EQUITY WORLD GURU, a subfund of the SICAV THEAM QUANT-

Class "C Capitalisation" - ISIN code LU1893655602

This Sub-Fund is managed by BNP PARIBAS ASSET MANAGEMENT Europe, part of the BNP Paribas Group.

Objectives and investment policy

The Sub-Fund seeks to increase the value of its assets over the medium term by being exposed to a dynamic basket of equities listed on worldwide markets or operating on these markets, the components of which are chosen using a systematic selection method based on a fundamental analysis of companies while taking into account Environmental, Social and Governance (ESG) criteria.

In order to achieve its investment objective, the Sub-fund implements a quantitative investment strategy (the Strategy) that consists of the following steps:

(a) definition of the investment universe composed of worldwide markets largest stock market capitalisations offering satisfactory liquidity conditions and meeting minimum ESG requirements following a best-in-class approach. Are in particular excluded, companies involved in sectors with potentially high negative ESG impact, those subject to significant violations of the principles of the United Nations Global Compact and those that have been involved in serious controversies related to ESG.

(b) selection of stocks using a fundamental approach. The objective is to examine the investment universe in order to identify the stocks benefiting from a sustainable business model, favourable outlook and attractive valuation.

(c) ensuring minimum ESG and carbon objectives, consisting of a lower carbon footprint and of a better ESG score of the Strategy final portfolio compared to a reference market investment universe.

An extra-financial strategy may comprise methodological limitations such as the Risk related to ESG investment or the Risk related to a systematic allocation incorporating extra-financial criteria.

The Strategy is implemented via the use of the BNP Paribas GURU® All Country ESG NTR USD Index (the Strategy Index) financial index. It is based on a quantitative model developed by BNP Paribas and is rebalanced every month using a specific algorithm. Investors should note that there are annual replication costs linked to the monthly readjustment of each portfolio as well as innovation fees and liquidity costs (these costs may change depending on market conditions). These costs will reduce the performance of the Strategy Index and indirectly reduce that of the Sub-fund. The complete breakdown of the Strategy Index is available on the website: <https://indx.bnpparibas.com>. The index calculation method is available directly at: <https://indx.bnpparibas.com/nr/BNPIGAC.pdf>.

The Strategy of the Sub-fund is deemed active. The Sub-fund benchmark is the MSCI World (NR) with no objective to replicate it.

The Strategy will be implemented either according to a Synthetic Replication Policy, through the conclusion of OTC Derivatives or in cash by investing directly in the basket of equities that make up the Strategy. The Synthetic Replication Policy implies that the Sub-Fund does not actually hold the underlying securities of the Strategy, but instead relies on OTC Derivatives to deliver the performance of the Strategy. The Sub-fund invests at all times at least 51% of its net assets in equities and/or securities treated as equivalent to equities issued by companies of any country, other than non-cooperative countries in the fight against fraud and tax evasion.

Investors are able to subscribe or redeem any day except if one or several stock exchanges that provide 10% or more of the Sub-fund's equity exposure are closed or are expected to close.

Subscription and redemption requests can be made to the administrative agent before 4.00 pm (CET) at the latest on the day preceding the relevant valuation day.

Administrative agent: BNP Paribas, Luxembourg Branch, 60 avenue J.F. Kennedy, L-1855 Luxembourg, Grand Duchy of Luxembourg.

Incomes are systematically reinvested.

Risk and reward profile

- Past performance such as the information used to calculate the synthetic indicator may not be a reliable indication of the sub-fund's future risk profile.
- The risk category associated with this sub-fund is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The risk category is justified by the investment mainly in stocks and shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.

Other risks materially relevant to the Fund which are not adequately captured by the indicator are described below:

- **Counterparty Risk:** This risk is associated with the ability of a counterparty in an Over The Counter financial transaction to fulfil its commitments like payment, delivery and reimbursement.
- **Risk linked to the use of forward financial instruments:** We use forward financial instruments traded over the counter in order to track the performance of the strategy. These instruments may involve a series of risks that could lead to adjustments or even a termination of the instrument, which could influence the net asset value.
