

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Emerging Europe

a sub-fund of Schroder International Selection Fund SICAV

Class A Accumulation NOK (LU0994294378)

This fund is managed by Schroder Investment Management (Europe) S.A., which is a member of the Schroders Group.

Objectives and investment policy

Objectives

The fund aims to provide capital growth by investing in equity and equity related securities of Central and Eastern European companies.

Investment policy

The fund is actively managed and invests at least two-thirds of its assets in equities of Central and Eastern European companies including the markets of the former Soviet Union and the Mediterranean emerging markets.

The fund may also invest in equities of North African and Middle Eastern companies. The fund typically holds 30-50 companies.

The fund may also invest up to one-third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash (subject to the restrictions provided in the prospectus).

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund maintains a higher overall sustainability score than the MSCI EFM Europe + CIS (E+C) Index (Net TR), based on the investment manager's rating criteria. More details on the investment process used to achieve this can be found in the fund characteristics section of the prospectus.

The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure" on the fund's webpage

<https://www.schroders.com/en-lu/lu/individual/fund-centre>

Special information

Due to the unprecedented geo-political situation caused by Russia's invasion of the Ukraine and the resultant impact of sanctions and actions of governments and market counterparties on certain Russian issuers and assets, the calculation of the net asset value (NAV) and the issue and redemption of all share classes in the fund was suspended with effect from 25

February 2022 to 18 July 2022. Russian equities and equity related securities held by the fund as of 25 February 2022 were allocated on 18 July 2022 to two newly created share classes within the fund. Following that allocation, the fund (through its share classes other than the two newly created classes) has no more exposure to Russian equities and equity related securities and will not make any further investments in Russian securities until further notice. This is consistent with the fund's target benchmark from which all Russian equities have been removed.

Benchmark

The fund does not have a target benchmark. The fund's performance should be compared against its comparator benchmark, being the MSCI EFM Europe + CIS (E+C) Index Net (TR) index. The fund's investment universe is expected to overlap materially, directly or indirectly, with the components of the comparator benchmark. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the comparator benchmark. The investment manager will invest in companies or sectors not included in the comparator benchmark in order to take advantage of specific investment opportunities.

The comparator benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

Dealing frequency

You may redeem your investment upon demand. This fund deals daily.

Distribution policy

This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Risk and reward profile

Lower risk

Potentially lower reward

Higher risk

Potentially higher reward

The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

The category also reflects that this share class is in a different currency than the fund currency.

Risk factors

Concentration risk: The fund may be concentrated in a limited number of geographical regions, industry sectors, markets and/or individual positions. This may result in large changes in the value of the fund, both up or down.

Currency risk: The fund may lose value as a result of movements in foreign exchange rates, otherwise known as currency rates.

Derivatives risk: Derivatives, which are financial instruments deriving their value from an underlying asset, may be used to manage the portfolio efficiently. The fund may also materially invest in derivatives including using short selling and leverage techniques with the aim of making a return. A derivative may not perform as expected, may create losses greater than the cost of the derivative and may result in losses to the fund.

Emerging Markets & Frontier risk: Emerging markets, and especially frontier markets, generally carry greater political, legal, counterparty, operational and liquidity risk than developed markets.

Capital risk / distribution policy : As the fund intends to pay dividends regardless of its performance, a dividend may represent a return of part of the amount you invested.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Operational risk: Operational processes, including those related to the safekeeping of assets, may fail. This may result in losses to the fund.

Performance risk: Investment objectives express an intended result but there is no guarantee that such a result will be achieved. Depending on market conditions and the macro economic environment, investment objectives may become more difficult to achieve.

Charges

One-off charges taken before or after you invest

Entry charge 5.00%

Exit charge None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges 1.97%

Charges taken from the fund under certain specific conditions

Performance fee

None

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures and in some cases you might pay less. You can find out the actual entry and exit charges from your financial advisor.

The ongoing charges figure is based on the last year's expenses for the year ending December 2023 and may vary from year to year.

You can find more information about the charges in Section 3 of the fund's prospectus.

Past performance

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in Norwegian Krone after the ongoing charges and the portfolio transaction costs have been paid. Entry charges are excluded from calculations of past performance.

The fund was launched on 28/01/2000.

The shareclass was launched on 04/12/2013.

Performance figures are only available since the launch of the respective share class.

Please note that the fund's benchmarks were changed on 21 September 2023.

The past performance in the above table is based on the fund's target benchmark (target benchmark: MSCI Emerging Markets Europe 10/40 (Net TR) Index) in place prior to this date. Going forward, this table will show past performance based on the comparator benchmark (comparator benchmark: MSCI EFM Europe + CIS (E+C) Index Net (TR) Index).
