What is this product?

TYPE OF PRODUCT

The Fund is a sub-fund of U ACCESS, an Undertaking for Collective Investment in Transferable Securities (UCITS) incorporated as a variable capital investment company (SICAV) under the laws of Luxembourg.

TERM

The Fund is established for an unlimited duration. However the Board of Directors of the Fund may decide on its pure and simple liquidation if its net assets represent less than EUR 20 million (or equivalent value in another currency) or if the economic and/or political environment was to change or for any economic and financial reasons for which the Board of Directors considers that it is in the general best interests of shareholders to liquidate the Fund.

OBJECTIVES

The Fund seeks to grow your capital and generate income by investing primarily in a wide range of fixed income instruments (both Investment grade and High yield).

The Fund has a maturity date of 31 March 2027 unless the terms are changed before said date. Due to the maturity date, the portfolio turnover will be relatively low.

The Fund invests in products/issuers with a minimum rating of B- (S&P or Fitch), B3 (Moody's) or an equivalent rating by another rating agency.

If the rating is downgraded below B-/B3 or equivalent, the security may be kept or sold, at the Investment Manager's discretion and in the best interest of the shareholders.

The Fund is allowed to invest in other currencies than its base currency (EUR). The currency risk against EUR will be largely hedged.

The Fund is not managed in reference to a benchmark.

The Fund may invest its net assets up to:

- 70% in High yield
- 60% in Emerging countries

The Fund may be exposed to High yield credit via the use of CDS (Credit Default Swap) and may use derivatives instruments such as but not limited to CDS, FX forward, interest rate swaps and futures.

High yield bonds are issued by entities whose activity is more sensitive to the economic cycle and pay higher interest. The return on such securities, in the same way as their level of risk, is therefore higher than traditional bond products.

Exposure to high yield bonds is implemented via cleared and diversified high yield CDS indices. CDS indices offer a liquid exposure to high yield and bear minimal interest rate risk.

The Fund's base currency is EUR.

The recommended holding period is determined to allow sufficient time for this product to reach its objectives and provide a consistent return less dependent on market fluctuations. Nevertheless, such return is not guaranteed.

The return of the product is determined using the Net Asset Value (NAV) calculated by the Administrative Agent. This return depends mainly on the market value fluctuations of the underlying investments.

Any income received by the Fund is reinvested (capitalisation share).

INTENDED RETAIL INVESTORS

The Fund is suitable for retail investors with limited knowledge of the underlying financial instruments and no financial industry experience. The Fund is compatible with investors who may bear capital losses and who do not need capital guarantee. The Fund is compatible with clients who wish to hold their investment over 3 years.

In the event of insolvency of the Depositary, the Fund may suffer a financial loss.

In the event of insolvency of the product manufacturer, the Fund's assets will not be affected.
