Report of the Board of Directors

The Board of Directors of Transtrend Fund Alliance (the "Company") submits its report and the audited financial statements for the year ended 31 December 2020.

Key events

Corona was the dominant factor during 2020. The Board is pleased to be able to report that all service providers of the Company were successful in continuing their service offering and that the Company's operations have not been impacted by Corona pandemic.

The Company has a liquidity risk management framework in place which provides guidelines for the application of liquidity management tools under extraordinary circumstances to safeguard a proper match between the liquidity of a sub-fund's positions and the subscription and redemption conditions offered to shareholders, and as such a fair valuation for existing, new and redeeming investors any time applications for subscription and/or redemption are made. None of the available liquidity risk management tools had to be applied during the period despite the Corona pandemic.

In order to further spread counterparty risks related to the Company's cash balances, the Manager has started to invest in Dutch Treasury Certificates for the EUR denominated sub-funds during the reporting period. The USD denominated sub-funds remain invested in T-Bills for cash management purposes. The Manager also started to make investments in a highly rated government money market fund for all sub-funds in order to have an additional option to spread counterparty risk.

Certain markets which were traded via futures listed on OneChicago Exchange until September 2020 are traded via swaps directly held with a clearing broker since then, due to the discontinuation of trading activities by this exchange.

Further to the decision of the Board of Directors to compulsory redeem all outstanding shares in OmniTrend Plus (USD) as its net asset value had dropped below USD 10,000,000, all remaining shareholders converted their holding to the newly introduced USD class in OmniTrend Plus (EUR) with effect from 1 October 2020, after which OmniTrend Plus (USD) was liquidated. OmniTrend Plus (EUR) has been renamed into OmniTrend Plus, having two separate share classes: Class EUR and Class USD. The reference currency of the sub-fund has remained euro; Class USD shares are hedged against the risks of FX rate fluctuations between the reference currency of the sub-fund and the US dollar, with the exception of the risks of such fluctuations actively sought pursuant to the sub-fund's investment policy.

The Company and Manager were fully prepared for the completion of Brexit as per 31 December 2020. The Company's operations were not impacted by this event.

Review fund performance

All sub-funds ended the year in positive territory. Transtrend's market report, which is included in this annual report, provides an explanation of the performance of Transtrend's Diversified Trend Program over this period.

Sub-fund	NAV 31/12/2020	NAV 31/12/2019	Net return
MultiTrend (EUR)	€ 2,618.69	€ 2,576.00	1.66%
OmniTrend (EUR)	€ 2,468.92	€ 2,346.57	5.21%
OmniTrend (USD)	\$ 2,391.16	\$ 2,262.35	5.69%
OmniTrend Plus – Class EUR	€ 3,189.09	€ 2,964.70	7.57%
OmniTrend Plus – Class USD	\$ 3,442.45	\$ 3,296.76*	4.42%*

*The NAV as at 31/12/2019 and the net return of OmniTrend Plus - Class USD prior to its start on 1 October 2020 represent the NAV as at 31/12/19 and net return of OmniTrend Plus (USD). Even though the investment policies of both the old and new fund vehicle are expected to yield similar returns, these net returns as such does not represent actual returns of OmniTrend Plus - Class USD.

The value of your investment can fluctuate. Past performance is not necessarily indicative of future results.

The total return for an individual investor is a combination of (i) the development of the sub-fund's net asset value per share since his investment and (ii) the development of his individual equalisation adjustment, if any.

On aggregate, there was a net cash outflow of approximately EUR 212 million for the Company over the reporting period. The cash outflow and the performance combined resulted in a decrease of the total net asset value of the Company by approximately 34.6%. The total net asset value of the Company amounts to approximately EUR 428 million per the end of the reporting period.

The aggregate trading level of the sub-funds per year-end amounted to EUR 516 million, being approximately 16% of the total assets under management (including notional funds) in DTP.

Governance

The Board of Directors has adopted the general principles of the ALFI Code of Conduct and confirms, after having performed an annual review, adherence to all principles of the Code.

The Board of Directors has three members as at 31 December 2020. The majority of the Board is independent. Biographies of each director are available in the Prospectus. None of the Directors is directly invested in the Company.

The Board has delegated fund administration services to the Manager who has sub-delegated these services to HedgeServ (Luxembourg) S.à r.l. (the "Administrator"). All delegated services are monitored on a daily basis by the Manager. The Administrator and the Manager report on a quarterly basis to the Board.

Shareholder communication

On 14 May 2020, the annual general meeting of shareholders was held in Luxembourg at the registered office of the Company, for which a convocation notice was sent to all shareholders. The shareholders approved among others the 2019 accounts of the Company, discharged the directors of the Company for the performance of their duties during the financial year 2019, and re-elected the current directors and the independent auditor until the next annual general meeting in 2021.

In October 2020 a prospectus update became available, reflecting among others the consolidation of the two OmniTrend Plus sub-funds. All shareholders have been notified of this update.

In December 2020 the Company changed its registered office of which all shareholders were notified.

Post balance sheet developments

The performance fee rate for each sub-fund was decreased from 20% to 16% effective 1 January 2021, to further increase the alignment of interest between the Manager, the Company and its Shareholders. This change effectively leaves a greater portion of trading profits to Shareholders.

The extraordinary general meeting of shareholders of OmniTrend (EUR) and OmniTrend (USD), which convened on 22 January 2021, approved the merger of OmniTrend (EUR) and OmniTrend (USD) into one sub-fund named OmniTrend, which was effected at 28 February 2021. OmniTrend has two separate currency share classes: Class EUR and Class USD. The reference currency of the sub-fund is US dollar. Class EUR shares are hedged against the risks of FX rate fluctuations between the reference currency of the sub-fund and the euro, with the exception of the risks of such fluctuations actively sought pursuant to the sub-fund's investment policy. A new prospectus dated March 2021 became available reflecting this consolidation and various other updates, of which all shareholders were notified.

As at 10 March 2021, certain disclosure requirements for the Company became effective pursuant to the EU Sustainable Finance Disclosure Regulation. The relevant disclosures can be found on the Manager's website and in the notes to the financial statements included in this report.

Finally, another prospectus update as at 1 March 2021 became available reflecting that the sub-funds are no longer registered under the UK's temporary permission regime. Instead, the OmniTrend sub-funds were notified under the UK's national private placement regime, in order to continue marketing of these sub-funds to professional investors in the UK.

The Board of Directors

Luxembourg, 20 April 2021

Market report of the Manager

The impact of the global pandemic was felt throughout the year with periods of high volatility, steep corrections, but also an unprecedented recovery across markets. In this turbulent year, Transtrend's Diversified Trend Program (DTP) was able to post a profit. While the first half of the year was slightly negative in terms of performance, a strong last quarter and especially a strong December, driven by a broad recovery trend in a variety of markets, ultimately resulted in a profit for the year.

DTP started the year rather bullish with longs in equities and energy markets and shorts in bonds and the euro. When the coronavirus outbreak reached Europe in late February, sentiment shifted abruptly, driving our risk-on positions into losses. Some parts of the portfolio however allowed to capitalize on several accelerating trends, offering compensating profits, although not sufficient to prevent a small loss during the first quarter.

The abrupt and deep correction in markets in February and March was followed by a strong recovery in the following months. In equity markets, the pace of the recovery was unprecedented and DTP swiftly built up long positions, being positioned net long again in early May, mainly in U.S. technology and other 'corona-defensive' stocks. The more positive outlook also caused base metals such as iron ore and copper to start trending upwards and DTP started to build sizable long positions in these markets as well.

These long positions in metals and equities were part of a large and broadening corona recovery trend. This recovery trend started in April after Asia regained control of the virus and had broadened since to other markets, including uptrends in emerging markets currencies, also fueled by stimulus packages from governments and central banks around the world. This recovery trend drove strong performance in July and was able, with some temporary setbacks, to continue until the end of the year. Iron ore was the star performer within this trend and the highest contributor to DTP for the year. Within commodities, the strong uptrend in iron ore allowed the metals to contribute most to performance. DTP also gained on long positions in tin, gold and copper.

Within energy markets, the first quarter saw a positive contribution as DTP gained on short positions in oil markets that were initiated in the weeks before the pandemic hit markets. The remainder of the year was more mixed for energy markets and resulted in a flattish contribution for the year overall. The agricultural markets also brought mixed performance for the largest part of the year. However, a strong last quarter in especially the oilseeds & wheat uptrend compensated for earlier losses. Palm oil was a notable performer with a strong uptrend since April and the second largest contributor to DTP for the year as a whole.

Within equities, losses during the market sell-off in February and March were largely compensated by profits later on, especially during the uptrend from May until August. Currencies also saw a recovery in terms of performance contribution, after especially a negative February when the shorts in euro turned losing. However, even with a strong last quarter, driven by longs in emerging market currencies, the overall contribution of currencies to DTP's performance remained negative.

Interest rate instruments had a strong contribution to performance, especially in the first half of the year on newly entered longs in North American bonds, just before the market turmoil started in late February. This offered compensating profits when other trends reversed, in line with our aim to be diversified across different trends. During the second half, it was

mainly our positioning in commodities paying off. While these markets are often seen as more alternative, they form an integral part of our diversified approach and especially metals and agricultural markets allowed DTP to end this turbulent year with a profit.

The below graph depicts the development of portfolio risks during 2020.

Trend risk is defined as the estimated aggregate impact of a major adverse price move in a particular market and the coinciding adverse price effects in all markets currently exhibiting the same trend.

Extreme risk is defined as the estimated aggregate impact of a major adverse price move in a particular market and the coinciding adverse price effects in correlated markets. Most of the time it comprises a large variety of positions in different trends that share a common factor, for instance 'risk on'.

The 'pre RM' figures in the graph show the portfolio's largest trend and extreme risks as they would have been without the application of the program's risk concentration mitigation measures. The solid lines show the actual trend risk and extreme risk after the application of these measures.

Which positions add up to all of the program's risk concentrations will change from day to day. Both risk metrics are not static metrics – throughout the years the definition and the way the program utilizes these metrics have been (materially) changed. Risk numbers therefore cannot always be compared over time. See for example our February 2019 and July 2019 Monthly Reports for more information on these changes.

Transtrend B.V.

Rotterdam, January 2021

N.B. This report is prepared by Transtrend and serves to explain the background of the composite performance of its Diversified Trend Program. However, the portfolio composition of individual accounts generally deviates from the composition of the aggregate portfolio, as certain markets may or may not be included in individual portfolios.

THE VALUE OF YOUR INVESTMENT CAN FLUCTUATE. PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS.

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Report on the audit of the financial statements

Opinion

We have audited the financial statements of Transtrend Fund Alliance and each of its sub-funds ("the Fund"), which comprise the statement of net assets and the investment portfolio as at 31 December 2020 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Transtrend Fund Alliance and each of its sub-funds as at 31 December 2020, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of "réviseur d'entreprises agréé" for the Audit of the Financial Statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d’entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Notes to the Financial Statements

1 General

Transtrend Fund Alliance (the "Company") is a multiple sub-fund investment company (Sicav), incorporated on 4 November 2003 under Part II of Luxembourg law of 17 December 2010 on Undertakings for Collective Investment and under the Luxembourg law of 10 August 1915 on Commercial Companies, as amended. The Company further qualifies as an alternative investment fund under the law of 12 July 2013 on alternative investment fund managers, as amended, and appointed Transtrend B.V. as its alternative investment fund manager (the "Manager"). The Company is registered in the Luxembourg register of commerce under number B 97101. The Company obtained a visa from the Commission de Surveillance du Secteur Financier. The latest prospectus as per the end of the year under review is dated October 2020 and the articles of incorporation were last amended on 12 June 2018.

The Company has established segregated opposable accounts, each constituting a sub-fund within the meaning of article 181 of the law of 17 December 2010 on Undertakings for Collective Investment, whose assets are invested in accordance with the particular investment features applicable to the sub-fund. Each sub-fund is represented by a specific class or classes of shares. This annual report covers the financial period from 1 January 2020 through 31 December 2020. At balance sheet date the Company comprised four sub-funds: MultiTrend (EUR), OmniTrend (EUR), OmniTrend (USD) and OmniTrend Plus. The sub-fund OmniTrend Plus (USD) has been liquidated on 30 September 2020. OmniTrend Plus was formerly known as OmniTrend Plus (EUR). The name was changed on 1 October 2020.

2 Investment Policy

The Company is an investment company which allows investors the opportunity to participate efficiently in global futures, forward, swap or other derivative markets through investment strategies to suit the investors' investment objectives. Each sub-fund's objective is to achieve for its shareholders long-term capital appreciation within the limits of a defined risk tolerance.

For the efficient utilization of the liquidity reserves and for hedging currency exposures, the sub-funds may employ various risk and money management techniques.

Details of the structure, investment policy and management of the sub-funds are provided in the prospectus.

3 Summary of Significant Accounting Principles

3.1 Presentation of financial statements

The financial statements are prepared on the going concern basis and in accordance with Luxembourg legal and regulatory requirements applicable to investment funds. All figures disclosed in the financial statements are reported in thousands. As a result, small rounding differences may occur.

3.2 Valuation of investments

All contracts traded on any form of organised market are valued at the last available price. Where such price is not representative of the fair value of the relevant contract, the value used is its reasonably foreseeable sales price as determined prudently and in good faith by the Board of Directors and/or the Manager in accordance with the valuation principles of the Company.

Futures contracts

Futures contracts are contractual agreements to buy or sell a specified financial instrument, interest rate, currency pair or commodity at a specific price and date in the future. These

contracts are transacted in standardised amounts on regulated exchanges, or in particular cases in the OTC market and subsequently brought forward for clearing to the clearing houses of such exchanges, and are subject to daily cash margin requirements. When the Company has an open position in a futures contract, changes in the value of the contract are recognised as unrealised gains or losses based on the last known market value of the contract at each trading day. Variation margin payments are made or received, depending upon whether unrealised gains or losses are incurred.

Commitments for open futures contracts are valued by multiplying the number of contracts held in position with the settlement price and the point value.

Futures contracts are collateralized by cash held with clearing brokers in trading and related accounts.

Forward foreign exchange contracts

Forward foreign exchange transactions are effectuated on a principal-to-principal basis in the OTC market. Such transactions current at balance sheet date are valued at the forward rates applicable to the remaining life of the relevant contracts.

The forward foreign exchange contracts are collateralised by cash held with clearing brokers in trading and related accounts.

Total return swaps

A total return swap is a bilateral agreement in which each party agrees to exchange payments based on the total return of the underlying asset for a fixed or variable rate. The value of such swap is determined by combining the closing price of the underlying asset established on the exchange of its primary listing, any capital gains and the accrued financing cost as agreed with the relevant clearing broker.

Total return swaps are collateralized by cash held with clearing brokers in trading and related accounts.

Money market instruments

Money market instruments with a maturity date of less than twelve months are valued on a mark-to-market basis. Realised gains are recognised as interest.

Money market fund investments

Money market fund investments are valued on a mark-to-market based on the latest NAV of the fund. Realised gains are recognised as interest. Dividends earned are classified as dividend income.

3.3 Exchange rates

The Company maintains its accounting records in EUR. Cash deposits, other net assets, the market value of investments and the unrealised result on derivatives expressed in currencies other than EUR are converted into EUR at the exchange rate prevailing at the closing date of the reporting period. Income and expenses in currencies other than EUR are converted into EUR at the exchange rates prevailing on the date of payment. Realised and unrealised foreign exchange gains and losses are included in the statement of operations and changes in net assets.

The following exchange rates prevailing at 31 December 2020 were used:

EUR 1 =	1.5846	AUD	EUR 1 =	24.2937	MXN
EUR 1 =	6.3418	BRL	EUR 1 =	4.9089	MYR
EUR 1 =	1.5550	CAD	EUR 1 =	10.4819	NOK
EUR 1 =	1.0816	CHF	EUR 1 =	1.6971	NZD
EUR 1 =	867.45	CLP	EUR 1 =	58.5864	PHP

EUR 1 =	7.9357	CNH	EUR 1 =	1,328.76 KRW
EUR 1 =	4,178	COP	EUR 1 =	4.5616 PLN
EUR 1 =	26.2345	CZK	EUR 1 =	90.6047 RUB
EUR 1 =	7.443	DKK	EUR 1 =	10.0362 SEK
EUR 1 =	0.8934	GBP	EUR 1 =	1.6141 SGD
EUR 1 =	9.4668	HKD	EUR 1 =	36.6263 THB
EUR 1 =	362.5650	HUF	EUR 1 =	9.0814 TRY
EUR 1 =	126.0850	JPY	EUR 1 =	34.3041 TWD
EUR 1 =	17.9410	ZAR	EUR 1 =	1.221 USD

For the combined figures, the exchange rate of 1.221 (EUR : USD) prevailing at 31 December 2020 is used.

3.4 Other receivables

Other receivables are mainly composed of interest receivable.

3.5 Other liabilities

Other liabilities are mainly composed of accrued management fees, advisory fees, depositary fees and director fees, and interest payable.

3.6 Equalisation credits

Equalisation credits represent the change in the value of equalisation credits related to investments in a class of shares, which have been accrued in the net asset value of the applicable sub-fund.

3.7 Realised gains and losses on investments

Realised gains and losses on sales and purchases of futures are determined on the basis of the FIFO method; realised gains and losses on sales and purchases of forward contracts are determined at maturity date or upon novation. Realised gains and losses on sales and purchases of total return swaps are determined on the basis of the FIFO method. Realised gains and losses on sales of money market instruments are determined at the basis of the mark-to-market method.

3.8 Accounting estimates

The preparation of financial statements in conformity with accounting principles generally accepted in Luxembourg requires the Board of Directors to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported accounts of income and expenses during the reporting period. Actual results may differ from those estimates.

