What is this product?

Type

This is an open ended UCITS fund.

Term

There is no maturity date of the fund.

Investment objective

The fund aims to provide capital growth and income in excess of the ICE BofA 3 Month US Treasury Bill Index +2.5% before fees have been deducted* over a three to five year period by investing in bonds. The fund will invest in bonds issued by governments, government agencies, supra-nationals and companies of emerging market countries, which help to advance the UN Social Development Goals (SDGs) and which the investment manager deems to be sustainable investments.

*For the target return after fees for each share class please visit the Schroder webpage:

<https://www.schroders.com/en/lu/private-investor/investing-with-us/historical-ongoing-charges/>

The fund is actively managed and invests its assets in (i) sustainable investments, which are investments that contribute towards the advancement of one or more of the UN SDGs by contributing positively towards social development and environmental themes and (ii) investments that the investment manager deems to be neutral under its sustainability criteria.

The fund will invest in bonds issued by governments, government agencies, supra-nationals and companies with the aim to foster financial inclusion and provide decisive funding to economically vulnerable communities globally as well as bonds related to sustainable infrastructure projects and clean energy initiatives. Such issuers may be involved in activities such as micro, small, and medium enterprise (MSME) lending, affordable housing, affordable education, health, agriculture, clean energy, improvements in energy efficiency, renewable energy, green energy products and humanitarian relief activities, among others.

The fund will help to advance one or more of the UN SDGs, including but not limited to: the end of poverty in all its forms; the provision of access to affordable, reliable, sustainable and modern energy; the provision of inclusive and sustainable economic growth, employment and decent work for all; the building of resilient infrastructure, promotion of sustainable infrastructure and fostering of innovation; and the reduction of inequality within and among countries.

The fund invests at least two-thirds of its assets in bonds denominated in various currencies and issued by governments, government agencies, supra-nationals and companies of emerging market countries.

The fund may invest up to 50% of its assets in securities that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds).

The fund may also invest up to one third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash. The investment strategy of the fund and the use of derivatives may lead to situations where it is considered appropriate that prudent levels of cash and money market investments will be maintained, which may be substantial or even represent (exceptionally) 100% of the fund's assets. This will be limited to a maximum of six months (otherwise the fund will be liquidated).

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

The fund does not directly invest in the sectors included in the below International Finance Corporation Exclusion List and BlueOrchard's Public Asset Exclusion List. https://www.ifc.org/wps/wcm/connect/topics_ext_content/ifc_external_corporate_site/sustainability-at-ifc/company-resources/ifcexclusionlist#2007

The fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the investment manager's rating criteria.

The investment manager may also engage with companies held by the fund to challenge identified areas of weakness on sustainability issues. More details on the investment manager's approach to sustainability are available in the prospectus and on the webpage <https://www.schroders.com/en/lu/private-investor/strategiccapabilities/sustainability/disclosures>.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund's performance should be assessed against its target benchmark being to exceed ICE BofA 3 Month US Treasury Bill Index +2.5% over a three to five year period and compared against the J.P. Morgan Corporate EMBI Broad Diversified Composite Index. The comparator benchmark is only included for performance comparison purposes and does not determine how the investment manager invests the fund's assets. The fund's investment universe is expected to overlap to a limited extent with the components of the comparator benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmark. The investment manager will invest in companies or sectors not included in the comparator benchmark.

The target benchmark has been selected because the target return of the fund is to deliver or exceed the return of that benchmark as stated in the investment objective. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Depositary: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

| Recommended holding period: | | 3 years | |
|-----------------------------|---|--------------------------|---------------------------|
| Example Investment: | | USD 10000 | |
| | | If you exit after 1 year | If you exit after 3 years |
| Scenarios | | | |
| Minimum | There is no minimum guaranteed return. You could lose some or all of your investment. | | |

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

We have classified this product as 2 out of 7, which is a low risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SISF-Prospectus-LUEN.pdf>

The Unfavourable scenario was simulated based on the appropriate benchmark used for an investment between 08 2021 to 04 2023

The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 07 2016 to 07 2019

The Favourable scenario was simulated based on the appropriate benchmark used for an investment between 08 2013 to 08 2016

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10 000,00 is invested

| | If you exit after 1 year | If you exit after 3 years |
|------------------------|--------------------------|---------------------------|
| Total costs | USD 472 | USD 903 |
| Annual cost impact (*) | 4.7% | 2.8% each year |

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4,7 % before costs and 1,9 % after costs.

Composition of costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|--|---|--------------------------|
| Entry costs | These costs are already included in the price you pay when entering this investment. This is the most you will be charged. The person selling you the product will inform you of the actual charge. [3.00%] | Up to USD 300 |
| Exit costs | We do not charge an exit fee for this product, but the person selling you the product may do so. | USD 0 |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | These costs are an estimate based on actual costs over the last year that we take each year for managing your investments. [1.62%] | USD 162 |
| Transaction costs | This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. [0.08%] | USD 8 |
| Incidental costs taken under specific conditions | | |
| Performance fees | There is no performance fee for this product. | USD 0 |

How long should I hold it and can I take money out early?
