Note 1: Financial Reports

The fund reports are produced in accordance with the legal provisions and regulations governing undertakings for collective investments applicable in Luxembourg.

Note 2: Main Accounting Policies

The net assets of each subfund or each unit class correspond to the difference between the total assets of the subfund or unit class and the total liabilities of the subfund or unit class concerned.

The total net assets are given in Swiss Francs (CHF). For this purpose the net assets of any subfunds that are not denominated in CHF are converted at the last known middle rate of exchange at the closing date. This conversion was based on the following rates:

Exchange rates

CHF 1.00 = CHF 1.00000000 USD 1.00 = CHF 0.91480000			
USD 1.00 = CHF 0.91480000	CHF	1.00 = CHF	1.00000000
	USD	1.00 = CHF	0.91480000

Valuation principles:

- a) Securities, derivatives and other investments that are listed on a stock market are valued at the last-known market prices. If these securities, derivatives and other investments are listed on several stock exchanges the last available price on the stock exchange that is the main market for this security is key. For securities, derivatives and other investments for which trading on an exchange is minor and for which there is a second market between securities traders with
- b) Securities and other investments that are not listed on a stock exchange or on a regulated market are valued at the last market price available. If this is not available, the valuation of the securities is undertaken by the management company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price, the value of which must be estimated with due care and in good faith.
- c) Money market instruments which are not listed on a stock exchange, but are traded on another regulated market which is recognized, open to the public and functions properly, may be valued as follows: starting from the net purchase price, the valuation price of such investments is progressively adjusted to the redemption price, while keeping the investment yield constant. In the event of significant changes in market conditions, the valuation basis of the individual investments is brought into line with the new market yield.
- d) Liquid assets, trustee funds and fixed-term deposits are valued on the basis of their nominal value plus accrued interest.
- e) Units in UCITS and other UCIs are valued according to their last published net asset value. If no net asset value is available, but only acquisition and sale prices, the units of such UCITS and other UCIs may be valued at the mean value between such acquisition and sale prices. If no current prices are available, the valuation is carried out by the management company in accordance with other criteria to be specified by the Board of Directors and on the basis of the probable sale price which must be estimated with due care and in good faith.
- f) Derivatives that are not traded on a stock exchange or any other regulated market are to be valued at the fair value that is appropriate after careful assessment, taking into account the overall circumstances.
- g) For each subfund the assets that are denominated in a currency other than that of the subfund are converted to the subfund's currency at the prevailing mean rate. Forward contracts entered into to hedge currency risk are included in the conversion.
- h) Calculation of net asset value

The net asset value of the units is determined by the management company for each individual sub-fund Contractual conditions and in accordance with Section 3.1 of the sales prospectus on every bank business day in Luxembourg calculated.

The management company is entitled to temporarily use other generally recognized auditors to apply comprehensible valuation principles for the overall fund balances and the balances of a sub-fund, if the above-mentioned evaluation criteria are impossible or inappropriate due to extraordinary events appear.

i) Capital gains or losses from securities transactions The realized gains or losses from the sale of securities are calculated based on the average

Purchase price calculated.

Note 3: Administrative commission

The fund will be invoiced a fixed administrative commission for management and administration plus the distribution of fund units, to be paid to the Management Company. This commission will be paid monthly, based on the average net fund volume of the respective subfund.

The flat-rate administrative commission comprises the two components of the flat-rate management fee (costs of asset management and sales) and the flat-rate administration fee (costs of management and administration).

As at reporting date, the effective flat-rate administrative commission amounted to:
