**Production date of the KID : 16.10.2023**

Caution : You are about to purchase a Product that is not simple and may be difficult to understand.

### What is this Product ?

#### **Type**

This Product is a Specialized Professional Fund, a mutual investment fund taking the form of an Alternative Investment Fund (AIF) under French law.

#### **Term**

The term of the Product is 99 years.

#### **Objectives**

The Product's investment objective is to outperform the ESTER. The Product will be invested between 70% and 130% in Bitcoin directly or indirectly.

The Product invests primarily in Bitcoin via different platforms. The Product may use forward financial instruments performance or swaps up to a maximum of 100% of net asset value.

The Product may gain exposure directly or through UCITS and/or AIFs to different markets and assets, always with a view to achieving the investment objective. The Product may also borrow cash in the event that a debit balance was to appear. The Product's global exposure won't exceed 130%.

In addition, the Product may make temporary deposits, acquisitions or sales of securities.

TOBAM computes and calculates the carbon footprint of the Product on an annual basis. This carbon footprint estimation is offset every twelve months through forests conservation, reforestation or renewable energy projects.

The carbon offset projects will be through:

- Verified Emission Reductions « VER ». These are carbon credits issued under the control of different types of labels governed by their own rules.

Given the nascent methodologies of estimation of the carbon footprint of Bitcoin, the estimations and off settings may not be compliant with AMF's

« Guide on carbon offsetting by collective investment scheme ».

The Product does not plan to invest in other cryptocurrencies. However, in case of hard fork of the Bitcoin, the Product may hold temporarily other cryptocurrencies. They will be sold in a timely manner.

To invest its cash and secure optimum returns on it, the Product may invest in money-market instruments, notably including money-market UCITS and negotiable debt securities up to 60%.

The Product may hold up to 10% of its assets in shares or units of the following UCITS, AIFs or investment Products.

Given the investment objective of the Product to be invested between 70% and 130% in Bitcoin directly or indirectly, sustainability risks and negative impacts of investment decisions on sustainability factors are not incorporated into the investment decisions.

The Product capitalizes its income.

#### **Intended Retail Investor**

The target investors are the professional investors mentioned in L533-16 of the Monetary and Financial Code and two categories of investors according to Article 423-27 of the AMF General Regulations: 1. mentioned in Article L. 214-155 and 2. investors whose initial subscription is equal to or greater than €10,000.

#### **Practical information**

Depository: CACEIS Bank

The latest prospectus and the latest periodical regulatory documents, as well as all other practical information, are free of charge from the Management Company, TOBAM, 49-53 Avenue des Champs Elysées, 75008 Paris, France and on the website [www.tobam.fr](http://www.tobam.fr).

## What are the costs ?

The person advising on or selling this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment over time.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product and how well the Product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- the Product performs as shown in the moderate scenario
- EUR 10,000 is invested.

Investment EUR 10,000	If you exit after 1 year	If you exit after 5 year (recommended holding period)
<b>Total costs</b>	EUR 1,139	EUR 46,011
<b>Annual cost impact*</b>	11.4%	6.6%

(\* ) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 96.22% before costs and 89.57% after costs.

### Composition of Costs

Investment EUR 10,000 and annual cost impact if you exit after 1 year

One-off costs		If you exit after 1 year
Entry costs	This includes, at maximum, distribution costs of 5.00% of the invested amount. This is the most you can be charged. The person selling you the Product will inform you of the actual charge.	EUR 500
Exit costs	5.00% The impact of the costs of exiting your investment when it matures. This is the maximum you will pay and you could pay less.	EUR 500
Recurring costs (taken each year)		
Management fees and other administrative or operating costs	1.25% of the value of your investment per year. This is the impact of the costs that we take each year for managing this Product.	EUR 125
Portfolio transaction costs	0.14% of the value of your investment per year. This is an estimate of the costs incurred when we buy or sell the underlying investments for the Product. The actual amount will vary depending on how much we buy and sell.	EUR 14
Incidental costs		
Performance fees	No performance fee currently applicable.	EUR 0

This table shows the impact the different costs have on the investment return you might get back at the recommended holding period and the meaning of the different cost categories.

## How long should I hold it and can I take the money out early ?

Recommended holding period : 5 years

This Product is designed for longer term investments ; you should be prepared to stay invested for at least five years.

Redemption orders are received by 1.00 pm (Paris time) each day (D) and are executed based on the net asset value on D, with the corresponding payments taking place on D+2.

Subscriptions and redemptions are received and centralised by:
