## Notes to the Financial Statements

for the period ended 30 June 2023 (*continued*)

### 2. Summary of Significant Accounting Policies

#### a) Presentation of Financial Statements

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to undertakings for collective investment under the going concern basis of accounting except for the Sub-funds listed in Note 13, these Sub-funds liquidated during the period ended 30 June 2023. As such, the financial statements for these Sub-funds have been prepared on a non-going concern basis.

The application of the non-going concern basis of accounting has not lead to material adjustments to the Sub-fund's published Net Asset Value.

#### b) Calculation of the Net Asset Value

The Net Asset Value of a Sub-fund and the Net Asset Value of the Share classes issued within that Sub-fund are determined in the relevant currency on every Dealing Day. The total Net Asset Value of a Sub-fund represents the market value of its assets less its liabilities. The Net Asset Value per Share in a Share class issued in a Sub-fund is determined by dividing the total Net Asset Value of all Shares in that class within the relevant Sub-fund by all outstanding Shares in the same class in the relevant Sub-fund. The Net Asset Values of the Sub-funds are calculated in accordance with the valuation regulations and guidelines set forth in the Articles and issued by the Board of Directors.

These Financial Statements are presented on the basis of the Net Asset Value ("NAV") calculated on 30 June 2023, the last business day of the period.

#### c) Investment Valuation

The valuation of securities held by a Sub-fund and listed on a stock exchange or on another regulated market is based on the latest available price on the principal market on which the securities are traded, using a procedure for determining prices accepted by the Board of Directors.

Unless otherwise provided for in the management regulations of the Company, the valuation of the assets of the Company shall be based, in the case of securities admitted to official listing on a stock exchange, on the last known stock exchange quotation, unless such quotation is not representative. For securities not so admitted on such a stock exchange and for securities which are so admitted on such a stock exchange but for which the latest quotation is not representative, the valuation shall be based on the probable realisation value, estimated with care and in good faith.

#### d) Foreign Exchange Transactions

Combined Statements are presented in Euro. Financial statements of each Sub-fund that is not EUR denominated have been converted into EUR at the following exchange rates:

##### Statement of Net Assets

Australian Dollar (AUD)	1.50229	= Euro (EUR) 1.00
British Pound (GBP)	0.78657	= Euro (EUR) 1.00
Canadian Dollar (CAD)	1.32325	= Euro (EUR) 1.00
Japanese Yen (JPY)	144.53500	= Euro (EUR) 1.00
Swiss Franc (CHF)	0.89465	= Euro (EUR) 1.00
US Dollar (USD)	1.09100	= Euro (EUR) 1.00

## Notes to the Financial Statements

### 2. Summary of Significant Accounting Policies (*continued*)

#### d) Foreign Exchange Transactions (*continued*)

Statement of Operations and Statement of Changes in Net Assets

Australian Dollar (AUD)	1.59880	= Euro (EUR) 1.00
British Pound (GBP)	0.87577	= Euro (EUR) 1.00
Canadian Dollar (CAD)	1.45570	= Euro (EUR) 1.00
Japanese Yen (JPY)	145.70554	= Euro (EUR) 1.00
Swiss Franc (CHF)	0.98496	= Euro (EUR) 1.00
US Dollar (USD)	1.08076	= Euro (EUR) 1.00

Transactions expressed in currencies other than each Sub-fund's currency are translated into the respective Sub-fund currency at the exchange rates applicable on the transaction dates. Assets and Liabilities designated in currencies other than the Sub-fund's currency are translated into the respective Sub-fund currency at the exchange rates applicable as of 30 June 2023. Gains and losses on foreign exchange transactions are recognised in the "Statement of Changes in Net Assets" in determining the results for the accounting period.

#### e) Options, Futures and Swaps Contracts

Valuation of the derivatives is performed at each valuation date by use of the mark-to-market principle.

The value of futures contracts which are quoted or traded on any exchange is based on the last available price on that exchange on the applicable Valuation Day. The value of futures contracts traded on another market is based on the last available price on this market on the applicable Valuation Day.

In the event that any of these assets on the Valuation Day is not quoted or traded on any exchange or other market or if the price is not representative of the fair value, the value of such an asset is determined prudently and in good faith on the basis of the estimated realisable value.

Futures contracts involve, to varying degrees, risk of loss in excess of the values reflected in the Sub-fund Statement of Net Assets. The underlying face amount at value of any open futures contracts at the period-end is shown in the Schedule of Investments of the relevant Sub-fund. This amount reflects each contract's exposure to the underlying instrument at the period-end. Losses may arise from changes in the value of the underlying instruments or if the counterparties do not perform under the contract's terms. Gains (losses) are realised upon expiration or closing of the futures contracts.

The risks include price movements in the underlying securities, the possibility there may be an illiquid market, and/or the inability of the counterparties to fulfil their obligations under the contract.

##### i) Hedges against market risks and risks associated with stock market performance:

For the purpose of hedging against poor market performance, the Company may, for each Sub-fund, sell forward transactions and call options on share price indices, bond market indices or other indices or financial instruments or buy put options on share price indices, bond market indices or other indices or buy financial instruments or enter into swaps in which the payments between the Company and the counterparty depend on the development of certain share price indices, bond market indices or other indices or financial instruments.

As these call and put transactions are for hedging purposes, there must be a sufficient correlation between the structure of the securities portfolio to be hedged and the composition of the stock index employed.

##### ii) Hedges against interest rate risks:

For the purpose of hedging against the risks associated with changes in interest rates the Company may sell interest rate futures and call options on interest rates, buy put options on interest rates and enter into interest rate swaps, forward rate agreements and options on interest rate swaps (swaptions) with highly rated financial institutions specialising in these kind of transactions as part of OTC transactions for each Sub-fund.

## Notes to the Financial Statements

for the period ended 30 June 2023 (*continued*)

### 2. Summary of Significant Accounting Policies (*continued*)

#### e) Options, Futures and Swaps Contracts (*continued*)

##### iii) Hedges against inflation risks:

For the purpose of hedging against risks resulting from an unexpected acceleration of inflation, the Company may conclude so-called inflation swaps with highly rated financial institutions specialising in this type of transaction as part of OTC transactions or make use of other instruments to hedge against inflation for each Sub-fund.

##### iv) Hedges against credit default risk and the risk of a deterioration in a borrower's credit standing:

For the purpose of hedging against credit default risk and the risk of losses owing to a deterioration in the borrower's credit standing, the Company may engage in credit options, credit spread swaps ("CSS"), credit default swaps ("CDS"), CDS (index) baskets, credit-linked total return swaps and similar credit derivatives with highly rated financial institutions specialising in these kind of transactions as part of OTC transactions for each Sub-fund.

As at 30 June 2023, the Company had outstanding futures contracts that are detailed in the Schedule of Investments. There are no swaps or OTC contracts open at period-end.

#### f) Repurchase Agreements (Repos)

The Company may as buyer or seller enter into repurchase agreements. A repurchase agreement is an agreement under which, on payment of the purchase price, the Company receives (purchases) securities from a seller who agrees to repurchase them at or within a specified time at a specified price. A repurchase agreement is similar in effect to a loan by the fund to the seller collateralised by the securities. The fund does not record the purchase of the securities received but does record the repurchase agreement as if it were a loan, and is disclosed in the Combined Statement of Net Assets under "Receivable for repurchase agreements", including any interest receivable on such transaction. Because a repurchase agreement between the two specific parties involved is generally for a relatively short time and is not transferable, it is not readily marketable. The fund carries repurchase agreements at cost, which, combined with accrued interest, approximates market value. The interest received is recorded in the Combined Statement of Operations and Changes in Net Assets under "Interest income". There was no outstanding repurchase agreement made by the Company as at 30 June 2023.

#### g) Forward Foreign Exchange Contracts

Each Sub-fund may buy and sell forward currency contracts, which are agreements between two parties to buy and sell currencies at a set price on a future date. These contracts are used to protect against a decline in value relative to the sub fund's currency as compared to the currencies in which its portfolio securities are denominated or for other investment purposes. The value of forward currency contracts is determined using current forward currency exchange rates supplied by a quotation service. The market value of the contract will fluctuate with changes in currency exchange rates. The contract is marked to market daily and the change in market value is recorded as an unrealised gain or loss. When the contract is closed, the fund records a realised gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed. The fund could be exposed to risk if the value of the currency changes unfavourably, if the counterparties to the contracts are unable to meet the terms of their contracts or if the fund is unable to enter into a closing position. Risks may exceed amounts recognised on the Combined Statement of Net Assets. Forward currency contracts outstanding at period-end, if any, are listed in the Schedule of Investments of the relevant Sub-funds.

#### h) Security transactions and related investment income

Security transactions are recorded on the day following the actual trade date (the date the order to buy or sell is executed). Gains or losses on securities are determined on the average cost basis. Interest income is recorded on the accrual basis. Dividend income, net of applicable withholding taxes, is recognised on the ex-dividend date or as soon as the fund is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the fair market value of the securities received. All premiums/discounts are amortised/accreted on a yield-to maturity basis.

## Notes to the Financial Statements

for the period ended 30 June 2023 (*continued*)

### 2. Summary of Significant Accounting Policies (*continued*)

#### i) Organisation Costs

The organisation costs of individual Sub-funds may be capitalised and amortised on a straight-line basis over a period of up to five years from the date of commencement of individual Sub-funds.

#### j) To be announced securities

The Company may invest in mortgage-backed securities To Be Announced (“TBA”) commitments. These commitments reflect future dated purchases and sales of agency Mortgage Backed Securities (“MBS”). At period end there aren't any TBA held.

#### k) Swing Pricing Adjustment

A Sub-fund may suffer dilution of the Net Asset Value per Share due to investors buying or selling Shares in a Sub-fund at a price that does not reflect the dealing and other costs that arise when security trades are undertaken by the Investment Manager to accommodate cash inflows or outflows. In order to counter this impact, a Swing Pricing Adjustment may be adopted to protect the interests of Shareholders of a Sub-fund. If on any Valuation Day, the aggregate net transactions in Shares of a Sub-fund exceed a pre-determined threshold, as determined and reviewed for each Sub-fund on a periodic basis by the Management Company, the Net Asset Value per Share may be adjusted upwards or downwards to reflect net inflows and net outflows respectively.

Net inflows and net outflows will be determined by the Management Company based on the latest available information at the time of calculation of the Net Asset Value per Share. A Swing Pricing Adjustment may be applied across all Sub-funds, as defined by the Prospectus. The extent of the price adjustment will be set by the Management Company to reflect dealing and other costs. Such adjustment may vary from Sub-fund to Sub-fund and will not exceed 3% of the original Net Asset Value per Share. The official Net Asset Value per Share as at period-end, disclosed in the Statistical Information section of this report, may therefore include a Swing Pricing Adjustment, which would not be recognised in the Statement of Net Assets, in the Statement of Operations and in the Statement of Changes in Net assets.

As at period-end, a Swing Pricing Adjustment had been applied to the following Sub-funds as follows:

Sub-funds	Currency	NAV before Swing Pricing Adjustment	Swing Pricing Adjustment	NAV after Swing Pricing Adjustment

### 4. Taxation

The Company is subject to the Luxembourg tax jurisdiction. Under Luxembourg law and the current practice, the Company is subject neither to income tax nor to any tax on capital gains in respect of realised or unrealised valuation profits. No taxes are payable in Luxembourg on the issue of Shares.

The Net Asset Value corresponding to the "P" and the "A" Shares (Shares for retail and institutional investors) is subject to the tax d'abonnement at the rate of 0.05% per annum of the Net Asset Value as valued at the end of each quarter, and payable quarterly by the Sub-fund. The "P" and the "A" Shares classes are available to retail and institutional investors. To the extent that parts of the Company's assets are invested in other Luxembourg UCITS which are subject to the tax d'abonnement, assets will not be subject to additional tax.

The Net Asset Value corresponding to the "I" and the "B" Shares (Shares for institutional investors) is subject to a reduced tax rate of 0.01% per annum payable quarterly by the Sub-fund, on the basis that the Company classifies the investors in this Share class as institutional investors as defined in Articles 174 to 176 of the 2010 Law. This classification is based on the Company's understanding of the current legal situation.

Capital gains and income from dividends, interest and interest payments originating in other countries may be subject to a non-recoverable withholding tax or capital gains tax in such countries. Tax effects are booked in accounting on a cash basis principle. However, a daily monitoring is performed on such balances to ensure that when material, appropriate provisions will be accordingly reflected.

In accordance with Article 175 of the 2010 Law, each share class subject to listing on a stock exchange and part of a Sub-fund which replicate the performance of an index is not subject to tax d'abonnement. The subscription tax (taxe d'abonnement) is a registration fee established on the negotiability of securities issued by Undertakings for Collective Investment.

#### Russia/Ukraine conflict

The conflict that started on 24th February 2022 between Russia and Ukraine has resulted in extensive restrictions and disruptions relating to Russian securities and markets. The effects of those restrictions have and may continue to adversely affect the funds that have exposure to the Russian markets. Sanctions threatened or already imposed against Russia, Russian entities or Russian individuals may result in disruption of the Russian economy, cause volatility in other regional and global markets and negatively impact the performance of various sectors and industries, as well as companies in other countries, which could have a negative effect on the performance of a Sub-fund, even if a Sub-fund does not have direct exposure to securities of Russian issuers. As a collective result of the imposition of sanctions, Russian government countermeasures and the impact that they have had on the trading markets for Russian securities, certain funds have used, and may in the future use, fair valuation procedures approved by the fund's Board to value certain Russian securities, which could result in such securities being deemed to have a zero value. Sanctions, or the threat of new or modified sanctions, could also impair the ability of a fund to buy, sell, hold, receive, deliver or otherwise transact in certain affected securities or other investment instruments.
