SGKB (CH) Fund - Multi Defendo (CHF)

a sub-fund of SGKB (CH) Fund

(ISIN: CH0104955247, share class: A - CHF)

Fund management company: Swiss & Global Asset Management Ltd., a company of GAM Holding Ltd.

Objectives and investment policy

- The aim of the collective investment scheme ("Fund") is to achieve long-term capital appreciation of the assets. For this purpose, the Fund invests in other collective investment schemes which invest in diverse asset classes (such as shares, debt securities, real estate)
- The Fund invests indirectly, as a fund of funds, by means of other collective investment schemes in stable/theme-based debt securities or to a limited extent in selected shares, real estate and commodities

The Fund also has the following characteristics of importance to investors:

- Investors may buy or sell the Fund on any banking day in Zurich
- The Fund has only one share class
- Income in the share class is distributed annually to investors
- Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within three years

Risk and reward profile

The above indicator shows the risk and reward characteristics of the Fund based on its historical performance over the last 5 years. Where a 5-year performance history is not available, the history has been simulated on the basis of an appropriate benchmark index

- The Fund is assigned to the above category based on its historical fluctuations in value
- The indicator helps investors to have a better understanding of the potential gains and losses related with the Fund. In this context, even the lowest category does not represent a risk-free investment
- The past performance of the Fund provides no indication of its current or future performance
- This allocation to a risk category may change over time because the future performance of the Fund may fluctuate differently than in the past
- The Fund does not offer the investor a guaranteed return nor does it guarantee the fixed repayment of the money invested in the Fund by the investor

The indicator takes account of the risks entailed in the Fund's net asset value. These mainly involve fluctuations in the value of the investments. In addition to the risks expressed through the indicator, the Fund's net asset value may also be significantly affected by the following factors:

- The Fund invests in assets which are generally easy to trade and may therefore be sold at their market value under normal circumstances. However, it cannot be ruled out that in certain extreme situations (e.g. market turbulences) the tradeability of the assets in the Fund may be limited. In such situations, the assets in the Fund may only be sold at a loss, which will reduce the value of the Fund
