Features of the Fund

UBS (Lux) Money Market Fund (hereinafter called the "Fund") offers investors a range of different subfunds ("umbrella structure") which invest in accordance with the investment policy described in the sales prospectus. The sales prospectus contains specific details on each subfund and will be updated each time a new subfund is issued.

UBS (Lux) Money Market Fund is subject to Part I of the amended Law of 2010 as an open-ended investment fund without legally independent status in the form of a collective investment fund (fonds commun de placement, FCP). It was originally established under the name UBS (Lux) Money Market Invest in compliance with the Management Regulations approved by the Board of Directors of UBS Money Market Fund Management Company S.A. (formerly UBS Money Market Invest Management Company S.A.) on 20 October 1988.

The activities of UBS Money Market Fund Management Company S.A. in its function as Management Company of UBS (Lux) Money Market Fund ended on 14 September 2010. On 15 September 2010, UBS Fund Management (Luxembourg) S.A. assumed the function of Management Company.

The Management Regulations were initially published by way of a notice of deposit on 19 November 1988 and most recently in the "Recueil Electronique des Sociétés et Associations" ("RESA") in June 2022. The Fund's Management Regulations may be amended, subject to compliance with applicable law. Any amendments thereto shall be notified by way of a notice of deposit in RESA, as well as by any other means described below in the section entitled "Regular reports and publications". The new Management Regulations shall enter into force on the date of their signature by the Management Company and the Depositary. The consolidated version may be consulted at the Trade and Companies Register (Registre de Commerce et des Sociétés).

The Fund has no legal personality as an investment fund. The entire assets of each subfund are the undivided property of all investors who have equal rights in proportion to the number of units which they hold. These assets are separate from the assets of the Management Company. The Fund's assets are managed by the Management Company as separate trust assets in the interest and for the account of the unitholders.

The Management Regulations give the Management Company the authority to establish different subfunds for the Fund as well as different unit classes with specific characteristics within these subfunds. The sales prospectus will be updated each time a new subfund or an additional unit class is issued.

The subfunds are money market funds as defined by Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds.

As at 30 April 2024, the following subfunds are active:

Additional characteristics:

Currencies

The unit classes may be denominated in AUD, BRL, CAD, CHF, CZK, DKK, EUR, GBP, HKD, JPY, NOK, NZD, PLN, RUB, SEK, SGD, USD or ZAR. For unit classes issued in the currency of account of the subfund, this currency will not be included in the unit class name. The currency of account features in the name of the relevant subfund.

"hedged"

For unit classes with "hedged" in their name and with reference currencies different to the subfund's currency of account ("unit classes in foreign currencies"), the risk of fluctuations in the value of the reference currency is hedged against the subfund's currency of account. This hedging shall be between 95% and 105% of the total net assets of the unit class in foreign currency.

Changes in the market value of the portfolio, as well as subscriptions and redemptions of unit classes in foreign currencies, can result in the hedging temporarily surpassing the aforementioned range. The Management Company and the Portfolio Manager will take all necessary steps to bring the hedging back within the aforementioned limits. The hedging described has no effect on possible currency risks resulting from investments denominated in a currency other than the subfund's currency of account.

"BRL hedged"

The Brazilian real (ISO 4217 currency code: BRL) may be subject to exchange control regulations and repatriation limits set by the Brazilian government. Prior to investing in BRL classes, investors should also bear in mind that the availability and tradability of BRL classes, and the conditions under which they may be available or traded, depend to a large extent on the political and regulatory developments in Brazil. The risk of fluctuations is hedged as described above under "hedged". Potential investors should be aware of the risks of reinvestment, which could arise if the BRL class has to be liquidated early due to political and/or regulatory circumstances. This does not apply to the risk associated with reinvestment due to liquidation of a unit class and/or the subfund in accordance with the section "Liquidation and merger of the Fund and its subfunds or unit classes".

"acc"

The income of unit classes with "-acc" in their name is not distributed unless the Management Company decides otherwise.

"dist"

The income of unit classes with "-dist" in their name is distributed unless the Management Company decides otherwise.

"qdist"

Units in classes with "-qdist" in their name may make quarterly distributions, gross of fees and expenses. Distributions may also be made out of the capital (this may include, inter alia, realised and unrealised net gains in net asset value) ("capital"). Distributions out of capital result in the reduction of an investor's original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per unit of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore prefer to subscribe to accumulating (-acc) rather than distributing (-dist, -qdist) unit classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) unit classes compared with distributing (-dist) unit classes. Investors should consult qualified experts for tax advice regarding their individual situation.