4 Taxes

Under the legislation and regulations currently prevailing in Luxembourg, the Company is not subject to any taxes on profits or income. However, the Company is subject to a taxe d'abonnement at the rate of 0.05% per annum, calculated and payable quarterly on the aggregate net assets of the Company as valued on the last day of each quarter. A reduced tax rate of 0.01% per annum is applicable to individual sub-funds or individual classes of shares issued within a sub-fund provided that the shares of such sub-funds or classes are reserved to one or more institutional investors, which is the case for the OmniTrend sub-funds. Dividends and interest received may be subject to non-recoverable withholding or other taxes in the country of origin.

5 Fees payable

The fees and charges of the depositary, administrator, clearing brokers, Manager, directors, auditor, legal adviser and other service providers are paid out of the net assets of each sub-fund and conform to common practice. In principle expenses are allocated to the sub-fund for which such expenses actually have been incurred. If this is not possible or practical, expenses will be allocated proportionally to the sub-funds based on the net assets of each sub-fund. In case expenses are set by the number of sub-funds, then such expenses will be equally divided over the sub-funds.

5.1 Management and performance fees

The sub-funds pay the Manager a monthly management fee of 1/12th of 1% of the trading level established at the beginning of the month, in general representing for the OmniTrend sub-funds 1/12th of 1%, for the OmniTrend Plus sub-funds 1/12th of 1.5% and for MultiTrend (EUR) 1/12th of 2% of the corresponding net asset value, payable in arrears.

The management fees are paid to the Manager, after deduction of the total amount of rebates allocated to, or newly accrued for, shareholders. Such management fee rebates are based on the (aggregate) amount of assets held by an investor or group of investors, whose investments are directed by the same investment manager or investment adviser, in one or more sub-funds and in certain fund vehicles managed or advised by the Manager (or a dedicated part of its personnel) other than the Company, where such aggregate amount of assets exceeds (the equivalent of) USD 50M, as defined in the prospectus. Over the reporting period, the aggregate proceeds from subscriptions resulting from the allocation of rebates to shareholders per sub-fund amounted to:

- EUR 79,840 for OmniTrend (EUR)
- USD 224,091 for OmniTrend (USD)
- EUR 306,314 for OmniTrend Plus – Class EUR

The sub-funds pay the Manager a performance fee of 20% of the appreciation of the gross net asset value per share, accruing monthly as at each valuation day and payable annually at the end of each calendar year or upon any redemption of shares. A “high water mark” and equalisation are applied.

The performance fees as reported in the statements of operations do not include equalisation deficits which crystallised during the reporting period. As such crystallisation is effectuated by a redemption of shares, the relevant amounts are accounted for in the payments for redemptions as reported in the statements of operations and changes in net assets. The value of these crystallised equalization deficits does however represent performance fees paid to the Manager.

In the period under review the aggregate value of crystallised deficits per sub-fund, if any, amounted to:

- EUR 102,789 for OmniTrend (EUR)
- USD 98,588 for OmniTrend (USD)
- EUR 687 for OmniTrend Plus
- USD 15,837 for OmniTrend Plus (USD)

5.2 Depositary and administration fees

The fees for supervisory and safekeeping services payable to the depositary are charged on the basis of the total net assets of the sub-funds.

Administration fees comprising among others fund accounting and investor services payable to the administrator are charged on the basis of the aggregate gross assets of the sub-funds. Each sub-fund will pay for the metered reference and market data used by the

administrator to value its investment portfolio and open positions. These expenses as well as the preparation fee for the financial statements are also included under administration fees.

5.3 Redemption fees

The sub-funds may charge a redemption fee of up to 1% of a sub-fund's net asset value per share upon the redemption of shares by shareholders. No redemption fees have been charged during the reporting period.

5.4 Brokerage fees

Each sub-fund pays the clearing brokers actual transaction charges consisting of execution fees, dealer spreads, give-up fees, clearing fees, exchange fees, regulatory fees and other transaction related fees, expenses and withholding taxes.

5.5 Risk monitoring fees

Each OmniTrend sub-fund pays the risk monitoring agent a monthly fee of 1/12th of 0.10% of its net asset value as at each valuation day. The risk monitoring fee rate is subject to a sliding scale, which is related to the aggregate net asset value of all OmniTrend sub-funds for which RPM Risk & Portfolio Management AB act as independent risk monitoring agent. Over the reporting period, risk monitoring fees incurred by the OmniTrend sub-funds amounted to approximately 0.07% of each sub-fund's net asset value on an annual basis.

5.6 Directors' fees

Independent directors of the Company are remunerated for their services at a fixed fee, which for the reporting period on aggregate amounts to EUR 50,000 excluding VAT. The directors affiliated with the Manager do not receive any remuneration for their services as director. Independent directors are reimbursed for their travel expenses, which are also included under the caption "director fees".

5.7 Regulatory fees

Regulatory fees are comprised of fees payable to supervisory authorities, an annual electronic reporting fee to fulfill regulatory reporting requirements, EMIR reporting fees that are charged to each sub-fund per transaction and the related standard identifier costs. Regulatory fees were included under the caption "other fees and expenses" in prior years.

5.8 Other fees and expenses

The Swiss representative and paying agent fees make up the largest part of the caption "other fees and expenses".

6 Total Expense Ratio

The Total Expense Ratio ("TER") in the table below expresses, as a percentage of the average net asset value, the sum of all costs (excluding brokerage fees, securities transaction charges and bank interest) charged to each sub-fund during the reporting year. The management fee and performance fee are usually the main components of each sub-fund's TER. However, the performance fee depends on the investment performance and thus may substantially fluctuate from year to year. Although not included in the TER, brokerage fees are a significant cost for the sub-funds as well and are therefore added separately to the table.

