### What is this product?

**Type:** This fund is a subfund of Robeco Capital Growth Funds, SICAV

**Objective:**

Robeco Sustainable Asian Stars Equities is an actively managed fund that invests in stocks of the most attractive companies in Asia. The selection of these stocks is based on fundamental analysis. The fund's objective is to achieve a better return than the index. The fund selects investments based on a combination of top-down country analysis and bottom-up stock ideas. The reference to "Stars" in the name of the fund refers to an approach whereby only the most attractive companies (in terms of actual and/or potential capital gains and/or generation of income and/or growth) are selected. The fund aims at selecting stocks with relatively low environmental footprints compared to stocks with high environmental footprints.

The fund aims for a better sustainability profile compared to the Benchmark by promoting certain E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation and integrating ESG and sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, proxy voting and aims for an improved environmental footprint.

**Benchmark:** MSCI AC Asia ex Japan Index (Net Return, EUR)

The majority of stocks selected through this approach will be components of the Benchmark, but stocks outside the Benchmark index may be selected too. The fund can deviate substantially from the weightings of the Benchmark. The fund aims to outperform the Benchmark over the long run, whilst still controlling relative risk in the underlying markets to the extent of deviation from the Benchmark. This will consequently limit the deviation of the performance relative to the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the ESG characteristics promoted by the fund.

The fund aims to outperform by taking positions that deviate from the benchmark.

**SFDR Article:** 8

**Currency Risk:** The fund is allowed to pursue an active currency policy to generate extra returns.

**Dividend policy:** Accumulating

**Product Term:**

This fund does not have a maturity date.

Early termination is not applicable for this fund.

### What are the risks & what could I get in return?

**The risk indicator assumes you keep the product for 7 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level.

**Be aware of currency risk.** If you receive payments in a currency different to that of your home jurisdiction, the final return you will get will depend on the exchange rate between the two currencies. This risk is not considered in the risk indicator shown. **You may lose some or all of your investment.** If we are not able to pay you what is owed, you could lose your entire investment. This product does not include any protection from future market performance so you could lose some or all of your investment.

#### Other relevant risks

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- The product invests in assets that could become less liquid in distressed (market) conditions, which could have a significant impact on the market price of those assets.
- The product invests or may invest in China A-shares. Investing in China A-shares carries increased risk, most notably liquidity, regulatory, quota, custody and broker risks.

## What are the risks & what could I get in return? (continued) Performance Scenarios

You may lose some or all of your investments.

## What happens if Robeco is unable to pay out?

The fund's assets are held separately from Robeco Institutional Asset Management B.V. (the "Manager"). A pay-out of the fund's assets is thus not affected by the financial position or potential default of the Manager. The financial instruments in the portfolio of the fund are placed in custody with J.P. Morgan SE, Luxembourg Branch (the "Depositary"). The fund runs the risk that its assets placed in custody may be lost as a result of the liquidation, insolvency, bankruptcy, negligence of, or fraudulent activities by, the Depositary. In that case the fund may suffer a financial loss. However this risk is mitigated to some extent as the Depositary is required by law to keep the fund's assets separate from its own assets. An investor compensation or guarantee scheme is not applicable in case of such financial loss.

## What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs have on your investment over time.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested. For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10.000 is invested.

	If you cash in after 1 year	If you cash in after 7 Year
<b>Total cost</b>	<b>€731.83</b>	<b>€2992.27</b>
<b>Annual Cost Impact (*)</b>	<b>7.32%</b>	<b>2.85%</b>

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.38% before costs and 5.53 % after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you.

These figures include the maximum distribution fee that the person selling you the product may charge (5.00 % of amount invested). This person will inform you of the actual distribution fee.

### Composition of Costs

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- The meaning of the different costs categories.

One-off costs upon entry or exit		If you cash in after 1 year
Entry Costs	5.00% Maximum of your investments that you pay to your distributor when entering this investment.	Up to 526 EUR
Exit Costs	0.00% of your investments that you pay when redeeming your investment.	0 EUR
Ongoing costs		
Management fees and other administrative or Operating Costs	1.75% of your investment that will be used for the payment of annual charges on your investment levied for managing the investment.	184 EUR
Transaction Costs	0.20% of your investment that will be used for the payment of estimated annual costs incurred when we buy and sell the underlying instruments for the product. The actual amount will vary depending on how much we buy and sell.	21 EUR
Incidental costs taken under specific conditions		
Performance fee	There is no performance fee for this product.	0 EUR

### How long should I hold it and can I take money out early?

We have determined the recommended holding period of this product to be 7 years.

The recommended holding period of this product is determined taking into consideration the nature of underlying investment securities and the volatility of thereof. The product can be traded daily and no minimum holding period applies. Exiting before the end of the recommended holding period does not bear any additional risks or costs other than those mentioned in the text above.
