High Grade CHF Income (the sub-fund)

is a sub-fund of UBAM (CH) (the Fund)

Class A (the class) (ISIN: CH0271453414)

Fund management company: GERIFONDS SA, a company of the Banque Cantonale Vaudoise (BCV) group

Objectives and investment policy

- The sub-fund aims to generate stable yields in Swiss francs by investing directly and/or indirectly in Swiss and international bond markets, mainly investment grade.
- The sub-fund is actively managed in order to benefit from all yield opportunities presented.
- The sub-fund's assets are exposed to bond markets directly or through the use of derivative financial instruments. Priority is given to investment grade securities.
- For direct investments, currency risks are hedged against the sub-fund's base currency.
- Investors may request to redeem their units every bank business day, unless the price of the positions held by the sub-fund is unavailable (closed market).
- The class distributes its net income once a year.
- The class supports its own transaction costs which are deducted from the yield.
- The class is open to all investors.

- The risk category represents the annual historical volatility over a period of 5 years.
- Historical data, such as the data used to calculate the synthetic risk indicator, may not be a reliable indicator of the future risk profile of the class.
- The risk category shown is not a target or a guarantee and may change over time.
- The lowest risk category does not mean a risk-free investment.
- The sub-fund is exposed, directly and/or indirectly, to debt securities of public or private issuers around the world, which explains the allocation of this risk category.

- The sub-fund offers no guarantee or protection of capital.
- The class is also exposed to the following risks that are not taken into account by the synthetic risk indicator:
- Credit risk: The sub-fund invests in bonds; issuers may not be able to fully repay the loan.
 - Liquidity risk: A market's possible inability to absorb given trading volumes, thus affecting the purchase and sales of positions held by the sub-fund.
 - Counterparty risk: When a third party (borrower or structure) is not able to meet its obligations to the sub-fund, which may adversely affect the value.
 - Operational risk: Arises when inadequate or defective internal processes negatively impact the value of the sub-fund.
 - Risks linked to derivative financial instruments: Their value is dependent of that of an underlying asset. A marginal change in the price of the underlying asset may cause a significant change in their price.