Sub-fund	TER (%)	Performance fee (%, included in TER)	Brokerage fees (%, not included in TER)
MultiTrend (EUR)	2.39	0.00	1.05
OmniTrend (EUR)	1.27	0.00	0.81
OmniTrend (USD)	1.53	0.29	0.79
OmniTrend Plus- Class EUR	1.77	0.00	1.15
OmniTrend Plus- Class USD *	0.44	0.00	0.25

* Fees and expenses since the launch of the class on 1 October 2020

7 Counterparty risk

The Company is subject to the risk that counterparties will not be able to fulfil their obligations with respect to transactions, positions, balances or otherwise, whether due to insolvency, bankruptcy or other causes. In such case, the Company may be able to recover none or only a portion of its assets, including unrealised profits, held with such counterparty. This could subject the Company to substantial losses. In an effort to mitigate such risk, the Company attempts to diversify its exposure across a select number of counterparties, while limiting its transactions to counterparties which have been selected on the basis of, among others, their reputation, creditworthiness, experience, quality of service, ownership and legal structure and jurisdiction. As per the end of the reporting period, the clearing brokers and the banks on aggregate held, in addition to all futures and forward foreign exchange contracts (including unrealised gains on trading positions), the below listed cash amounts per sub-fund.

Sub-fund	Cash exposure as at 31/12/20
MultiTrend (EUR)	€ 8,011,869
OmniTrend (EUR)	€ 50,041,725
OmniTrend (USD)	\$ 52,443,572
OmniTrend Plus	€ 67,491,198

In order to initiate and maintain positions in financial instruments, part of the Company's assets held with a clearing broker will be posted at clearing houses and potentially with one or more carrying brokers or sub-custodians selected by such clearing broker. Also, in case a clearing broker holds the Company's money on a segregated basis, such money generally will be held at banks as selected by the clearing broker. As a result, the effective counterparty risk in respect of the money held with such clearing broker is to such third parties. Margin held in the form of securities may be subject to a right of re-using for the clearing broker, and to the extent that a clearing broker has used such right, such securities will not be segregated from the clearing broker's own assets and the effective counterparty risk in respect of those securities is to the clearing broker.

Initial margin held at trading accounts and related accounts represents cash deposits held with clearing brokers as collateral for open positions in futures, foreign exchange forwards

and total return swaps. As at 31 December 2020 the initial margin held at the sub-funds' trading and related accounts per clearing broker amounted to:

Sub-fund	Societe Generale SA	UBS AG (non-cleared)	UBS AG, London Branch (cleared)	UBS Securities LLC
MultiTrend (EUR)	€1,872,257	€595,568	€1,304,716	€499,780
OmniTrend (EUR)	€8,961,121	€2,667,759	€6,268,131	€2,370,717
OmniTrend (USD)	\$15,642,955	\$5,314,908	\$11,878,185	\$5,291,153
OmniTrend Plus	€18,815,846	€5,528,035	€12,940,075	€4,976,969

The sub-funds hold forward foreign exchange contracts bilaterally with Societe Generale SA and UBS AG. Total return swaps are held bilaterally with UBS AG.

8 Distribution

The Board of Directors may propose a dividend at any time in the future. However, it is intended that capital appreciation in the net assets at the end of the financial year will remain invested in the sub-funds. No dividend was distributed during the reporting period.

9 Changes in investment portfolio composition

During the period under review, the sub-funds established an investment portfolio in the meaning of Schedule B of Annex I to the Luxembourg law of 17 December 2010 on Investment for Collective Undertakings, comprising money market instruments and funds for efficient cash and/or risk management purposes. The details of the changes in the investment portfolio composition during the period under review may be inspected by shareholders during usual business hours on any business day at the registered office of the Company.

10 Realised and unrealised gain and loss on investments

Realised gain and loss are disclosed separately by investment type as follows:

Sub-fund	Forward foreign exchange contracts		Futures contracts	
	Gain	Loss	Gain	Loss
MultiTrend (EUR)	€1,827,047	€-2,170,802	€24,423,239	€-24,345,975

OmniTrend (EUR)	€0	€-8,833	€380,005	€-86,160
OmniTrend (USD)	\$-17,252	\$0	\$,735,361	\$-159,986
OmniTrend Plus	€0	€-11,330	€822,492	€-175,508

11 Subsequent event

Effective 1 January 2021, the performance fee rate for each sub-fund decreased from 20% to 16% to further increase the alignment of interest between the Manager, the Company and its shareholders. All other terms of the performance fee have remained unchanged.

On 1 March 2021 OmniTrend (EUR) was merged into Class EUR of OmiTrend (USD), which was renamed OmniTrend.

Supplementary information (unaudited)

Risk Management

The Company is exposed to a variety of risks as a result of its activities. These risks include market risk, counterparty risk, liquidity risk and operational risk. For a description of other relevant risk factors, we refer to the current prospectus of the Company.

Structure

The Manager is responsible for the overall risk management approach for each of the sub-funds of the Company and employs a risk management process to identify, measure, monitor, manage and report the different types of risk in relation to the Company. This process is based on the principle that proper risk management acts by anticipation instead of by response. Although the Manager considers risk management primarily to be a responsibility of each of its directors and employees, an independent risk management function has been established to support them by developing and implementing policies, methodologies and tools for the identification, measurement, management, monitoring and reporting of risks, thus ensuring a consistent risk management framework. The independent Risk Management team reports periodically to the Board of Directors and the Risk Management Committee (RMC) in respect of all major risk factors related to the Company. The RMC monitors the quality, adequateness and effectiveness of the risk oversight and proposes changes if necessary.

Integrated risk management

The Manager's trading program is designed to pursue capital growth within the limits of a defined risk tolerance. Risk and portfolio management are fully integrated in the Manager's systematic investment approach, which is based on quantitative analysis of signaled price behavior. Market risk and liquidity risk are systematically controlled in the Diversified Trend Program, which contains a set of predefined risk management parameters.

Key risks

The summary of key risks is as follows:

Market risk

Market risk is the risk that the value of financial instruments fluctuates due to changes in market variables such as interest rates, foreign exchange rates, equity and commodity prices.