"mdist"

Units in classes with "-mdist" in their name may make monthly distributions, gross of fees and expenses. Distributions may also be made out of capital. Distributions out of capital result in the reduction of an investor's original capital invested in the subfund. Furthermore, any distributions from the income and/or involving the capital result in an immediate reduction of the net asset value per unit of the subfund. Investors in certain countries may be subject to higher tax rates on distributed capital than on any capital gains from the sale of fund units. Some investors may therefore prefer to subscribe to accumulating (-acc) rather than distributing (-dist, -mdist) unit classes. Investors may be taxed at a later point in time on income and capital arising on accumulating (-acc) unit classes compared with distributing (-dist) unit classes. Investors should consult qualified experts for tax advice regarding their individual situation.

"UKdist"

The aforementioned unit classes can be issued as those with "UKdist" in their name. In these cases, the Management Company intends to distribute a sum which corresponds to 100% of the reportable income within the meaning of the UK reporting fund rules when the unit classes are subject to these reporting fund rules. The Management Company does not intend to make taxable values for these unit classes available in other countries, as they are intended for investors whose investment in the unit class is liable to tax in the UK.

"seeding"

Units with "seeding" in their name are only offered during a limited time period. Further subscriptions are prohibited after the end of this period, unless otherwise decided by the Management Company. However, units can still be redeemed in accordance with the conditions for unit redemptions. Unless otherwise decided by the Management Company, the smallest tradeable unit, the initial issue price and the minimum subscription amount shall correspond to the characteristics of the unit classes listed above.

The Fund is subject to no restrictions with regard to the size of its net assets, the number of units, number of subfunds and unit classes and duration of the Fund and its subfunds.

The Fund forms a legal entity. With respect to the unitholders, each subfund is regarded as being separate from the others. The assets of a subfund can only be used to offset the liabilities which the subfund concerned has assumed.

Notes to the Financial Statements

Note 1 – Summary of significant accounting policies

The financial statements have been prepared in accordance with the generally accepted accounting principles for investment fund in Luxembourg. The significant accounting policies are summarised as follows:

a) Calculation of the net asset value

The net asset value and the issue, redemption and conversion price per unit of each subfund or unit class are expressed in the reference currencies of the respective subfund or unit class, and are calculated each business day by dividing the overall net assets of the subfund attributable to each unit class by the number of outstanding units in this unit class of the subfund. The net asset value is published on each business day in the public section of the website for each subfund. However, the net asset value of a unit may also be calculated on days where no units are issued or redeemed, as described in the following section. The net asset value calculated on days when no units are issued may be published in the public section of the website for each subfund, but it may only be used for the purpose of calculating performance, statistics or fees. Under no circumstances should it be used as a basis for subscription and redemption orders.

A "business day" is a normal bank business day in Luxembourg (i.e. a day when the banks are open during normal business hours), except for 2 January, 24 and 31 December; individual, non-statutory days of rest in Luxembourg and Switzerland; and/ or customary holidays in countries with stock exchanges and markets used to value over half of the subfund's net assets.

"Non-statutory days of rest" are days on which banks and financial institutions are closed.

The percentage of the net asset value attributable to each unit class of a subfund changes each time units are issued or redeemed. It is determined by the ratio of the units issued in each class in relation to the total number of subfund units issued, taking into account the fees charged to that unit class.

b) Valuation principles

- Derivatives and other assets listed on a stock exchange are valued at the most recent market prices available. If these derivatives or other assets are listed on several stock exchanges, the most recently available price on the stock exchange that represents the major market for this asset will apply.
 - In the case of derivatives and other investments not commonly traded on a stock exchange and for which a secondary market among securities traders exists with pricing in line with the market, the Management Company may value these derivatives and other investments based on these prices. Derivatives and other investments not listed on a stock exchange, but traded on another regulated market which operates regularly and is recognised and open to the public, are valued at the last available price on this market.
- Assets not listed on a stock exchange or traded on another regulated market, and for which no appropriate price can be obtained, are valued by the Management Company

- according to other principles chosen by it in good faith on the basis of the likely sales prices. These principles shall always be in line with the MMFs Regulation.
- Derivatives not listed on a stock exchange (OTC derivatives) are valued on the basis of independent pricing sources.
 If only one independent pricing source is available for a derivative, the plausibility of the valuation obtained will be verified using calculation methods that are recognised by the Management Company and the Fund's auditors, based on the market value of that derivative's underlying. This valuation is determined by decision of the Management Company on the basis of valuations made by the valuation experts of the Management Company with support from the valuation experts of the UBS Valuation Committee. The principles used in this process shall always be in line with the MMFs Regulation.
- Units of other money market funds are valued based on the most recent net asset value. Certain units or shares of other money market funds may be valued based on estimates of their value from reliable service providers that are independent from the target fund portfolio manager or investment adviser (value estimation).
- Money market instruments not traded on a stock exchange or on another regulated market open to the public will be valued on the basis of the relevant curves. Curve-based valuations are calculated from interest rates and credit spreads. The following principles are applied in this process: for each money market instrument, the interest rates nearest the residual maturity are interpolated. The interest rate calculated in this way is converted into a market price by adding a credit spread that reflects the underlying borrower. This credit spread is adjusted if there is a significant change in the credit rating of the borrower. Interest income earned by a subfund between a given order date and the corresponding settlement date is accounted for when that subfund's assets are valued. The asset value per unit on a given valuation date therefore includes projected interest income.
- Money-market instruments, derivatives and other investments denominated in a currency other than the relevant subfund's reference currency and not hedged by foreign exchange transactions, are valued using the average exchange rate (between the bid and ask prices) known in Luxembourg or, if none is available, using the rate on the most representative market for that currency.
- Term and fiduciary deposits are valued at their nominal value plus accumulated interest.
- The value of swaps is calculated by an external service provider and a second independent valuation is provided by another external service provider. The calculation is based on the net present value of all cash flows, both inflows and outflows. In some specific cases, internal calculations (based on models and market data made available by Bloomberg), and/or broker statement valuations may be used. The valuation methods depends on the instrument in question and is chosen pursuant to the applicable UBS valuation policy.

The Management Company is authorised to apply other generally recognised and verifiable valuation criteria in good faith in order to achieve an appropriate valuation of the net assets if, due to extraordinary circumstances, a valuation in accordance with the aforementioned regulations proves to be unfeasible or inaccurate.

In extraordinary circumstances, additional valuations can be carried out over the course of the day. These new valuations will then be authoritative for subsequent issues and redemptions of units.

Due to fees and charges as well as the buy-sell spreads for the underlying investments, the actual costs of buying and selling assets and investments for a subfund may differ from the last available price or, if applicable, the net asset value used to calculate the net asset value per unit. These costs have a negative impact on the value of a subfund and are termed "dilution". To reduce the effects of dilution, the Board of Directors may at its own discretion make a dilution adjustment to the net asset value per unit (swing pricing).

Units are issued and redeemed based on a single price: the net asset value per unit. To reduce the effects of dilution, the net asset value per unit is nevertheless adjusted on valuation days as described below; this takes place irrespective of whether the subfund is in a net subscription or net redemption position on the relevant valuation day. If no trading is taking place in a subfund or class of a subfund on a particular valuation day, the unadjusted net asset value per unit is applied. The Board of Directors has discretion to decide under which circumstances such a dilution adjustment should be made. The requirement to carry out a dilution adjustment generally depends on the scale of subscriptions or redemptions of units in the relevant subfund. The Board of Directors may apply a dilution adjustment if, in its view, the existing unitholders (in the case of subscriptions) or remaining unitholders (in the case of redemptions) could otherwise be put at a disadvantage. The dilution adjustment may take place if:

- (a) a subfund records a steady fall (i.e. a net outflow due to redemptions);
- (b) a subfund records a considerable volume of net subscriptions relative to its size;
- (c) a subfund shows a net subscription or net redemption position on a particular valuation day; or
- (d) In all other cases in which the Board of Directors believes a dilution adjustment is necessary in the interests of the unitholders.

When a valuation adjustment is made, a value is added to or deducted from the net asset value per unit depending on whether the subfund is in a net subscription or net redemption position; the extent of the valuation adjustment shall, in the opinion of the Board of Directors, adequately cover the fees and charges as well as the buy-sell spreads. In particular, the net asset value of the respective subfund will be adjusted (upwards or downwards) by an amount that (i) reflects the estimated tax expenses, (ii) the trading costs that may be incurred by the subfund, and (iii) the estimated bid-ask spread for the assets in which the subfund invests. As some equity markets and countries may show different fee structures on the buyer and seller side, the adjustment for net inflows and outflows may vary. Generally speaking, adjustments shall be limited to a maximum of 1% of the relevant applicable net asset value per unit. Under exceptional circumstances (e.g. high market volatility and/or illiquidity, extraordinary market conditions, market disruptions etc.), the Board of Directors may decide to apply temporarily a dilution adjustment

of more than 1% of the relevant applicable net asset value per unit in relation to each subfund and/or valuation date, provided that the Board of Directors is able to justify that this is representative of prevailing market conditions and is in the unitholders' best interest. This dilution adjustment shall be calculated according to the procedure specified by the Board of Directors. Unitholders shall be informed through the normal channels whenever temporary measures are introduced and once the temporary measures have ended.

The net asset value of each class of the subfund is calculated separately. However, dilution adjustments affect the net asset value of each class to the same degree in percentage terms. The dilution adjustment is made at subfund level and relates to capital activity, but not to the specific circumstances of each individual investor transaction.

As of 30 April 2024 the Swing Pricing methodology was not implemented.

The aforementioned flat fee shall be used as follows:

1. For the management, administration, portfolio management and distribution of the Fund (if applicable), as well as for all the tasks of the Depositary, such as the safekeeping and supervision of the Fund's assets, the handling of payment transactions and all other tasks listed in the section entitled "Depositary and Main Paying Agent" of the sales prospectus, a maximum flat fee based on the net asset value of the Fund. This fee is charged to the Fund's assets on a pro rata basis upon every calculation of the net asset value and is paid on a monthly basis (maximum flat fee). The maximum flat fee for unit classes with "hedged" in their name may contain fees for hedging currency risk. The relevant maximum flat fee will not be charged until the corresponding unit classes have been launched. An overview of the maximum flat fees can be seen in the section entitled "Investment objective and investment policy of the subfunds" of the sales prospectus.

This fee is shown in the Statement of Operations as "Flat fee".

- The maximum flat fee does not include the following fees and additional expenses, which are also charged to the Fund:
 - a) all additional expenses related to management of the Fund's assets for the sale and purchase of assets (bid/ offer spread, brokerage fees in line with the market, commissions, fees, etc.). These expenses are generally calculated upon the purchase or sale of the respective assets. In derogation hereto, these additional expenses, which arise through the sale and purchase of assets in connection with the settlement of the issue and redemption of units, are covered by the application of the Swing Pricing principle pursuant to the section entitled "Net asset value, issue, redemption and conversion price" of the sales prospectus;
 - b) fees of the supervisory authority for the establishment, modification, liquidation and merger of the Fund, as well as all fees of the supervisory authorities and any stock exchanges on which the subfunds are listed;
 - auditor's fees for the annual audit and certification in connection with the establishment, modification, liquidation and merger of the Fund, as well as any other fees paid to the auditor for the services it provides in relation to the administration of the Fund and as permissible by law;
 - d) fees for legal and tax advisers, as well as notaries, in connection with the establishment, registration in distribution countries, modification, liquidation and merger of the Fund, as well as for the general safeguarding of the interests of the Fund and its investors, insofar as this is not expressly prohibited by law;

- e) costs for the publication of the Fund's net asset value and all costs for notices to investors, including translation costs:
- f) costs for the Fund's legal documents (prospectuses, KID, annual and semi-annual reports, as well as all other documents legally required in the countries of domiciliation and distribution);
- g) costs for the Fund's registration with any foreign supervisory authorities, if applicable, including fees, translation costs and fees for the foreign representative or paying agent;
- h) expenses incurred through use of voting or creditors' rights by the Fund, including fees for external advisers;
- costs and fees related to any intellectual property registered in the Fund's name or usufructuary rights of the Fund:
- j) all expenses arising in connection with any extraordinary measures taken by the Management Company, Portfolio Manager or Depositary for protecting the interests of the investors;
- k) if the Management Company participates in classaction suits in the interests of investors, it may charge the Fund's assets for the expenses arising in connection with third parties (e.g. legal and Depositary costs). Furthermore, the Management Company may charge for all administrative costs, provided these are verifiable and disclosed, and taken into account in the disclosure of the Fund's total expense ratio (TER).

These commissions and fees are shown in the Statement of Operations as "Other commissions and fees".

3. The Management Company may pay retrocessions in order to cover the distribution activities of the Fund.

All taxes levied on the income and assets of the Fund, particularly the taxe d'abonnement, will also be borne by the Fund.

For purposes of general comparability with fee rules of different fund providers that do not have a flat fee, the term "maximum management fee" is set at 80% of the flat fee.

For unit class "I-B", a fee is charged to cover the costs of fund administration (comprising the costs of the Management Company, the administrative agent and the Depositary). The costs for asset management and distribution are charged outside of the Fund under a separate contract concluded directly between the investor and UBS Asset Management Switzerland AG or one of its authorised representatives.

Costs relating to the services performed for unit classes I-X, K-X and U-X for asset management, fund administration (comprising the costs of the Management Company, the administrative agent and the Depositary) and distribution are covered by the compensation to which UBS Asset Management Switzerland AG is entitled under a separate contract with the investor.

Costs relating to the asset management services to be provided for unit classes "K-B" are covered by the compensation to which UBS Asset Management Switzerland AG or one of its authorised distributors is entitled under a separate agreement with the investor.

All costs which can be allocated to individual subfunds will be charged to these subfunds. Costs which can be allocated to unit classes will be charged to these unit classes. If costs pertain to several or all subfunds/unit classes, however, these costs will be charged to the subfunds/unit classes concerned in proportion to their relative net asset values.

With regard to subfunds that may invest in other existing money market funds under the terms of their investment policies, fees may be incurred both at the level of the subfund as well as at the level of the relevant target fund. The management fees of the target fund in which the assets of the subfund are invested may amount to a maximum of 3%, taking into account any trailer fees.

Should a subfund invest in units of funds that are managed directly or by delegation by the Management Company itself or by another company linked to the Management Company through common management or control or through a substantial direct or indirect holding, no issue or redemption charges may be charged to the investing subfund in connection with these target fund units.

Details of the Company's ongoing costs (or ongoing charges) can be found in the KIDs.

Note 3 – Taxe d'abonnement

The Fund is subject to Luxembourg legislation. In accordance with current legislation in the Grand Duchy of Luxembourg, the Fund is not subject to any Luxembourg withholding, income, capital-gains or wealth taxes. However, each subfund is subject to the Grand Duchy of Luxembourg's "taxe d'abonnement" at a reduced rate of 0.01% p.a. on total net assets, which is payable at the end of every quarter. This tax is calculated on the total net assets of each subfund at the end of every quarter.

Note 4 – Income Distribution

In accordance with article 10 of the Management Regulations, once the annual accounts are closed the Management Company will decide whether and to what extent distributions are to be paid out by each subfund and class of unit. Distributions may not be so large as to cause the net assets of the Fund to fall below the minimum fund assets laid down by the provisions of the law. If distributions are made, they will be paid out within four months of the end of the financial year.

The Management Company is authorized to pay interim dividends and to suspend the payment of distributions.

An income equalisation amount will be calculated so that the distribution corresponds to the actual income entitlement.

Note 5 – Soft commission arrangements

During the period from 1 November 2023 until 30 April 2024, no "soft commission arrangements" were entered into on behalf of UBS (Lux) Money Market Fund and "soft commission arrangements" amount to nil.

Note 6 – Total Expense Ratio (TER)

This ratio was calculated in accordance with the Asset Management Association Switzerland (AMAS) "Guidelines on the calculation and disclosure of the TER" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

Note 8 – Subsequent event

There were no events after the period-end that require adjustment to or disclosure in the Financial Statements.

Note 9 – Applicable law, place of performance and authoritative language

The Luxembourg District Court is the place of performance for all legal disputes between the unitholders, the Management Company and the Depositary. Luxembourg law applies. However, in matters concerning the claims of investors from other countries, the Management Company and/or the Depositary can elect to make themselves and the Fund subject to the jurisdiction of the countries in which the Fund units were bought and sold.

The English version of these financial statements is the authoritative version. However, in the case of units sold to investors from the other countries in which Fund units can be bought and sold, the Management Company and the Depositary may recognize approved translations (i.e. approved by the Management Company and the Depositary) into the languages concerned as binding upon themselves and the Fund.
