuation and sentiment.

Currency risk will not be hedged. Exchange-rate fluctuations will therefore directly affect the fund's share price.

The fund is not constrained by a benchmark.

This share class of the fund will distribute

dividend. This Sub-fund may invest in China A-shares via the QFII and/or a Stock Connect Programme which may entail additional clearing and settlement, regulatory, operational and counterparty risks.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 7 years.

### Risk and reward profile

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

Equities in general are more volatile than bonds. Emerging Markets are one of the most volatility investments as its growth potential is very high but they are usually operating in less stable and developed political and economic environments. These facts make for large movements in the development of prices thus increased volatility.

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

1. The product invests in instruments which are by their nature sufficiently liquid, yet which may under certain circumstances have a low level of liquidity impacting the liquidity of the product.

For a complete overview of all risks attached to this fund we refer to section Risk considerations within the prospectus.

# Charges

The charges are used to pay the costs of running the fund, including the costs of marketing and distributing. The charges reduce the potential growth of the investment.
