What is this product?

Type

This is an open ended UCITS fund.

Term

There is no maturity date of the fund.

Investment objective

The fund aims to provide income and capital growth in excess of the ICE BofA 1-5 Year BBB Euro Corporate total return index over a three to five year period after fees have been deducted by investing in fixed and floating rate securities denominated in Euro issued by companies worldwide.

The fund is actively managed and invests at least two-thirds of its assets, long (directly or indirectly through derivatives) or short (through derivatives), in fixed and floating rate securities denominated in Euro issued by governments, government agencies, supra-nationals and companies worldwide.

The fund may invest up to 30% of its assets in bonds that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds); up to 20% of its assets in sovereign government bonds; up to 40% of its assets in asset-backed securities and mortgage-backed securities; and up to 20% of its assets in convertible bonds including up to 10% of its assets in contingent convertible bonds.

The fund may invest in asset-backed securities, commercial mortgage-backed securities, and/or residential mortgage-backed securities issued worldwide with an investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies). Underlying assets may include credit card receivables, personal loans, auto loans, small business loans, leases, commercial mortgages and residential mortgages.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus).

The fund may invest also in derivatives to create long and short exposure to the underlying assets of these derivatives. The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund's performance should be assessed against its target benchmark, being to exceed the ICE BofA 1-5 Year BBB Euro Corporate total return index. The fund's investment universe is expected to overlap materially with the components of the target benchmark.

The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Depositary: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SISF-Prospectus-LUEN.pdf>

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		3 years	
Example Investment:		EUR 10000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	EUR 6110	EUR 7200
	Average return each year	-38.9%	-10.4%
Unfavourable	What you might get back after costs	EUR 8520	EUR 8920
	Average return each year	-14.8%	-3.8%
Moderate	What you might get back after costs	EUR 9930	EUR 10550
	Average return each year	-0.7%	1.8%
Favourable	What you might get back after costs	EUR 11110	EUR 10990
	Average return each year	11.1%	3.2%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

The Unfavourable scenario occurred for an investment between 10 2019 to 10 2022

The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 06 2015 to 06 2018

The Favourable scenario occurred for an investment between 12 2018 to 12 2021

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	EUR 191	EUR 400
Annual cost impact (*)	1.9%	1.3% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 3,1 % before costs and 1,8 % after costs.

Composition of costs