Market risk controls are fully embedded in the Manager's trading program and are based on internally developed measures that focus on stress scenarios. The program's risk controls entail a variety of risk concentration mitigation measures to prevent portfolio risk concentrations from growing too large. Two portfolio risks in particular are monitored and controlled. Firstly, the Manager monitors and controls the so-called 'trend risk', defined as the estimated aggregate impact of a major adverse price movement in any particular market and the coinciding adverse price effects in all markets exhibiting the same actual trend. Secondly, the Manager monitors and controls the so-called 'extreme risk', defined as the estimated aggregate impact of a major adverse price move in any particular market and the coinciding adverse price effects in correlated markets. Based on a certain confidence interval, the Manager aims to limit the impact of such an event to a predetermined level, which differs per sub-fund depending on the trading program's subset and the leverage employed and which is disclosed in the prospectus of the Company. In relation to this risk level, it is noted that one event can be followed by other events without full compensation of losses incurred as a result of the previous event. Hence, drawdowns of a sub-fund may be higher than the predetermined level disclosed in the prospectus. The portfolio's largest trend risk will typically be below the level of extreme risk.

Liquidity risk

Liquidity risk entails the risk that due to a lack of liquidity in a market it is not possible to exit a position at a fair value, within a desired amount of time. Liquidity risk controls are embedded in the Manager's trading program by means of certain pre-defined market liquidity requirements. In general, positions are entered into taking into account that liquidation of the position should be possible within three business days, although there is always a risk that this requirement will not be met under extraordinary circumstances. For purposes of this liquidity requirement, the Manager estimates the liquidity per market at least every six months. Subsequently, positions are taken based on these estimates. Whether actual liquidity differs materially from the estimated liquidity is monitored on a daily basis, and maximum positions may be lowered based on an observed decrease in liquidity. Additionally, as the sub-funds invest in margined derivative financial instruments only, the majority of a sub-funds' net asset value generally consists of cash and/or liquid interest rate securities.

With respect to the Company, liquidity risk also refers to the (im)possibility of an investor to redeem his investment from a sub-fund. From this point of view, liquidity risk of the sub-funds is also mitigated by the fact that shareholders may request redemption of their shares on a monthly basis only with a three days notice period. In addition, the prospectus of the Company allows the Manager or the Board of Directors to impose a gate if aggregate redemption requests in a certain month exceed an amount of 25% of a sub-fund's net asset value. However, even though aggregate redemption requests exceeding 25% have occurred several times in the past, such gate has never been activated. For more information about redemption conditions, we refer to the Company's current prospectus.

Counterparty risk

The Company is subject to the risk that counterparties will not be able to fulfil their obligations with respect to transactions, positions, balances or otherwise, whether due to insolvency, bankruptcy or other causes. In such case, the Company may be able to recover none or only a portion of its assets, including unrealised trading profits, held with such counterparty. In an effort to mitigate such risk, the Manager attempts to diversify the Company's exposures across a select number of counterparties, which have been selected and are monitored by the Manager on the basis of, among others, their reputation, creditworthiness, experience, quality of service, ownership and legal structure and jurisdiction. At a minimum, the Manager aims to diversify each sub-fund's assets across at least one bank and the depositary, and across two clearing brokers, which minimum has been met at all times during the reporting period. Additionally, the Manager may invest part of the sub-funds' excess cash into liquid interest rate securities if necessary for risk management purposes.

Operational risk

Operational risk is defined as the risk of loss or damage from inadequate or failed internal processes, people and systems or from external events, which also comprises the loss of reputation or deterioration of the quality of service and the risk of unnecessary costs or reduction of income. Operational risk is by its nature almost impossible to measure. Managing operational risks requires a broad awareness of risks relating to Transtrend's activities and a high level of transparency on risks and incidents. Risk Management supports this process by facilitating the implementation and maintenance of the risk management framework and is continuously involved in monitoring operational risk by anticipation (e.g. due to system-generated warnings indicating where a possible operational problem may occur) as well as by response (e.g. daily review of order execution for any irregularities and implementing corrective measures).

Conclusion

For the above listed risks, no internal risk limits in relation to the Company were breached during the reporting period. Further information on risk management is available to the shareholders at the registered office of the Manager.

Gross leverage factor

Pursuant to the AIFM directive and supplementing regulations, the actual amount of leverage applied by each sub-fund shall be measured through the gross leverage factor and the commitment leverage factor. As the Manager does not actively use any hedging or netting technique in its trading pursuant to the Diversified Trend Program, the commitment leverage factor of each sub-fund is considered equal to the gross leverage factor of the sub-fund. The gross leverage factor included in the table below is calculated in accordance with the "gross method" defined under the AIFM directive, and expresses the amount of leverage applied as the ratio of a sub-fund's investment exposure and its net asset value, whereby the investment exposure measures the aggregate underlying value of all investment positions in portfolio. In order to make sure that the leverage applied by a sub-fund according to this method is fairly presented, the effect of net cashflow resulting from subscriptions and redemptions on a sub-fund's net asset value is taken into account as soon as a sub-fund's trading positions have been adjusted accordingly.

Sub-fund	Gross Leverage Factor as at 31/12/20
MultiTrend (EUR)	46.47
OmniTrend (EUR)	36.44
OmniTrend (USD)	38.15
OmniTrend Plus	53.17

Margin-to-equity ratio

The gross leverage factor and the commitment leverage factor measure each sub-fund's leverage on the basis of the aggregate underlying value of positions in the portfolio. However, the Manager is of the opinion that such aggregate underlying value may not represent a meaningful indication of portfolio risk, especially when an active trading approach is pursued or when interest rate derivatives or spread positions are part of such portfolio, all of which is typically the case for each sub-fund. Margin-to-equity is a more commonly used risk indicator for the sub-funds' investment strategy. Due to the use of notional funds, if applicable, the margin-to-equity ratio in terms of net asset value (NAV) will differ from the margin-to-equity ratio on trading level (TL). In accordance with the Company's investment restrictions, each sub-fund will not commit more than 70% of its net asset value on aggregate as margin for financial instruments, which effectively limits the amount of each sub-fund's risk resulting from the leverage applied.

