# EURO Equity

a sub-fund of Schroder International Selection Fund SICAV

Class I Accumulation USD Hedged (LU1228196710)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

## Objectives and investment policy

### Objectives

The fund aims to provide capital growth in excess of the MSCI European Monetary Union (Net TR) Index after fees have been deducted over a three to five year period by investing in equities of companies in countries participating in the European Monetary Union.

### Investment policy

The fund is actively managed and invests at least 75% of its assets in equities of companies that are incorporated in the European Economic Area. The fund also invests at least two-thirds of its assets in equities of companies in countries whose currency is the Euro.

The fund may also invest up one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus).

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

### Benchmark

The fund's performance should be assessed against its target benchmark being to exceed the MSCI European Monetary Union (Net TR) index and compared against the Morningstar Eurozone Large Cap Equity Category. The fund's investment universe is expected to overlap materially with the components of the target benchmark. The comparator benchmark is only included for performance comparison purposes and does not have any bearing on how the investment manager invests the fund's assets. The investment manager invests on a discretionary basis and there are no restrictions on the

extent to which the fund's portfolio and performance may deviate from the target benchmark. The investment manager will invest in companies or sectors not included in the target benchmark in order to take advantage of specific investment opportunities. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. The performance of this share class is compared against the performance of the equivalent unhedged currency share class.

### Other Information

The fund maintains a higher overall sustainability score than MSCI European Monetary Union (Net TR) index, based on the investment manager's rating system. The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the fund's webpage

<https://www.schroders.com/en/lu/private-investor/gfc>.

### Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

### Distribution policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

## Risk and reward profile

### The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

### Risk factors

**Sustainability risk:** The fund has environmental and/or social characteristics. This means it may have limited exposure to some companies, industries or sectors and may forego certain investment opportunities, or dispose of certain holdings, that do not align with its sustainability criteria chosen by the investment manager. The fund may invest in companies that do not reflect the beliefs and values of any particular investor.

**Currency risk:** The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

**Currency risk / hedged share class:** The currency hedging of the share class may not be fully effective and residual currency exposure may remain. The cost associated with hedging may impact performance and potential gains may be more limited than for unhedged share classes.

**Derivatives risk:** Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

**Operational risk:** Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

**Performance risk:** Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

## Charges

### One-off charges taken before or after you invest

**Entry charge** None

**Exit charge** None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

**Ongoing charges** 0.06%

### Charges taken from the fund under certain specific conditions

#### Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2023 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

## Past performance

Performance achieved between 2015 and 2019 was achieved in circumstances that no longer apply. The fund's investment policy was changed on 19 February 2020.
