a sub-fund of Vontobel Fund

This fund is managed by Vontobel Asset Management S.A., which is part of Vontobel Group.

This fund is authorised in Luxembourg and regulated by the Commission de Surveillance du Secteur Financier (CSSF).

Objectives and investment policy

This actively managed sub-fund aims to achieve attractive investment return in USD. The Sub-Fund invests at least 5% of its net assets in sustainable investments by investing in securities of issuers that provide solutions to environmental and social challenges, namely to at least one of the actionable themes: climate change mitigation, responsible use of natural resources, addressing basic needs, empowerment. It is categorized as Article 8 SFDR. More details can be found in the prospectus.

- The Sub-Fund's investments shall be made in bonds with a minimum of 90% in the rating range of investment grade. Investment instruments do not have necessarily to have any or any specific rating.
- Up to 33% of the Sub-Fund's assets may be exposed to other asset classes, other countries and regions and other instruments such as other securities including equities (including real estate investment trusts), money market instruments and bank deposits to achieve the investment objective and/or for liquidity management, outside the aforementioned investment universe. In total it may invest up to 10% of its net assets in high yield bonds, 20% in contingent convertible bonds (CoCo Bonds), 25% in convertible bonds and warrants, 10% in distressed securities and up to 20% in asset-backed and mortgage-backed securities. It may also hold up to 20% of its net assets in bank deposits at sight.
- The Sub-Fund may use derivatives to achieve the investment objective and for hedging purposes. Currency and credit risks may be actively managed through the use of derivative financial instruments.
- The currency of this class is continually hedged against the Sub-

Fund's main currency. This hedging does not necessarily cover all currency risks. It entails costs which in turn reduce the share class' return.

- The sub-fund is not managed with reference to a benchmark. The portfolio manager has full investment discretion within the predefined investment limits.
- Any income generated will be reinvested and included in the value of your shares.
- Buying and selling securities entails transaction costs payable in addition to the charges listed.
- Redemption of shares: daily when banks in Luxembourg are open for normal business (see prospectus for details and exceptions).
- HN (hedged) shares may only be subscribed by investors who are prohibited from accepting and retaining inducements from third parties and by investors with separate fee agreements for the provision of discretionary portfolio management services, independent advice services or non-independent advice, if they have agreed to not accept and retain inducements from third parties.
- Other information: The weighted average sustainability rating of the portfolio will apply a minimum ESG rating which will be determined based on the Sub-Fund's Benchmark's (J.P. Morgan EM Blended (JEMB) Hard Currency Credit 50-50 (EMBI GD/CEMBI BD) Investment Grade) ESG rating. This minimum will have to be at least 75% of the Sub-Fund's Benchmark's ESG rating. Please refer to the Sub-Fund's website <http://am.vontobel.com/view/VFEMIG#documents> for sustainability-related information.

Risk and reward profile

The indicator above does not signal the risk of a potential loss, but indicates the fluctuations in the sub-fund's share price in the past.

- The share class is assigned to this category because its share price can fluctuate sharply due to the investment policy applied.
- The historical data used to calculate the profile cannot be used as a reliable guide to the future risk profile of the sub-fund.
- The risk category shown is not guaranteed and may change.
- Even the lowest risk category is not entirely free of risk.

When assigning a sub-fund's share class to a risk category, it may be the case that not all risks are taken into account. Such risks include risks in connection with exceptional market events, operational errors, legal and political events. You can find a detailed list of the risks in the "Notice regarding special risks" section in the general part of the sales

prospectus. The following risks have no direct influence on this category, but may still be important:

- Securities with a lower credit quality means a higher risk that an issuer may fail to meet its obligations. The investment value may fall if an issuer's credit rating is downgraded.
- Using derivatives generally creates leverage and entails valuation risks and operational risks. Leverage magnifies gains but also losses. Over-the-counter derivatives involve corresponding counterparty risks.
- Asset-backed and mortgage-backed securities and their underlying receivables are often non-transparent. The sub-fund may also be subject to a higher credit and/or prepayment risk.
- CoCo-Bonds may entail significant risks such as coupon cancellation risk, capital structure inversion risk, call extension risk.
- Distressed securities have a high credit and liquidity risk as well as a potential restructuring and litigation risk. In the worst case, a total loss may result.
- Investments in emerging markets entail increased liquidity risks and operational risks as these markets tend to be underdeveloped and more exposed to political, legal, tax and foreign exchange control risks.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs for managing, marketing and distributing it. These charges reduce the return on your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.30%
Conversion fee	1.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	0.85%

Past performance

The chart shows past performance based on full calendar years. One-off charges are not included when calculating performance.

- Past performance is not an indicator of current or future returns.
- The stated performance of the share class includes ongoing charges, but excludes one-off charges.
- Shares were first issued for this share class in 2022.
- The sub-fund uses the benchmark J.P. Morgan EM Blended (JEMB) Hard Currency Credit 50-50 (EMBI GD/CEMBI BD) Investment Grade for performance comparison only.
- Past performance of the fund is shown in the currency of the share class (EUR).

The one-off charges shown are maximum figures. In some cases, you might pay less – you can find this out from your financial advisor.

The figure for ongoing charges is an estimate as insufficient data is available for this share class. This may be due to its recent launch or due to a change in its underlying fee rates. The fund's financial statements will include details on the cost calculations. It does not include:

- The fund's transaction costs except for those paid by the fund when buying or selling shares of other collective investment schemes.

You can find more information on costs in the "Fees and expenses" section of the general part of the sales prospectus, available at www.vontobel.com/AM.