Sub-fund	Margin-to-Equity (TL) as at 31/12/20 (%)	Margin-to-Equity (NAV) as at 31/12/20 (%)
MultiTrend (EUR)	12.89%	25.78%
OmniTrend (EUR)	20.30%	20.30%
OmniTrend (USD)	20.72%	20.72%
OmniTrend Plus	19.76%	29.64%

AIFM Remuneration

General remuneration principles

The compensation of Transtrend employees is commensurate with the requirements placed upon them. Compensation generally is comprised of (i) fixed remuneration, *i.e.* a monthly salary and related pension contribution and vacation allowance, and (ii) a discretionary variable remuneration, among others dependent on the financial results of Transtrend. Variable remuneration may constitute a significant part of the total remuneration package at Transtrend. Not just because of an alleged motivating effect. Transtrend does not wish that employees just do something because they can obtain variable remuneration as a result. (Just as it also does not wish them to refrain from doing something simply because they will not receive a variable remuneration for it.) The commitment of Transtrend's employees is not driven primarily by financial considerations. Transtrend does not offer any sales-driven variable remuneration, nor does it link variable remuneration to narrowly defined personal targets or other seemingly measurable individual performance. Such variable remuneration method may result in manipulation, escape behaviour or local rather than overall optimisation. The financial interests of the employee must never conflict with the interests of the clients. However, Transtrend considers it fair that if the joint efforts of its employees result in good returns for the clients and hence generate good returns for Transtrend, employees share in these results ('alignment of interest'). Loyalty in particular is rewarded because loyal employees are not only there when things go well, but also in more difficult periods. In brief, if it goes well with Transtrend and its clients, then it may go well with its staff. However, if Transtrend's financial situation requires so, variable remuneration may be limited or nil.

Transtrend pays relatively moderate fixed salaries. In view of the salary level, there is potential for relatively high variable remuneration. This is in line with how clients pay for Transtrend's services, *i.e.* via a management fee plus performance fee. The systematic nature of the investment program, the design of the processes and controls, and the nature of the client base, mitigate the risks associated with variable remuneration at Transtrend and justify, within the limits of the remuneration regulation and principles, a relatively high ratio between variable and fixed remuneration. Specific risk mitigating measures on the award and payment of variable remuneration are described in the following paragraphs. Transtrend considers its remuneration method prudent, partly because total remuneration thus puts less pressure on Transtrend's financial solidity in less successful years.

Remuneration policy

Transtrend's remuneration policy is aligned with Transtrend's business philosophy and culture, and meets the requirements under applicable regulation on sound remuneration policies. The remuneration policy is applicable to all Transtrend employees, with certain stricter provisions for Identified Staff as explained below.

The remuneration policy is prepared by Transtrend Finance & HR in accordance with guidelines of the Managing Directors and takes into account the advice of Transtrend Compliance. After adoption by the Managing Directors, the remuneration policy is submitted to Transtrend's internal supervisor, Transtrend's Supervisory Board ('SB'), for approval. The SB moreover supervises compliance with the remuneration policy and periodically reviews its principles. The SB must be consulted in the event of proposed deviations from the policy.

Transtrend Compliance is involved in the analysis of laws and regulation relating to sound remuneration policies. At least every three years, Transtrend Risk Management conducts an analysis of the risks associated with the remuneration policy. Where necessary, the remuneration policy will be adjusted accordingly, subject to SB approval. Internal Audit regularly reviews the remuneration policy and the results thereof.

Identified Staff

Employees who, based on their duties, exercise a material influence over the risk profile of Transtrend and/or the assets under management for its clients, including senior management, risk takers and employees who hold management positions in control functions, are designated as 'Identified Staff', in line with the criteria in ESMA's 'Guidelines on sound remuneration policies under the AIFMD'. Transtrend has designated six employees as Identified Staff: the two Managing Directors and the two Executive Directors because they may exercise a material influence on the risk profile, and the Head of Risk Management and the Head of Compliance because they hold management positions in control functions.

Award process

The size and allocation of variable remuneration is determined on both quantitative and qualitative performance criteria. Transtrend applies a top-down method. First, a total variable remuneration pool is determined based on Transtrend's financial performance, which depends to a large extent on the investment results achieved for its clients. Subsequently the pool is allocated to employees on the basis of qualitative performance criteria, assessing the personal performance of the employee concerned in the widest sense, taking account of the employee's contribution to the department where he/she works and his/her contribution to Transtrend's performance as a whole. Important aspects considered in the assessment are commitment, expression of Transtrend's culture, the quality of work delivered, taking responsibility, the degree of collaboration with colleagues, the level of knowledge, growth in seniority, compliance with applicable regulations, the fair treatment of clients, the quality of services provided to clients and the contribution to Transtrend's responsible investing goals.¹ The assessment is not limited to the performance over the previous year and also takes into account the personal development over the years. This set-up of the award process safeguards that no direct link exists between the individual award of variable remuneration and Transtrend's performance.

In principle annually, Transtrend's Managing Directors determine the individual fixed and variable remuneration of the employees, while the SB determines the remuneration of the Managing Directors. The total variable compensation pool, the remuneration of Identified Staff and, if certain remuneration thresholds are exceeded, the remuneration of other individual employees, are submitted to the SB for approval.

Pay-out process

Awarded variable remuneration above a certain threshold is paid with deferral, with the excess paid in three equal instalments over a three-year period. For Identified Staff stricter

¹ Responsible investing plays an important role in Transtrend's investment process. However, Transtrend does not take into account the specific sustainability risks as defined in Regulation (EU) 2019/2088, the Sustainable Finance Disclosure Regulation (i.e. environmental, social or governance events or conditions that, if they occur, could cause an actual or a potential material negative impact on the value of the investment) in its investment process. Consequently, such sustainability risks are not taken into account in remuneration.

deferral provisions apply and the award will be for 50% in instruments (participating units in a fund managed by Transtrend pursuant to its trading program), with a one-year retention period following payment. For other employees the payment is in principle in cash.

Risk adjustment

All payments of variable remuneration are subject to clawback provisions and, where deferred payment applies, malus provisions. During the deferral period, it is assessed whether the previously allocated variable remuneration is with hindsight appropriate. Matters may emerge in the period after allocation that put the allocation in a different perspective or mean that a payment would be unacceptable in terms of reasonableness and fairness. This may be the case in situations like, amongst others, non-compliance with standards relating to competence and/or conduct that an employee of a financial services company may reasonably be expected to observe, a lack of fair treatment of clients, insufficiently acting in the clients' best interests, decisions and/or behaviour leading to a material deterioration of Transtrend's position, and/or a significant deterioration in Transtrend's financial performance. If such situations arise, malus on deferred variable remuneration may be applied and in certain cases previously paid variable remuneration can be reclaimed (a clawback of variable remuneration already paid). Given the nature of their responsibilities, Identified Staff are exposed to a higher likelihood that a malus and/or clawback will be applied. Transtrend Risk Management and Compliance are involved in the decision-making regarding risk adjustment to variable remuneration.

Quantitative disclosures pursuant to the AIFMD

1. Total amount of remuneration for the financial year paid by Transtrend to its staff, split into fixed and variable remuneration, and the number of beneficiaries:

Number of beneficiaries	Total remuneration	Fixed remuneration	Variable remuneration
67	2,506	1,378	1,128

Amounts in EUR 1,000

2. Aggregate amount of remuneration broken down by senior management and other members of staff of Transtrend whose actions have a material impact on the risk profile of the Company:

Senior management	Other staff
234	126

Amounts in EUR 1,000

The above remuneration figures show the proportion of the total remuneration paid by Transtrend to its staff, attributable to the Company, based on the time spent by staff on the management of the Company. Carried interest does not apply.

Sustainable Finance Disclosures Regulation ("SFDR")

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector and implementing legislation ("SFDR"), require the Company to make certain disclosures to investors, which are described below.

The Diversified Trend Program takes positions in futures, swaps and forwards on a variety of underlying markets, with the aim to collect market risk premia by actively participating in

the different underlying trends. The program can take long as well as short positions and focuses on the medium term – positions are generally held between two weeks and two months.

When making investment decisions, the Manager does not take into account ‘sustainability risks’ as defined in the SFDR, i.e. environmental, social or governance (ESG) events that may have a negative impact on the value of an investment. Consequently, these sustainability risks are also not taken into account in Transtrend’s remuneration policy. The Diversified Trend Program’s investment horizon plays a fundamental role here. The Manager recognizes that sustainability risks are one of the elements of market price risk of the markets traded. However, within the time horizon in which the Manager is active, this risk is almost entirely subordinated to shorter term price dynamics, which are dominated by asynchronicity in the willingness to trade – i.e. buyers and sellers not coming to the market at the same time – and psychological factors. The Diversified Trend Program is entirely geared to these price dynamics.

When making investment decisions, the Manager does not consider any adverse impact that its investment decisions may have on sustainability factors as defined in the SFDR. Given the broad investment universe across asset classes, the specific instruments traded and the short to medium term oriented trading strategy, the Manager focuses on three responsible roles in the market: 1) bear market price risk that other parties may wish to (partly) offload, 2) provide liquidity to the markets traded, enabling other parties to buy and sell more efficiently, and 3) actively contribute to the formation of fair prices, supporting the price discovery process. Aligned with these roles, the Manager strives to be actively involved in all the areas where large fundamental changes – including the transition towards a more sustainable society – may take place, as these changes form a major source of market price risk. Risk that has to be borne by active investors. Therefore, the Manager in principle includes every actively and freely traded futures contract in the Diversified Trend Program’s investment universe, provided they are effective in their function to facilitate the exchange of price risk. In certain markets where futures are not available or not actively traded, swaps or forwards are included.

The Company’s investments do not bear any voting rights, as the Diversified Trend Program’s investment universe consists of futures, swaps and forward contracts. Voting, such as on ESG related matters, is therefore not within scope. Besides, the Manager believes the long-term well-being of companies is best served when shareholders and stakeholders with a longer-term commitment to these companies set the tone. Not investors with a shorter-term investment horizon such as itself.

In terms of engagement, the Manager does engage, but primarily with exchanges, brokers, industry associations and regulators around the well-functioning of markets, for example on (proposed) rules and regulations and observed trading activity that in the Manager’s view undermines the well-functioning of markets.

In summary, the Manager aims to be a responsible investor, committed to fulfill the responsibilities that come with the investment process managed and the instruments traded. Its focus is on contributing to well-functioning, well-organized and reliable markets – an important social responsibility and an integral part of the investment philosophy and process.

Securities Financing Transactions Regulation ("SFTR")

In this section certain mandatory disclosures as set out in Article 13 of the European Commission Regulation 2015/2365 on transparency of securities financing transactions and of reuse are included.

As at 31/12/2020	Total return swaps		
Sub-fund	Gross volume open trades As a % of total net asset value	Revenue component As a % of average net assets	Expenditure component As a % of average net assets
MultiTrend (EUR)	€3,249,155 19.55%	€362,573 2.05%	€-581,254 -3.28%
OmniTrend (EUR)	€14,180,574 14.17%	€1,593,742 1.46%	€-2,582,509 -2.36%
OmniTrend (USD)	\$26,154,782 12.74%	\$3,302,763 1.10%	\$-5,298,951 -1.77%
OmniTrend Plus	€29,625,296 20.67%	€3,180,543 2.54%	€-5,305,832 -4.24%

There is no reuse of cash collateral related to total return swaps. The Company does not receive collateral. All trades open at the end of the reporting period with a total value of EUR 68,475,813 have been transacted through bilateral settlement with the sole counterparty, UBS AG, Switzerland. All transactions have an open maturity.

During the year, the Company traded only one type of total return swap, more specifically equity swap. Hence, the revenue and expenditure component described in the table above are derived solely from equity swaps. Revenue and expenditure components for the Company include interest, dividend, realized and change in unrealized P&L on total return swaps. Neither the Manager nor any third party receive any revenue component for the traded swaps.
