Additional information for investors in the Federal Republic of Germany

This addendum forms part of, and should be read in conjunction with the Prospectus of WELLINGTON MANAGEMENT FUNDS (IRELAND) PLC (the “Company”) dated June 9, 2023 and may not be used separately. All capitalised herein contained shall have the same meaning in this Additional Information document as in the Prospectus, unless otherwise indicated.

The Company is an umbrella type open ended investment company with variable capital and segregated liability between Funds and qualifies and is authorised by the Central Bank of Ireland as UCITS for the purposes of the regulations.

Facilities according to Art. 92(1) a) of the Directive 2009/65/EC (as amended by the Directive (EU) 2019/1160) are available from:

State Street Fund Services (Ireland) Limited
78 Sir John Rogerson’s Quay
Dublin 2
Ireland
Email: WellingtonGlobalTA@statestreet.com

State Street Fund Services (Ireland) Limited is responsible for processing subscription, repurchase and redemption orders and making payments to shareholders.

The following facilities according to Art. 92(1) b) to e) of the Directive 2009/65/EC (as amended by the Directive (EU) 2019/1160) are available from www.eifs.lu/wellingtonmanagementfunds:

- information on how orders (subscription, repurchase and redemption) can be made and how repurchase and redemption proceeds are paid;
- information and access to procedures and arrangements related to investors’ rights and complaints handling;
- information in relation to the tasks performed by the facilities in a durable medium;
- the latest sales prospectus, the articles of association, the annual and semi-annual reports, as well as the key investor information documents.

The issue and redemption as well as all conversion prices are published on www.fundinfo.com.

Any notices to the Shareholders will be sent to the Shareholders in Germany via letter or e-mail as requested by the Shareholder in their account opening agreement. According to §298 (2) of the Investment Code (KAGB), the notices to the Shareholders will additionally be published in Germany in the Federal Gazette (www.bundesanzeiger.de) in the following cases:

- suspension of the redemptions of the shares,
- termination of the Management Company or its liquidation,
- any amendments to the Articles of Association which are inconstant with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- merger of the Company with one or more other funds and,
- the change of the Company into a Feeder Fund or the modification of a Master Fund.

Additional information for investors in Switzerland

BNP PARIBAS, Paris, Zurich branch, Selnaustrasse 16, CH-8002, Zürich, Switzerland, is the Swiss Representative and Paying Agent. The Prospectus, the Key Investor Information Documents, Articles of Association as well as the Company’s annual and semi-annual reports may be obtained free of charge from BNP Paribas. Publications concerning the Company are made in Switzerland on the recognised electronic platform www.swissfunddata.ch.

The Company and its agent may pay retrocessions as remuneration for distribution activity in respect of Fund shares in or from Switzerland. Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors. On request, the recipients of retrocessions must disclose the amounts they actually receive for distributing the collective investment schemes of the investors concerned. In the case of distribution activity in and from Switzerland, the Investment Managers and their agents may, upon request, pay rebates directly to investors. The purpose of rebates is to reduce the fees or costs incurred by the investor in question. At the request of the investor, the Investment Manager must disclose the amounts of such rebates free of charge.

In respect of the shares distributed in or from Switzerland, the place of performance and jurisdiction is the registered office of the Representative in Switzerland.

Wellington Management Funds (Ireland) plc

General information

Background to the Company

Wellington Management Funds (Ireland) plc, (the "Company"), is an umbrella type open ended investment company with variable capital and segregated liability between Funds incorporated under the laws of Ireland on June 25, 1997 as a public company pursuant to the Companies Act 2014. As of December 22, 1998, the Company has been authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the provisions of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "UCITS Regulations").

Calculation of net asset value of shares

The net asset value of the classes of shares of each Fund is expressed in the currency of denomination as laid out in the Investment Manager's report for each Fund. The net asset value of the classes of shares of each Fund is calculated at the valuation point for that Fund for the relevant Dealing Day.

The Dealing Day for each Fund is normally every Business Day. Notwithstanding this, some Business Days will be Non-Dealing Days for certain Funds where, for example, a substantial amount of a Fund's portfolio is traded in markets which are closed. A list outlining the expected Dealing Days for the Fund throughout the year is available in the Literature section <https://www.wellington.com/en-gb/institutional/other-literature>.

Some Funds are weekly dealing and the typical weekly Dealing Days for these Funds are as follows: The Dealing Day for Wellington Emerging Markets Local Equity Fund and Wellington Durable Companies Fund is Wednesday. The Dealing Day for Wellington Emerging Markets Opportunities Fund is Tuesday. However, please refer to the Holiday and Dealing Day Calendar, (as above), which contains a list of the actual dates of the weekly Dealing Days for these Funds. Dealing Days may be amended from time to time as determined by the Directors.

Business Day means every day that US Federal banks, the New York Stock Exchange and Hong Kong banks and exchanges are open for business except for:

- a) Easter Monday;
- b) May 1st;
- c) the weekday prior to and following Christmas Day as observed by the New York Stock Exchange; and
- d) such other days as the Directors may from time to time determine.

Frequency of dividend payments

Dividends will generally be declared on or about the last Business Day of the relevant dividend frequency period for the relevant distributing share class as noted in the table below. Dividends will generally be paid within seven days of the declaration date for distributing share classes only.

Shareholders can elect to reinvest dividend proceeds into additional shares of the same class or will receive dividend payments in cash by way of wire transfer or otherwise in accordance with the terms of the Account Opening Agreement and the investor guide.

The below table outlines the frequency within which the dividends will be paid.

<i>Fund Name</i>	<i>Dividend Frequency</i>

The invasion of Ukraine by Russia

The invasion of Ukraine by Russia which began on February 24, 2022 has increased valuation, liquidity and market risk for securities issued by Ukraine, Belarus and Russia, and to a lesser extent, most global markets. As of the date of this report the resolution of this event, and the potential impact on the Funds, continues to be uncertain. Management continues to monitor developments that may impact financial markets including sanctions, actions by governments and developments of the crisis. Management will further assess the impact on the Company's portfolio operations and valuation and will take any actions needed, as facts and circumstances are subject to change and may be specific to investment strategies and jurisdictions. The fair value of the securities issued by companies in Russia, Ukraine or Belarus has since been significantly reduced through a combination of divestiture and valuation changes.

Significant events during the financial period

Changes to the Prospectus

- i) The following notable changes to the Supplement became effective January 1, 2023:
 - Inclusion in the Prospectus of new pre-contractual templates detailing sustainability-related aspects of the Funds and any taxonomy-related information for the Funds under Article 8 or Article 9, in order to comply with SFDR Level II information. In addition, the do no significant harm test which is applied to Sustainable Investments made by the Funds will now take into account each of the mandatory corporate and/or sovereign Principal Adverse Impacts under SFDR. This may result in divestment from certain holdings which no longer meet the new do no significant harm assessment.
 - The payment of the investment management fees paid to the relevant Investment Manager for all Funds will change from quarterly to monthly in arrears.
- ii) The following notable changes to the Supplement became effective June 9, 2023:
 - The disclosures of the Wellington Global Impact Bond Fund in the Investment Policies section and the pre-contractual disclosure section relating to the ESG objectives have been amended to reflect the addition of a net zero commitment.

Changes to the Umbrella structure

The Wellington Pan European Small Cap Equity Fund terminated on May 31, 2023.

Changes to share classes

Details of share class launches and closures during the financial period ended June 30, 2023 are listed in the relevant Investment Manager's report.

Significant events since the financial period end

Significant Changes to the Funds' Management

Effective July 1, 2023 the Investment Manager of the Wellington Higher Quality Global High Yield Bond Fund and the Wellington Global High Yield Bond Fund changed from Wellington Management Company LLP to Wellington Management International Limited.

Changes to fixed administrative fee

- Wellington Blended Opportunistic Emerging Markets Debt Fund effective July 1, 2023:
 - The fixed administrative fee will be 0.21% from July 1, 2023 for share classes USD D, USD N, EUR DL and GBP N (hedged).
 - The fixed administrative fee will be 0.11% from July 1, 2023 for share classes USD S, USD S Q1 (distributing), USD T, EUR S (hedged) and GBP S (hedged).
- Wellington Emerging Local Debt Fund from July 1, 2023:
 - The fixed administrative fee will be 0.14% from July 1, 2023 for share classes USD G, USD GR, USD NI, USD NR, USD S, USD T, CHF S, EUR G, EUR NR (hedged), EUR S, EUR S Q1 (distributing), GBP S, GBP S (hedged), GBP T and JPY G.
 - The fixed administrative fee will be 0.24% from July 1, 2023 for share classes USD GN, USD N and EUR N (hedged).
- Wellington Global Perspectives Fund from July 1, 2023:
 - The fixed administrative fee will be 0.15% from July 1, 2023 for share classes USD S, USD T, EUR S and GBP S (hedged).

Changes to share classes

Wellington Strategic European Equity Fund - share class EUR DL launched on June 30, 2023 effective on July 1, 2023.

Wellington Management Funds (Ireland) plc

Wellington Blended Opportunistic Emerging Markets Debt Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform a blended index of 50% JPMorgan Emerging Market Bond Index - Global Diversified and 50% JPMorgan Government Bond Index - Emerging Markets Global Diversified (the "Index"), primarily through investment in a diversified portfolio of US Dollar and local currency denominated emerging markets debt securities and currency instruments.

The Investment Manager uses an investment approach that seeks to take advantage of opportunities across the emerging markets debt securities spectrum, including hard currency (commonly referenced as bonds denominated in US dollars or other developed market currencies) and local currency denominated sovereign, quasi-sovereign, and corporate debt, currencies, and derivatives.

The evaluation of Sustainability Risks through the analysis of the ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's or a country's financial/economic performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company and country engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question. For companies they will typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. For individual countries, key factors may include factors such as political stability, strength of institutions, climate physical and transition risk, inequality, and human capital, among others.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry and credit analysts) and external research (such as company and policymakers meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts. This assessment will include an evaluation of a country's debt profile, which can be materially impacted by a country's vulnerability to shocks, and the quality of governance. When assessing the quality of governance, consideration is given to factors such as political stability, the quality of macro policies, and the strength of government institutions.
- b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.
- c) Social factors such as inequality, education, labour market participation, and freedom and democracy metrics may play a role in a given country's degree of political stability and fiscal obligations.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on Sustainability Risks and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. Developed market exposures are also permitted. The Fund may invest in securities traded in China via Bond Connect (see also in the Prospectus) and may make substantial investment in securities traded on Russian markets.

Wellington Management Funds (Ireland) plc

Wellington Blended Opportunistic Emerging Markets Debt Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

As a result of the invasion of Ukraine, the Investment Manager will not make any new purchases of Russian securities for the Fund without giving notice to the shareholders in the Fund at that time. In future, subject to international sanctions being lifted, and such notice being given, the Investment Manager may in its discretion consider making new investments in Russia securities for the Fund.

The Fund is suitable for retail investors seeking long-term total return. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Blended Opportunistic Emerging Markets Debt Fund launched on April 1, 2019. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023

Wellington Management Funds (Ireland) plc

Wellington Emerging Local Debt Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the JP Morgan Government Bond Index – Emerging Markets Global Diversified Index (the "Index"), seeking to achieve the objective primarily through investment in a diversified portfolio of emerging markets local currency-denominated debt securities and currency instruments.

The Investment Manager uses an investment approach that seeks to take advantage of opportunities in local currency denominated debt and currency markets. The Investment Manager combines comprehensive top-down analysis with detailed bottom-up country research to identify the best investment opportunities. Interest rates and currencies are evaluated on two separate but parallel tracks, as the performance of those two components of the local debt market can be driven by different factors. The Investment Manager's review of individual markets includes both quantitative research (looking purely at financial and economic data) and fundamental research (incorporating a more holistic analysis of economic and political information).

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's or a country's financial/economic performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question. For companies they will typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. For individual countries, key factors may include factors such as political stability, strength of institutions, climate physical and transition risk, inequality, and human capital, among others.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry and credit analysts) and external research (such as company and policymakers meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts. This assessment will include an evaluation of a country's debt profile, which can be materially impacted by a country's vulnerability to shocks, and the quality of governance. When assessing the quality of governance, consideration is given to factors such as political stability, the quality of macro policies, and the strength of government institutions.
- b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.
- c) Social factors such as inequality, education, labour market participation, and freedom and democracy metrics may play a role in a given country's degree of political stability and fiscal obligations.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. Developed market exposures are also permitted. The Fund may invest in securities traded in China via Bond Connect (see also in the Prospectus) and may make substantial investment in securities traded on Russian markets.

Wellington Management Funds (Ireland) plc

Wellington Emerging Local Debt Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

As a result of the invasion of Ukraine, the Investment Manager will not make any new purchases of Russian securities for the Fund without giving notice to the shareholders in the Fund at that time. In future, subject to international sanctions being lifted, and such notice being given, the Investment Manager may in its discretion consider making new investments in Russia securities for the Fund.

The Fund is suitable for retail investors seeking long-term total return. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Emerging Local Debt Fund launched on March 29, 2010. The table below details the performance of all funded share classes within the Fund.

Wellington Management Funds (Ireland) plc

Wellington Emerging Local Debt Advanced Beta Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily through investment in a diversified portfolio of emerging markets local currency-denominated sovereign debt securities and currency instruments.

The Investment Manager seeks to build a portfolio that targets a return that is broadly equivalent to overall market returns but with less risk. Overall market returns are considered to be the return of a market capitalisation weighted index. The exposure of such an index to a market is broadly referred to as "Beta". Such an index can provide a certain level of diversification and return, however, traditional index methodology uses the market capitalisation of a country's outstanding debt to determine that country's weighting, which results in more-indebted countries often dominating the index. The Investment Manager considers that the Fund can be constructed to provide exposure to a market in an alternate manner to that of the indices (beta) described above but with lower risk. The Investment Manager calls this "Advanced Beta". In this regard, by utilizing the "Advanced Beta" approach the Investment Manager seeks to reduce the risk of emphasizing larger issues of debt due to strict focus on market capitalisation, by applying an additional screening process in the selection of debt securities for the Fund to provide a similar level of exposure but with lower risk.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Further information on the ESG factors that the Investment Manager will consider can be found in the section of the Prospectus entitled Sustainability Risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include the following:

- a) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The JP Morgan Government Bond Index – Emerging Markets Global Diversified Index (the "Index") serves as a reference benchmark for performance and regulated average ESG score comparison and as a proxy for the overall market returns for volatility measurement.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. Developed market exposures are also permitted. The Fund may invest in securities traded in China via Bond Connect (see also in the Prospectus) and may make substantial investment in securities traded on Russian markets from time to time.

Wellington Management Funds (Ireland) plc

Wellington Emerging Local Debt Advanced Beta Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

As a result of the invasion of Ukraine, the Investment Manager will not make any new purchases of Russian securities for the Fund without giving notice to the shareholders in the Fund at that time. In future, subject to international sanctions being lifted, and such notice being given, the Investment Manager may in its discretion consider making new investments in Russia securities for the Fund.

The Fund is intended for professional investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Emerging Local Debt Advanced Beta Fund launched on September 9, 2015. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023					
	6 mths	1 year	3 years	5 years	Since inception	
USD SB	13.47%	18.87%	4.21%	5.71%	5.57%	September 9, 2015
JP Morgan Government Bond Index - Emerging Markets Global Diversified Index	7.79%	11.38%	(1.42%)	0.29%	2.30%	
EUR SC	12.10%	15.75%	2.58%	3.58%	3.53%	September 9, 2015
JP Morgan Government Bond Index - Emerging Markets Global Diversified Index	5.45%	6.73%	(0.46%)	1.66%	2.61%	
GBP SC	12.86%	17.77%	N/A	N/A	4.01%	December 29, 2020
JP Morgan Government Bond Index - Emerging Markets Global Diversified Index	1.99%	6.40%	N/A	N/A	(3.12%)	

¹All classes are accumulating and unhedged unless otherwise noted. Fund returns are net of fees and expenses.

Returns for periods greater than one year are annualised.

Benchmark returns are expressed in the currency of the share class unless it is a hedged benchmark.

Past performance is no indication of current or future performance.

Statistical information

Share class ¹	As at June 30, 2023		As at December 31, 2022		As at June 30, 2022

Wellington Management Funds (Ireland) plc

Wellington Euro High Yield Bond Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America Euro High Yield Constrained Index (the "Index") and achieve the objective, primarily through investment in debt securities denominated in European currencies issued worldwide. The Fund's investment approach is based on a combination of the analysis of the credit profile of individual high yield issuers and country-level macro-economic research. Total returns will be sought through income and capital appreciation.

The Fund is denominated in Euro and the majority of debt securities held will be denominated in Euro with any non-Euro exposures in the Fund generally hedged back to Euro. The Fund will also primarily invest in debt securities which are considered by the Investment Manager to be below investment grade.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- a) Generally lower public information and disclosure for high yield corporate bonds (in comparison to investment grade corporate bonds) such that a greater level of engagement is required to identify risks.
- b) In the high yield corporate bond market, higher levels of founder ownership are prevalent, which enhances governance related risks such as concentration of control and reduced diversity.
- c) Climate change. Where climate change is considered to be material, climate change factors are incorporated into the assessment of credit risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities, up to 5% of the market value of the Fund, if such securities are received as a result of a corporate restructuring or as a result of owning equity-linked securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in EUR.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Global Bond Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the Bloomberg Global Aggregate Index (the "Index") and achieve the objective, primarily through investment in a globally diversified portfolio of fixed income securities. The Fund's investment approach seeks to identify a diversified set of independent investment ideas, to efficiently allocate capital to those investment ideas and aims to manage Fund risk across a team of multiple internal portfolio managers.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts, including contingent liabilities of the state, total debt to exports or revenue to debt, amongst others. The issue of willingness to pay also necessitates the inclusion of politics into risk assessments, as it can be a major factor in determining how bond markets will behave.
- b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with management can support changes in issuer behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily through investment in debt securities on a hedged interest rate duration basis. The Fund will be managed with the aim of providing exposure to credit whilst keeping portfolio turnover low and seeking to maximise total returns and mitigating against capital erosion over the long-term. The Investment Manager will use a combination of top down analysis of global investment and economic themes and bottom up credit analysis on individual industries and issuers to structure a Fund that seeks to hold securities to maturity unless their credit outlook deteriorates or securities with a better forecast return are identified.

To determine the "buy and maintain" suitability of individual securities, the Investment Manager establishes and scores the suitability of each security using a proprietary assessment tool. This tool maintains scores for securities in the Investment Manager's investment universe, which are based on four factors: secular risks to the industry, cyclicality of the industry and the underlying fundamental credit quality of the issue. These factors are important drivers of the Investment Manager's evaluation of the issuer's willingness and ability to service its debt for the duration of the investment horizon. In addition, when appropriate, this review may lead to the Investment Manager adding maturity restrictions if it foresees longer term uncertainties.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

Whilst Sustainability Risks vary from issuer to issuer, particularly relevant to the Fund are changes in climate, which are posing an increasing risk to some corporate issuers. Where considered to be material, climate change factors are incorporated into the assessment of risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purpose.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

Wellington Management Funds (Ireland) plc

Wellington Global Credit ESG Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns in excess of the Custom Bloomberg Global Aggregate Corporate (Fin 40% cap) USD/Euro/GBP 1% Cap \$500M Min Index (ex Tier 1, Upper Tier 2, and Capital Credit securities) Index (the "Index"). The Index is composed of investment grade corporate bonds with minimum amounts outstanding denominated in US Dollars, Euros, and Sterling within the industrial, utility and financial services sectors with individual issuers capped at 1%, financials capped at 40% and excluding certain subordinated debt instruments.

The Investment Manager will actively manage the Fund, seeking to achieve the objective, primarily investing in a diversified portfolio of investment grade corporate debt instruments. The Fund's strategy is based on the philosophy that credit is a cyclical asset class, and so a thorough understanding of macro and market environments is critical to interpreting and anticipating changes in credit cycles. The Investment Manager also believes inefficiencies exist in the pricing of credit risk and so the Fund seeks to generate consistent active returns through a disciplined investment process that integrates top-down analysis of global investment themes (e.g. long-term trends, economic cycles), and specialist research (e.g. industry and issuer analysis) on individual credit sectors with bottom-up corporate security selection.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and their sustainability risk profiles. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers, using inputs from the Investment Manager's team of ESG analysts to help identify potential risks. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include risks related to climate change, environmental disclosure and transparency, labour relations, product safety and quality, ownership structure and management incentives.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing Sustainability Risks the Investment Manager draws upon a wide variety of internal (such as research by its team of ESG analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company, the following is particularly relevant to the Fund:

- a) Climate change transition risk reflects the risk created by the low-carbon energy transition. Companies with high emissions (generally due to the use of fossil fuels) potentially face higher expenses and lower margins due to carbon taxes, higher litigation costs, higher costs of capital, and higher potential for stranded assets. These headwinds can materially impact company fundamentals as sectors, regions, businesses, and technologies attempt to mitigate and adapt to the effects of climate change.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison and baseline WACI purposes.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

Wellington Management Funds (Ireland) plc

Wellington Global High Yield Bond Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America Global High Yield Constrained Index (the "Index") and achieve the objective by investing primarily in debt securities worldwide which are considered by the Investment Manager to be below investment grade.

The Fund's investment approach is based on analysis of the credit profile of individual high yield issuers combined with an analysis of the behaviour and performance of the broader economic environment. Total returns will be sought through income and capital appreciation.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- a) Generally lower public information and disclosure for high yield corporate bonds (in comparison to investment grade corporate bonds) such that a greater level of engagement is required to identify risks.
- b) In the high yield corporate bond market, higher levels of founder ownership are prevalent, which enhances governance related risks such as concentration of control and reduced diversity.
- c) Changes in climate are posing an increasing risk to some high yield corporate issuers. Where considered to be material, climate change factors are incorporated into the assessment of credit risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into its assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison and weighted carbon intensity purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities, up to 5% of the market value of the Fund, if such securities are received as a result of a corporate restructuring or as a result of owning equity-linked securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Wellington Management Funds (Ireland) plc

Wellington Global Impact Bond Fund

Investment Manager's report

Investment objective, policies and sustainable objective

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will seek to understand the world's social and environmental challenges and to identify and invest in debt issued by companies and organizations that it believes addresses these challenges in a differentiated way through their products, services and projects. Through the Fund's investments, the Investment Manager seeks to improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

The Investment Manager will actively manage the Fund, seeking to outperform the Bloomberg Global Aggregate Hedged to US dollar Index (the "Index") and achieve the objectives primarily through investment in investment grade rated global fixed income securities issued by organisations whose core business or projects, in the opinion of the Investment Manager, address some of the world's major social and environmental challenges.

Given the Investment Manager's emphasis on investing in securities where the proceeds are addressing social or environmental challenges, the assessment of Sustainability Risks through the analysis of ESG factors is an integral part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks. The Investment Manager believes that issuers that have strengths in these areas typically have more stable credit fundamentals and can create competitive advantages by reducing material Sustainability Risks which may negatively impact their competitors.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from security to security, the following are particularly relevant to the Fund:

- a) Measurable positive impact not being achieved or having impact activities discontinued: From time to time an issuer may decide to discontinue the activities which the Investment Manager deemed meet the impact criteria, and/or may repurpose the proceeds of a bond issue, or return capital to investors if such activities will no longer be continued. It is also possible that the issuer may fail to provide sufficient progress towards measurable impact or does not adequately measure and report on the impact activities. Any of these situations arising could lead to a bond issue falling outside of the Investment Manager's impact framework at which point the security would become a candidate for sale.
- b) Exposure to negative externalities: The Investment Manager's impact analysis focuses on the use of proceeds of specific bond issues and other activities of the issuer. The Investment Manager seeks to understand how other activities of the issuing organization, or parent organization, may cause negative environmental or social harm that could offset the positive aspects of the impact activity ("negative externalities"). The Investment Manager seeks to understand and mitigate the risk of exposure to negative externalities. Exposures to negative externalities can arise and if deemed significant by the Investment Manager could lead to an investment becoming a candidate for sale from the portfolio.

Through interactions with issuer's management teams, the Investment Manager seeks a better understanding of these and any additional underlying Sustainability Risks, incorporating them into its assessments of an issuer's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with issuers can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index will be considered during portfolio construction and is used for performance comparison purposes.

Wellington Management Funds (Ireland) plc

Wellington Global Impact Bond Fund (continued)

Investment Manager's report (continued)

Investment objective, policies and sustainable objective (continued)

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Impact Bond Fund launched on April 30, 2019. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023					
	6 mths	1 year	3 years	5 years	Since inception

Wellington Management Funds (Ireland) plc

Wellington Higher Quality Global High Yield Bond Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America Global High Yield Constrained BB-B Index (the "Index") and to achieve the objective by investing primarily in debt securities worldwide which are considered by the Investment Manager to be rated BB1 through B3 inclusive.

The assessment of Sustainability Risks through the analysis of ESG factors (including Sustainability Risks) is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- a) Generally lower public information and disclosure for high yield corporate bonds (in comparison to investment grade corporate bonds) such that a greater level of engagement is required to identify risks.
- b) In the high yield corporate bond market, higher levels of founder ownership are prevalent, which enhances governance related risks such as concentration of control and reduced diversity.
- c) Changes in climate are posing an increasing risk to some high yield corporate issuers. Where considered to be material, climate change factors are incorporated into the assessment of credit risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into its assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison and WACI purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Opportunistic Emerging Markets Debt Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the JP Morgan Emerging Markets Bond Global Index (the "Index") and achieve the objective, primarily through investment in a diversified portfolio of emerging markets debt securities and currency instruments. The Investment Manager uses an investment approach that seeks to take advantage of opportunities across the emerging markets debt securities spectrum, including hard currency (commonly referenced as bonds denominated in USD or other developed market currencies) and local currency denominated sovereign, quasi-sovereign, and corporate debt, currencies and derivatives.

The evaluation of Sustainability Risks through the analysis of environmental, ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's or a country's financial/economic performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company and country engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question. For companies they will typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. For individual countries, key factors may include factors such as political stability, strength of institutions, climate physical and transition risk, inequality, and human capital, among others.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry and credit analysts) and external research (such as company and policymakers meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts. This assessment will include an evaluation of a country's debt profile, which can be materially impacted by a country's vulnerability to shocks, and the quality of governance. When assessing the quality of governance, consideration is given to factors such as political stability, the quality of macro policies, and the strength of government institutions.
- Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.
- Social factors such as inequality, education, labour market participation, and freedom and democracy metrics may play a role in a given country's degree of political stability and fiscal obligations.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on Sustainability Risks and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance and duration comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. Developed market exposures are also permitted. The Fund may invest in securities traded in China via Bond Connect (see also in the Prospectus) and may make substantial investment in securities traded on Russian markets.

As a result of the invasion of Ukraine, the Investment Manager will not make any new purchases of Russian securities for the Fund without giving notice to the shareholders in the Fund at that time. In future, subject to international sanctions being lifted, and such notice being given, the Investment Manager may in its discretion consider making new investments in Russia securities for the Fund.

Wellington Management Funds (Ireland) plc

Wellington Opportunistic Emerging Markets Debt Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Opportunistic Emerging Markets Debt Fund launched on September 1, 2009. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023					
	6 mths	1 year	3 years	5 years	Since inception*

Wellington Management Funds (Ireland) plc

Wellington Opportunistic Fixed Income Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily via long and short (synthetic) exposure in an unconstrained manner to a broad range of fixed income debt securities across multiple geographies, including securities with both investment grade and non-investment grade credit ratings.

The Fund seeks to generate returns of 5%-7% of the Fund's net asset value in USD (gross of any management, administration and distribution fees) on an annual basis, with a volatility profile in line with fixed income markets. These return and volatility targets are dependent on market conditions and are not guaranteed. The Fund's investment strategy is based on the belief that fixed income market inefficiencies exist and are most prevalent outside the core developed market sovereign and investment grade corporate sectors focused on by most investors. The Investment Manager believes that these inefficiencies can be captured through researching the investment universe without constraint and by being willing to invest where the Investment Manager's research and analysis indicates the best total return opportunities arise.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes. However, the Bloomberg Global Aggregate Index hedged to USD (the "Index") is used as a proxy for the global market for volatility measurement. The Index is comprised of fixed income securities from a broad array of geographies and sectors with a maturity of over one year.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund does not consider the adverse impacts of its investment decisions on Sustainability Factors.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Whilst the Fund does not promote any specific ESG characteristics or have a sustainable investment objective, the assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

Whilst Sustainability Risks vary from issuer to issuer of particular relevance to the Fund is the willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts, including contingent liabilities of the state, total debt to exports or revenue to debt, amongst others. The issue of willingness to pay also necessitates the inclusion of politics into risk assessments, as it can be a major factor in determining how bond markets will behave.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

Wellington Management Funds (Ireland) plc

Wellington Opportunistic Fixed Income Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Opportunistic Fixed Income Fund launched on December 14, 2017. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023

Wellington Management Funds (Ireland) plc

Wellington Sterling Core Bond Plus Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America Sterling Broad Market Index (the "Index") and achieve the objective, investing primarily in Sterling denominated fixed income debt securities. The Fund combines a core of Sterling fixed income assets combined with a range of global fixed income and currency strategies, including global interest rates, investment grade corporate bonds, global high yield bonds or sovereign bonds. As the Fund has a Sterling benchmark, the Investment Manager aims to generate returns by using the widest fixed income opportunity set in conjunction with a majority of Sterling assets.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the securities over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- a) The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts, including contingent liabilities of the state, total debt to exports or revenue to debt, amongst others. The issue of willingness to pay also necessitates the inclusion of politics into risk assessments, as it can be a major factor in determining how bond markets will behave.
- b) Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with issuers can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in GBP.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington US\$ Core High Yield Bond Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the ICE Bank of America US High Yield Constrained Index (the "Index"), primarily through investment in debt securities of US corporations which are considered by the Investment Manager to be below investment grade. The Fund's investment approach is based on analysis of the credit profile of individual high yield issuers, as well as the analysis of the behaviour and performance of the broader economic environment.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure & membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- Generally lower public information and disclosure for high yield corporate bonds (in comparison to investment grade corporate bonds) such that a greater level of engagement is required to identify risks.
- In the high yield corporate bond market, higher levels of founder ownership are prevalent, which enhances governance related risks such as concentration of control and reduced diversity.
- Changes in climate are posing an increasing risk to some high yield corporate issuers. Where considered to be material, climate change factors are incorporated into the assessment of credit risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into its assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security.

The Investment Manager believes that active engagement with issuers can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuers within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison and WACI purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Wellington Management Funds (Ireland) plc

Wellington US\$ Core High Yield Bond Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington US\$ Core High Yield Bond Fund launched on July 20, 2009. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023					
	6 mths	1 year	3 years	5 years	Since inception*

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily through investment in global sovereign government and government-related debt combined with opportunistic exposure to other fixed income assets including corporate, securitised, developed and emerging market debt and currencies.

The Fund is expected to have high average credit quality.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect an issuer's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered will vary depending on the security in question, but typically include ownership structure, board structure & membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the securities over the time horizon of the Fund. Whilst Sustainability Risks vary from issuer to issuer those that are particularly relevant to the Fund include:

- The willingness of sovereigns to make their bond payments. The Investment Manager uses a number of factors to assess the ability and willingness of governments to pay their debts, including contingent liabilities of the state, total debt to exports or revenue to debt, amongst others. The issue of willingness to pay also necessitates the inclusion of politics into risk assessments, as it can be a major factor in determining how bond markets will behave.
- Changes in climate are posing an increasing risk to some sovereign issuers. Where considered to be material, climate change factors are incorporated into the assessment of sovereign risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with issuer management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with issuers can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between issuer within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs and in a broad range of debt securities. The Fund may also buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to debt securities. The Fund may hold equity securities where they are a result of a corporate action, conversion or exercising a warrant. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

Wellington Management Funds (Ireland) plc

Wellington All-China Focus Equity Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI China All Shares Index (the "Index") and achieve the objective, primarily through investment in companies that are located, and/or conduct substantial business activities in China.

The Investment Manager will look to the location of a company's assets, revenues and earnings in determining whether a company conducts substantial business activities in China and the location of a company's stock exchange listing will have no bearing in this evaluation. The Fund may be concentrated in a relatively small number of securities and industry sectors and will be more concentrated in terms of country exposures and, as a result, may be more volatile than more broadly diversified funds. The Fund is unconstrained by market capitalization and turnover is expected to be low.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Further information on the ESG factors that the Investment Manager will consider can be found in the Prospectus.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- a) **Governance:** When the Investment Manager seeks emerging high quality companies, there is often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company is often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's or family's strategic guidance of the business can be key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment. At all times the Investment Manager seeks to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
- b) **Emerging Markets:** The nature of the Investment Manager's focus can also result in exposure to emerging markets, including China, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.
- c) **Small Cap:** Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

Wellington Management Funds (Ireland) plc

Wellington All-China Focus Equity Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest in China A Shares traded via Stock Connect. In addition, the Fund will invest, directly or indirectly through the use of FDIs, in other equities and securities with equity characteristics. These may include, but are not limited to, common stocks (such as Hong Kong listed "H shares" and other international listings), depository receipts (such as ADRs, GDRs and European Depository Receipts), market access products (including warrants on equities, options on equities and equity swaps), preferred stock, dividend-right certificates, shares of closed-ended real estate investment trusts, exchange-traded funds and other collective investment schemes.

The Fund may invest in collective investment schemes as described in the Prospectus and in exchange traded funds ("ETFs") that provide exposure to the types of securities listed above and which constitute an eligible investment for the Fund. Such ETFs will be listed and/or traded on the markets and/or exchanges as set out in the Prospectus and regulated as UCITS or as AIF ETFs. No more than 5% of the Net Asset Value of the Fund will be invested in non-listed and non-traded collective investment schemes.

The Fund may buy and sell exchange-traded and over-the-counter FDIs, comprising the market access products mentioned above, as well as index futures and currency forwards, to gain exposure to the instruments listed above in pursuit of the investment objective and for efficient portfolio management purposes, including hedging against risk. Full details of the types of FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington All-China Focus Equity Fund launched on January 8, 2020. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023

Wellington Management Funds (Ireland) plc

Wellington Durable Companies Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily by investing globally in companies that the Investment Manager considers to be durable companies. Durable companies are those that the Investment Manager considers to exhibit stability and anticipates will generate positive returns over time. Stability is defined by the Investment Manager as a profit base that is not likely to decline significantly from current levels and the possibility of future value creation largely through management's ability to allocate capital effectively. The merits of stability are widely appreciated by the market and so are often reflected in the valuation of well-known stable businesses. In order to identify these businesses at more attractive valuations, the Investment Manager looks for stability in less conventional places such as a) mid and small capitalisation companies, industry sectors considered from time to time by the Investment Manager to be more volatile and geographies that are typically less favoured by the investment industry and b) in companies that do not grow fast enough for growth investors, lack the blue chip financial characteristics sought by quality investors and are not cheap enough for value investors.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which they will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In evaluating risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Sustainability Risks are considered material where they could impact a company's management's ability to consistently create value over the long-term. Similarly, poor labour relations may adversely impact a company's reputation or ability to retain key staff. The Investment Manager implements a rating system as described above, inclusive of ESG considerations, for each holding in the Fund, that helps inform investment decisions, ensuring they are factored directly into assessments of the investment opportunities. The links between ESG factors and stability over the long-term make these a particular catalyst for active company engagement, which the Investment Manager believes can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The MSCI All Country World Index (the "Index") serves as a reference benchmark for market context and WACI comparison purposes only.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in developed countries and any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make limited investment in securities traded on Russian markets and may invest up to 10% of its net asset value in China A Shares traded via Stock Connect.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

Wellington Management Funds (Ireland) plc

Wellington Durable Companies Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Durable Companies Fund launched on November 19, 2014. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily by investing globally in companies that the Investment Manager considers to be durable companies and that have a minimum market capitalisation of USD 2 billion at initial purchase. Durable companies are those that the Investment Manager considers to exhibit stability and anticipates will generate positive returns over time. Stability is defined by the Investment Manager as a profit base that is not likely to decline significantly from current levels combined with the possibility of future value creation largely through management's ability to allocate capital effectively. The merits of stability are widely appreciated by the market and so are often reflected in the valuation of well-known stable businesses. In order to identify these businesses at more attractive valuations, the Investment Manager looks for stability in less conventional places such as a) mid and small capitalisation companies, industry sectors considered from time to time by the Investment Manager to be more volatile and geographies that are typically less favoured by the investment industry and b) in companies that do not grow fast enough for growth investors, lack the blue chip financial characteristics sought by quality investors and are not cheap enough for value investors.

Given the Investment Manager's long-term view on holding periods (typically 4-5 years) and emphasis on stability, the assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In evaluating risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Sustainability Risks are considered material where they could impact a company's management's ability to consistently create value over the long-term. Similarly, poor labour relations may adversely impact a company's reputation or ability to retain key staff. The Investment Manager implements a rating system as described above, inclusive of ESG considerations, for each holding in the Fund, that helps inform investment decisions, ensuring they are factored directly into assessments of the investment opportunities. The links between ESG factors and stability over the long-term make these a particular catalyst for active company engagement, which the Investment Manager believes can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The MSCI All Country World Index (the "Index") serves as a reference benchmark for market context and WACI comparison purposes only.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Durable Enterprises Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The Fund may invest in developed countries and any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make limited investment in securities traded on Russian markets and may invest up to 10% of its net asset value in China A Shares traded via Stock Connect.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Durable Enterprises Fund launched on January 10, 2018. The table below details the performance of all funded share classes within the Fund.

Wellington Management Funds (Ireland) plc

Wellington Emerging Market Development Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Emerging Markets Index (the "Index"), primarily through investing in companies domiciled or listed in emerging markets, and to a lesser extent, in developed and frontier (as defined by MSCI) market countries and to achieve the objective by investing in companies which are positioned to benefit from themes relating to the structural and economic development of emerging markets.

Investments in developed markets will be focused on companies which conduct substantial business in emerging markets as determined by the Investment Manager, including (i) companies that have substantial assets in emerging markets; (ii) companies the Investment Manager believes will experience significant growth from business activities conducted in emerging markets; and (iii) companies that derive a substantial portion of their total revenues from either goods and services produced in, or sales made in, emerging markets.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Emerging Markets Equity Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Emerging Markets Index (the "Index") and achieve the objective, primarily through investment in equity securities of companies that are either located in emerging markets or conduct substantial business in emerging markets. The Investment Manager uses bottom-up fundamental research on companies, industries, and countries to seek to identify emerging markets stocks with the strongest returns, adjusted for risk and liquidity.

The Investment Manager will invest in companies domiciled or listed in emerging markets, and to a lesser extent, in developed and frontier market countries. Investments in developed markets will be focused on companies which conduct substantial business in emerging markets as determined by the Investment Manager, including (i) companies that have substantial assets in emerging markets; (ii) companies the Investment Manager believes will experience significant growth from business activities conducted in emerging markets; and (iii) companies that derive a substantial portion of their total revenues from either goods and services produced in, or sales made in, emerging markets.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered, will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Further information on the ESG factors that the Investment Manager will consider can be found in the Prospectus.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- a) **Governance:** When the Investment Manager seeks emerging high quality companies, there is often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company is often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's or family's strategic guidance of the business can be key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment. At all times the Investment Manager seeks to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
- b) **Emerging Markets:** The nature of the Investment Manager's focus can also result in exposure to emerging markets, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.
- c) **Small Cap:** Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

Position sizing reflects the Investment Manager's target prices, level of conviction, and risk assessments. Risk analysis is an integral part of the investment process and is monitored and managed at the security, sector, country, and total Fund levels on an on-going basis.

Wellington Management Funds (Ireland) plc

Wellington Emerging Markets Equity Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The Index may be considered during portfolio construction and is used for performance comparison purposes.

For temporary defensive purposes in case of unusual or extraordinary market conditions, the Fund may hold up to 100% of its assets in ancillary liquid assets. The Fund may make substantial investment in securities traded on Russian markets and may invest in China A Shares traded via Stock Connect.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in GBP.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Emerging Markets Equity Fund launched on September 1, 2005. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023					
	6 mths	1 year	3 years	5 years	Since inception*

Wellington Management Funds (Ireland) plc

Wellington Emerging Markets Local Equity Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Emerging Markets Index (the "Index") and achieve the objective, primarily through investment in equity securities of companies that are either located in emerging markets, or conduct substantial business in emerging markets as described below, and by focusing on companies that derive or expect to derive the majority of their total revenues or profits from such emerging market countries. The Investment Manager seeks to generate excess returns over the long-term by identifying companies whose financial performance it expects to exceed expectations. This process incorporates top-down elements, such as macroeconomic and sector analysis, within a bottom-up portfolio construction process. The Fund invests opportunistically in companies with different styles (e.g. value, growth) and market capitalization (smaller companies and larger companies).

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Further information on the ESG factors that the Investment Manager will consider can be found in the Prospectus.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- a) **Governance:** When the Investment Manager seeks emerging high quality companies, there is often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company is often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's or family's strategic guidance of the business can be key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment. At all times the Investment Manager seeks to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
- b) **Emerging Markets:** The nature of the Investment Manager's focus can also result in exposure to emerging markets, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.
- c) **Small Cap:** Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison purposes. In addition, the MSCI Emerging Markets IMI Local Index (the "Secondary Index") serves as a reference benchmark for market context purposes.

The Fund may make substantial investment in securities traded on Russian markets and may invest in China A Shares traded via Stock Connect.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Emerging Markets Local Equity Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Emerging Markets Local Equity Fund launched on August 31, 2010. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023					
	6 mths	1 year	3 years	5 years	Since inception*

Wellington Management Funds (Ireland) plc

Wellington Emerging Markets Opportunities Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Emerging Markets Investable Market Index (the "Index") and achieve the objective, primarily through investment in companies that are located, and/or conduct substantial business activities, in non-developed markets, including frontier markets (as defined by MSCI). The Investment Manager will look to the location of a company's assets, revenues and earnings in determining whether a company conducts substantial business activities in non-developed markets and the location of a company's stock exchange listing will have no bearing in this evaluation.

The Fund will apply the Company's Exclusion Policy, further details of which can be found in the Prospectus.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund does not consider the adverse impacts of its investment decisions on Sustainability Factors.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Whilst the Fund does not promote any specific ESG characteristics or have a sustainable investment objective, the assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Emerging Markets Opportunities Fund (continued)

Investment Manager's report (continued)

Performance

The Wellington Emerging Markets Opportunities Fund launched on September 3, 2013. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					
	Periods ended June 30, 2023					
	6 mths	1 year	3 years	5 years	Since inception	Inception date
CAD S	0.92%	7.67%	0.55%	2.21%	6.33%	September 3, 2013
MSCI Emerging Markets Investable Market Index	3.15%	5.85%	2.61%	1.54%	5.67%	
USD S	3.34%	4.96%	1.53%	2.09%	3.21%	January 21, 2014
MSCI Emerging Markets Investable Market Index	5.62%	3.19%	3.60%	1.42%	2.88%	

¹All classes are accumulating and unhedged unless otherwise noted.

Fund returns are net of fees and expenses.

Returns for periods greater than one year are annualised.

Benchmark returns are expressed in the currency of the share class unless it is a hedged benchmark.

Past performance is no indication of current or future performance.

Statistical information

Share class ¹	As at June 30, 2023		As at December 31, 2022		As at June 30, 2022

Wellington Management Funds (Ireland) plc

Wellington Enduring Assets Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to achieve the objective primarily through global investment in companies that own long-lived physical assets (such as companies in the utility, transportation, energy, real estate, and industrial sectors). The Investment Manager will seek to invest in companies which it believes possess an advantaged competitive position, such as companies in monopolistic industries or that have products that are non-discretionary with limited substitution risk, and that exhibit low levels of earnings volatility in order to mitigate against the risk of losing capital relative to global equities in periods of market stress. No industry is formally excluded from the investment universe. The Fund will be concentrated in terms of individual companies held and from time to time by industry sectors but is expected to be diversified by country. The Fund is expected to have a low to moderate turnover.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

A strong weight is also placed on the future trajectory of ESG related variables; , specifically, a company's plans and any key inflection points that will drive improvement. For example, as the world transitions from hydrocarbon reliance towards greater electrification, the Investment Manager prefers low carbon and alternative energy production. Additionally, the Investment Manager looks for companies providing valuable public services that align the interests of regulators, governments, customers, and Shareholders, such as clean water, carbon-free electricity, or wider access to broadband.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, particularly those related to the ESG factors highlighted above, incorporating them into its assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The MSCI All Country World Index (the "Index") serves as a reference benchmark for market context purposes only.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. The Fund may also invest in debt securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

Wellington Management Funds (Ireland) plc

Wellington Enduring Assets Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Enduring Assets Fund launched on May 31, 2013. The table below details the performance of all funded share classes within the Fund.

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI All Country World Index (the "Index") and achieve the objective, primarily through investment in companies globally that leverage technology to enhance or disrupt traditional financial services.

The Investment Manager seeks to achieve the objective by investing in financial technology companies and/or companies where the key growth driver is to provide or use technology to deliver the next generation of financial services ("FinTech"). The digital transformation of the global financial services industry through the use of technology and data is increasingly becoming a driver of success for companies and is creating what the Investment Manager anticipates to be compelling investment opportunities.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, executive compensation, labour relations history, data privacy and security, cyber security, culture and inclusion, customer relations, environmental initiatives and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In evaluating risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. While these risks vary from company to company, those that are particularly relevant include:

- a) Data Privacy: Where the Investment Manager invests in companies within the new "FinTech" industry, social considerations are critical when evaluating companies with access to large customer data sets, particularly in relation to the company's transparency around the type of data collected, the security of that data, the manner in which it is used, and the circumstances under which it might be shared. Consumer perceptions that a company's products or services do not protect personal information could inhibit sales and may impact the value of an investment.
- b) Governance: Where the Investment Manager invests in newly listed companies, there is a general lack of public information and disclosure in comparison to larger cap companies such that a greater level of engagement is required to identify risks. In the FinTech universe there can at times be higher insider ownership, particularly with new entrants to the industry. Higher levels of founder ownership are at times prevalent, which enhances governance related risks such as concentration of control and reduced diversity.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and any other Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison and market context purposes only. Whilst Fund securities may be components of the Index, the Index is not considered during portfolio construction and the Investment Manager will not manage the extent to which Fund securities differ from the Index. The Index is market capitalisation weighted and designed to measure the equity market performance of developed and emerging markets.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may be concentrated in a relatively small number of securities and industry sectors and/or countries and, as a result, may be more volatile than more broadly diversified funds.

Wellington Management Funds (Ireland) plc

Wellington FinTech Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The Fund may invest in developed countries and any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make limited investment in securities traded on Russian markets and may invest in China A Shares traded via Stock Connect.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

Wellington Management Funds (Ireland) plc

Wellington Focused European Equity Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Europe Index (the "Index") and achieve the objective primarily through investment in the equity and equity related securities of companies domiciled or operating primarily in developed European markets.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. The Investment Manager incorporates ESG factors into the analysis of individual companies (including with regards to Sustainability Risk assessment), in the belief that ESG considerations are crucial in long-term investing; non-compliance can threaten the viability of the business and positive action can support its growth. Companies are reviewed based on ESG criteria which will differ from company to company but may include a company's actions to reduce carbon emissions in its operational footprint, its policy around water usage and how it works to understand and mitigate its supply chain risks, as well as management incentives or board composition.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and proxy voting and collaborate on new research.

The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Whilst Sustainability Risks vary from company to company, the following are particularly relevant to the Fund:

- The Fund demonstrates a bias towards small and mid-capitalisation companies which typically have lower public information and disclosure relative to large capitalisation companies. These companies present governance considerations that require greater scrutiny and engagement with the company management teams to identify risk.
- The Investment Manager considers transition risks associated with climate change which may have a potential material impact on the value of assets in the Fund. At times the Fund has exhibited a higher carbon footprint than the Index, which is used for performance measurement and market context only. The Investment Manager places a greater focus on understanding and quantifying the net carbon emissions that are avoided over the lifetime of a company's product or services, and on those companies that have demonstrated an accelerated pathway for carbon reduction versus the broader universe.
- The Investment Manager believes that the principles underlying the United Nations Global Compact (UNGC) are intrinsic to the sustainability of business, people and the planet, and additionally contribute towards the Paris Agreement by supporting organizations to align their practices for a sustainable and inclusive future. In the Investment Manager's view non-compliance with the principles increases inherent business risks, may negatively impact financial performance and generally challenges the sustainability of the business model. Failure to comply without any clear remediations could mean that problems confronting the company are more structural in nature.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Focused European Equity Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in EUR.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Focused European Equity Fund launched on June 5, 2018. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI World Health Care Index (the "Index") and achieve the objective, primarily through investment in the equity securities of health care companies worldwide.

The Fund's investment approach is based primarily on bottom-up fundamental research conducted by the global health care analysts in the Investment Manager's Global Industry Analyst group.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process because, in the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. In addition, the Investment Manager believes there is a strong link between a company's ability to identify and manage Sustainability Risks and its ability to provide long-term capital appreciation.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment) using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but may include drug efficacy and safety records, product recall and quality control and good corporate governance. The Investment Manager believes that the Fund may be exposed to a broad range of Sustainability Risks and in assessing these risks the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the security over the time horizon of the Fund.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sub-sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund's variability of return is expected to be very high, well above that of a more broadly diversified, global equity Fund. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment objective, policies and sustainable objective

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will seek to understand the world's social and environmental problems and to identify and invest in companies that it believes are addressing these needs in a differentiated way through their core products and services. Through the Fund's investments, the Investment Manager seeks to improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI All Country World Index (the "Index") and achieve the objectives by investing primarily in global equities, focusing on companies whose core business, in the opinion of the Investment Manager, aims to generate positive social and/or environmental change alongside a financial return.

The Investment Manager will seek to identify the universe of these companies based on three primary impact categories: life essentials, human empowerment, and the environment.

The assessment of Sustainability Risks through the analysis of ESG factors is an integral part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. The Investment Manager has found that companies that have strengths in these areas have more stable growth trajectories and have created competitive advantages by reducing material Sustainability Risks which may negatively impact their competitors.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund.

Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- a) Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.
- b) The nature of the Investment Manager's focus can also result in exposure to emerging markets, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and any additional underlying Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Global Impact Fund (continued)

Investment Manager's report (continued)

Investment objective, policies and sustainable objective (continued)

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Impact Fund launched on December 8, 2016. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI All Countries World Small Cap Index (the "Index") and achieve the objective by investing globally, primarily in small to mid-capitalisation companies with a market capitalisation of typically below \$10bn at the time of initial purchase.

The assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- a) Generally lower public information and disclosure in small capitalisation companies (in comparison to larger capitalisation companies) such that a greater level of engagement may be required to identify risks.
- b) In the small capitalisation company segment, higher levels of founder ownership are prevalent, which may enhance governance related risks such as concentration of control and reduced diversity.

Through interactions with company management teams, the Investment Manager seeks a better understanding of these and other Sustainability Risks, incorporating them into its assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may invest in developed countries and any country which is considered by the Investment Manager to be an emerging market. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make a limited investment in securities traded on Russian markets and may invest up to 10% of its net asset value in China A Shares traded via Stock Connect. The Fund will be well diversified by country, currency, industry and issuer but may hold positions that are concentrated in this manner from time to time.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund seeking outperform the FTSE EPRA/NAREIT Developed Index (the "Index") and achieve the objective through investment primarily in companies and/or REITs, globally, with activities in or related to the development, operation, service and/or ownership of real estate, such as homebuilders, lodging, multi-family housing, retail real estate, office properties and property service companies. The Fund may also invest in other issuers that have a significant exposure to real estate through ownership of real estate assets.

Given the Investment Manager's long-term view on holding periods (typically 3-5 years), the assessment of Sustainability Risks through the analysis of ESG factors is an integral part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. In addition, the strong links between ESG factors make ESG factors a particular catalyst for active company engagement.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors considered by the Investment Manager will vary depending on the security in question, but may include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund.

The Investment Manager invests in companies in the real estate sector and therefore the sustainable use of materials, lighting, energy and waste systems may impact the value of an investment due to cost savings from more efficient energy and waste management. In addition, there may be physical and transition risks associated with climate change and extreme weather events may impact the terminal values of properties, insurance premiums and local taxes.

Through interactions with company and REIT management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into its assessments of a company's or a REIT's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies and REITs can support changes in corporate behaviour and actions that may benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies and REITs within regional and sub-sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index may be considered during portfolio construction and is used for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Investment objective, policies and sustainable objective

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will seek to invest in companies whose management teams and boards display exemplary 'stewardship'. The Investment Manager defines stewardship as how companies balance the interests of all stakeholders (e.g. customers, employees, communities and the supply chain) in the pursuit of profits and how they incorporate material ESG risks and opportunities in their corporate strategy. The Investment Manager will manage the Fund to target net zero emissions by 2050 in alignment with the Paris Agreement by actively engaging with companies held in the Fund to commit to net zero science-based targets.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI All Country World Index (the "Index") and achieve the objectives, primarily through investment in equity securities issued by large-cap companies worldwide.

The Fund has adopted the following binding restrictions that are consistent with its sustainable objective and which also support certain environmental or social characteristics in the following ways:

The Fund will not invest in any companies identified as failing to comply with the United Nations Global Compact.

The Fund will not invest in securities of any company identified as involved in the manufacturing or selling of weapons.

Evaluating ESG factors (including Sustainability Risks) is an integral part of the Fund's investment process as, in the Investment Manager's view, ESG factors can materially affect a company's financial performance and competitiveness.

The strong links between stewardship and return on capital over the long-term make ESG factors a particular catalyst for active company engagement, which the Investment Manager believes is essential if investee companies are to sustain their returns in the long-term. The Investment Manager looks for stewardship that is long-term oriented; implemented by strong management and an engaged board; exemplified by excellent capital and resource allocation; and distinguished in its consideration of all stakeholders in the pursuit of profit. ESG factors capture many of these elements, therefore the Investment Manager's bias is to focus on the ESG issues most material to the long-term value of each company in the Fund.

The Investment Manager uses inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered by the Investment Manager will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in securities where the likelihood of a Sustainability Risk event is under-represented in the price of the asset. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund, while also helping to mitigate Sustainability Risks. The Investment Manager also consults its ESG analysts for insight on how Sustainability Risks may differ between companies within regional and sector peer groups.

It is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison and WACI purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Global Stewards Fund (continued)

Investment Manager's report (continued)

Investment objective, policies and sustainable objective (continued)

The Fund may invest in developed countries and up to 20% of its net asset value in countries which are considered by the Investment Manager to be emerging markets. These are primarily located in Latin/Central America and the Caribbean, Central and Eastern Europe, Middle East, Africa and Asia. The Fund may make a limited investment in securities traded on Russian markets and may invest up to 10% of its net asset value in China A Shares traded via Stock Connect.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Global Stewards Fund launched on January 31, 2019. The table below details the performance of all funded share classes within the Fund.

Wellington Management Funds (Ireland) plc

Wellington India Focus Equity Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI India Index (the "Index") and achieve the objective by investing primarily in equity and equity related securities of companies that are incorporated or operating in India.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks. Further information on the ESG factors that the Investment Manager will consider can be found in the Prospectus.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company the following are particularly relevant to the Fund:

- a) **Governance:** When the Investment Manager seeks emerging high quality companies, there is often higher insider ownership in comparison to more well-established counterparts. Founder's or family control over the company is often seen by the market as potentially higher risk from a reputational and regulatory perspective. For the companies the Investment Manager invests in, the founder's or family's strategic guidance of the business can be key to the investment thesis, however poor corporate governance in relation to founder-led companies may reduce the success of the company and may impact the value of the investment. At all times the Investment Manager seeks to invest in companies with strong governance standards and demonstrated track records of fair treatment of stakeholders.
- b) **Emerging Markets:** The nature of the Investment Manager's focus can also result in exposure to emerging markets, including India, where corporate ownership, governance structure and policies may differ from developed markets. The Investment Manager seeks to understand the standard and best practices across individual emerging market countries but recognizes that there might be less transparency around information and disclosures in some of these markets. The Investment Manager seeks to critically evaluate and understand these risks through its fundamental research and company engagement.
- c) **Small Cap:** Given the Investment Manager focuses on identifying companies whose social or environmental impact is material to the business, the Fund tends to have a higher level of exposure to smaller cap companies. These companies may present governance considerations that require greater scrutiny and engagement with company management teams relative to large capitalization companies.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Wellington Management Funds (Ireland) plc

Wellington India Focus Equity Fund (continued)

Investment Manager's report (continued)

Investment objective and policies (continued)

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington India Focus Equity Fund launched on November 29, 2013. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023					
	6 mths	1 year	3 years	5 years	Since inception	
USD GD	8.44%	14.33%	18.42%	12.31%	9.17%	November 29, 2013

Wellington Management Funds (Ireland) plc

Wellington Pan European Small Cap Equity Fund

Investment Manager's report

Investment objective and policies*

The investment objective of the Fund was to seek long-term total returns.

The Investment Manager actively managed the Fund, seeking to outperform the MSCI Europe Small Cap Index (the "Index") and achieve the objective, primarily through investment in the equity and equity related securities of small capitalisation companies domiciled or operating in developed European markets. The Investment Manager used a bottom-up stock selection process, researching smaller capitalisation stocks to identify companies that the Investment Manager believed had the potential for significant long-term returns. For the purposes of this Fund, the Investment Manager defined small capitalisation companies as those whose market capitalisation was within the range of companies in the Index at the time of purchase, and developed markets as those included within the Index.

The assessment of Sustainability Risks through the analysis of ESG, factors was part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks could materially affect a company's financial performance and competitiveness. The Investment Manager incorporated ESG factors into the analysis of individual companies (including with regards to Sustainability Risk assessment), in the belief that ESG considerations were crucial in long-term investing; non-compliance could threaten the viability of the business and positive action could support growth. The Investment Manager conducted extensive due diligence around each investment because it believed that material ESG factors were also strategic business issues that could impact financial performance. Companies are reviewed based on ESG criteria which will differ from company to company but may include a company's actions to reduce carbon emissions in its operational footprint, its policy around water usage and how it works to understand and mitigate its supply chain risks, as well human capital management, e.g. employee retention or board composition. The Investment Manager used inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research.

The Investment Manager believed that the Fund was exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager drew upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of the assets over the time horizon of the Fund. Whilst Sustainability Risks vary from company to company those that are particularly relevant to the Fund include:

- Generally lower public information and disclosure in small capitalisation companies (in comparison to larger capitalisation companies) such that a greater level of engagement was required to identify risks.
- In the small capitalisation segment, higher levels of founder ownership were prevalent, which enhances governance related risks such concentration of control and reduced diversity.
- The Fund often invested in knowledge intensive businesses, where human capital was a key asset leading to risks such as critical knowledge being concentrated with key individuals.

Through interactions with company management teams, the Investment Manager sought a better understanding of these and other Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in assets where the likelihood of a Sustainability Risk event was under-represented in the price of the asset. The Investment Manager believed that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks. The Investment Manager also consulted its ESG analysts for insight on how Sustainability Risks may differed between companies within regional and sector peer groups.

It was not anticipated that any single Sustainability Risk could drive a material negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Fund invested, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund could buy and sell exchange-traded and OTC FDIs. The Fund could also invest in collective investment schemes and in ETFs that provided exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund could utilise them are further detailed in the Prospectus.

The Fund was suitable for retail investors seeking long-term total returns. Investors in the Fund have been prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund invested in securities of smaller companies which are less liquid, more volatile and tend to carry greater financial risk than securities of larger companies. The Fund was suitable as an investment in a well-diversified portfolio.

The Fund was denominated in EUR.

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI Europe Index (the "Index") and achieve the objective by investing predominantly in a diversified portfolio of European-domiciled companies that the Investment Manager believes will enjoy earnings and cash flow growth that are greater than the average earnings and cash flow growth of constituents of the Index.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of a security over the time horizon of the Fund.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index serves as a reference benchmark for performance comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in EUR.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Universal Vision Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the MSCI All Country World Index (the "Index") and achieve the objective, primarily through investment in equity and equity-related securities of companies worldwide, using a risk-managed framework, seeking to provide exposure to multiple equity 'factors'. Factors are common characteristics (for example, including but not limited to company valuation, company earnings growth, share price volatility) that apply to a group of issuers or securities and that are important in explaining the returns and risks of those issuers' securities.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In the Investment Manager's view, Sustainability Risks can materially affect a company's risk profile. The assessment of Sustainability Risks is integral to the investment philosophy of the Fund, the Investment Manager draws upon ESG ratings to determine any potential impact on the value of assets over the time horizon of the Fund, with aggregate ESG scores driving company weightings in the Fund. The Investment Manager is looking to limit exposure to assets where the likelihood of a Sustainability Risk event is under-represented in the price of the asset.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Index is integral to portfolio construction and is used for performance and WACI comparison purposes.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs that provide exposure to equity securities. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund may make a limited investment in securities traded on Russian markets and may invest up to 10% of its net asset value in China A Shares traded via Stock Connect.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Performance

The Wellington Universal Vision Fund launched on September 17, 2019. The table below details the performance of all funded share classes within the Fund.

Share class ¹	Total returns (%)					Inception date
	Periods ended June 30, 2023					
	6 mths	1 year	3 years	5 years	Since inception	
USD D	11.90%	12.65%	9.45%	N/A	6.94%	
MSCI All Country World Index	13.93%	16.53%	10.99%	N/A	8.94%	

¹All classes are accumulating and unhedged unless otherwise noted.

Fund returns are net of fees and expenses.

Returns for periods greater than one year are annualised.

Benchmark returns are expressed in the currency of the share class unless it is a hedged benchmark.

Past performance is no indication of current or future performance.

Wellington Management Funds (Ireland) plc

Wellington US Dynamic Equity Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek long-term total returns.

The Investment Manager will actively manage the Fund, seeking to outperform the S&P 500 Index (the "Index") and achieve the objective by investing primarily in a concentrated, high conviction portfolio of equity securities of US companies in combination with broad U.S. market exposure as represented by the Index.

The Fund will apply the Company's Exclusion Policy with respect to the portion of the Fund not invested in S&P 500 index futures, further details of which can be found in the Prospectus.

The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

The Fund does not consider the adverse impacts of its investment decisions on Sustainability Factors.

The Index serves as a reference benchmark for performance comparison purposes, as well as providing broad US market exposure as stated above.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics. The Fund may buy and sell exchange-traded and OTC FDIs. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

Whilst the Fund does not promote any specific ESG characteristics or have a sustainable investment objective, the assessment of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

The Fund is suitable for retail investors seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Wellington Management Funds (Ireland) plc

Wellington Multi-Asset Total Return Income Fund

Investment Manager's report

Investment objective and policies

The investment objective of the Fund is to seek a combination of long-term total returns with a regular income and actively manage downside risk.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing in a broad array of global assets such as equities, government bonds, investment grade and high yield credit (such as corporate bonds).

The Fund's investment strategy is based on the Investment Manager's belief that a consistent income combined with long-term capital growth can be achieved through the active management of assets and market exposures within a disciplined risk control framework.

The Fund does not consider a benchmark during portfolio construction or for performance comparison purposes.

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors, and the extent to which they will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by its team of global industry analysts) and external (such as company meetings) research to assess any potential impact on the value of a security over the time horizon of the Fund.

As the Fund is broadly diversified, it is not anticipated that any single Sustainability Risk will drive a material negative financial impact on the value of the Fund. Further details on Sustainability Risks considered and their potential impacts are included in the Prospectus.

Pre-contractual disclosure information relating to ESG characteristics, or objectives, of the Fund is provided in the Fund's Prospectus.

The Fund will invest, either directly or indirectly through the use of FDIs, in equity securities and other securities with equity characteristics and in debt securities. The Fund may buy and sell exchange-traded and OTC FDIs. The Fund may also invest in collective investment schemes and in ETFs. Full details of the types of securities and FDIs and the ways in which the Fund may utilise them are further detailed in the Prospectus.

The Fund is suitable for an investor seeking long-term total returns. Investors in the Fund should be prepared to accept, in normal market conditions, a high degree of volatility of net asset value from time to time. The Fund is suitable as an investment in a well-diversified portfolio. Investors in the Fund should be aware that, as set out in the Prospectus dividends may be declared out of the capital of the Fund.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund is denominated in USD.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Prospectus.

Wellington Management Funds (Ireland) plc

Notes to the financial statements

June 30, 2023

1. Accounting policies

The significant accounting policies adopted by the Company for the financial period ended June 30, 2023 are outlined below. These policies have been consistently applied to all years presented, unless otherwise stated.

Basis of preparation

These condensed unaudited financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS"), issued by the International Accounting Standard Board ("IASB") as adopted for use in the European Union and interpretations issued by the International Financial Reporting Interpretations Committee of the IASB. Specifically these financial statements have been prepared in accordance with IAS (International Accounting Standard) 34: Interim Financial Reporting. The accounting policies used in the preparation of these financial statements are consistent with those used in the Company's most recent annual financial statements for the financial year ended December 31, 2022. The condensed interim financial statements as at June 30, 2023 are unaudited. We note that the statutory auditor's report in the audited year end financial statements as at December 31, 2022 was unqualified.

These financial statements do not contain all of the information and disclosures required in the annual financial statements and should be read in conjunction with the annual audited financial statements of the Company for the financial year ended December 31, 2022 which were prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union (EU), in accordance with the provisions of the Irish Companies Act, 2014 and the UCITS Regulations. The same accounting policies and methods of computation have been followed in these financial statements as were applied in the preparation of the Company's annual financial statements.

Standards and amendments to existing standards effective January 1, 2023

There were no standards, interpretations or amendments to existing standards that are effective for the first time for the financial period beginning on January 1, 2023 that might have a material impact on the Company's financial statements.

New standards, amendments and interpretations effective after January 1, 2023 and have not been early adopted

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the Company's financial statements.

2. Foreign currency exchange rates

The following average exchange rates have been used to translate the foreign currency amounts in the combined statements for the statement of comprehensive income and the statement of changes in net assets attributable to holders of redeemable shares into US Dollars:

	June 30, 2023	December 31, 2022	June 30, 2022
EUR	0.9241	0.9529	0.9198
GBP	0.8060	0.8150	0.7773

For the purpose of combining the financial statements of each Fund to arrive at total figures for the financial period ended June 30, 2023, the amounts in the financial statements have been translated to USD at the exchange rate ruling at June 30, 2023 for the statement of financial position and at the average rate for the financial period for the statement of comprehensive income and the statement of changes in net assets attributable to holders of redeemable shares. The same approach was adopted for the financial year ended December 31, 2022 and financial period ended June 30, 2022. This method of translation has no effect on the net asset value per share attributable to the individual Funds. The foreign currency translation adjustment of USD 44,565,424 (June 30, 2022: USD (171,272,214)) included in the combined statement of changes in net assets attributable to holders of redeemable shares is due to the movement in exchange rates between January 1, 2023 and June 30, 2023 and to the difference between the average June 30, 2023 exchange rates used in combining the financial statements. This is a notional gain or loss which has no impact on the net asset value of the Funds.

The exchange rates used in preparing the financial statements are detailed in the Appendix 1 on pages 554 to 555.

3. Shares

Authorised

The authorised share capital of the Company is EUR 38,092 comprised of 30,000 subscriber shares of EUR 1.269738 each and 500,000,000,000 redeemable shares of no par value initially designated as unclassified shares. The unclassified shares are available for issue as shares.

Wellington Management Funds (Ireland) plc

Notes to the financial statements (continued)

June 30, 2023

3. Shares (continued)

Authorised (continued)

The subscriber shares are partly paid-up to the value of EUR 9,523 and as they do not form part of the shares of the Funds, they do not form part of the net asset value of the Funds.

They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's investment business.

Share rights

Subscriber shares do not entitle the holders to any dividend and, on a winding up, entitle the holders to receive the amount paid-up thereon but not otherwise to participate in the assets of the Company. At a general meeting, on both a show of hands and on a poll, the holder or holders of the subscriber shares shall only have one vote in respect of all subscriber shares.

The number of subscriber shares in issue as at June 30, 2023 was 30,000 (December 31, 2022: 30,000) (June 30, 2022: 30,000).

Unclassified shares ("shares") are entitled to such dividends as the Directors may from time to time declare and in the event of a winding up or dissolution of the Company, have the entitlements referred to in the Company's Prospectus. At a general meeting, for both a show of hands and on a poll, every holder of shares who is present in person or by proxy shall have one vote in respect of each whole share held by them. Shares are issued as redeemable participating shares. The issued redeemable participating share capital is at all times equal to the net asset value of the Company. The net asset value attributable to holders of redeemable participating shares of the individual Funds are at all times equal to the net asset value ("NAV") of the respective Fund. Redeemable participating shares are redeemable at the Shareholder's option and are classified as financial liabilities.

Redeemable shares

All redeemable shares issued by the Company provide Shareholders with the right to require redemption for cash at the value proportionate to the investor's share in the Fund's net assets at the redemption date. Such shares are classified as financial liabilities.

The shares are carried at the redemption amount that is payable at the statement of financial position date if the holder exercises its redemption right to put the shares back to the Funds. Shares are issued and redeemed at the Shareholders' option at prices based on the Funds' net asset value per share at the time of issue or redemption.

The number of redeemable participating shares as at June 30, 2023, December 31, 2022 and June 30, 2022 are as follows:

Wellington Management Funds (Ireland) plc

Notes to the financial statements (continued)

June 30, 2023

5. Fees

(a) Investment management fees

Investment management fees are calculated based on the NAV of each share class using the investment management fee rates applicable to each of the share classes. Investment management fees are accrued daily and paid monthly to the Investment Manager.

The investment management fee rates applicable to each of the share classes of each of the Funds are outlined later in this note. All percentages are unchanged from December 31, 2022 unless otherwise stated. These fees are included under 'investment management fees' in the statement of comprehensive income. The amounts payable are included under 'investment management fees payable' in the statement of financial position.

(b) Distribution fees

With respect to the class D and class DL shares of each Fund and in addition the class G shares of the Wellington Global Bond Fund, class GR shares of the Wellington Emerging Local Debt Fund, class UD shares of the Wellington Global Stewards Fund, class GD shares of the Wellington India Focus Equity and ED shares of the Wellington FinTech Fund the Company shall pay to financial intermediaries a distribution fee ranging from 0.30% to 1.45% per annum of the net assets attributable to those shares, as set forth in the Prospectus.

The distribution fee is paid to intermediaries to compensate the intermediary for distribution and shareholder services provided to underlying beneficial owners of Fund shares. The distribution fee is accrued daily and paid quarterly in arrears. Investors considering investing via an intermediary should be aware of these fees and the potential for conflict of interest that they create where, for example, an intermediary might be incentivised to recommend a particular Fund, or class of shares within a Fund, that has a higher distribution fee.

The distribution fee rates applicable to each of the share classes of each of the Funds are outlined later in this note. All percentages are unchanged from December 31, 2022 unless otherwise stated. These fees are included under 'distribution fees' in the statement of comprehensive income. The amounts payable are included under 'distribution fees payable' in the statement of financial position.

(c) Administrative fees

The Management Company shall be paid an administrative fee out of the assets of each Fund, attributable to the relevant class of shares. The Management Company is group entity of Wellington Management Group LLP (Wellington Group Entities). This administrative fee is calculated as a percentage of the daily net assets of the relevant class of shares, accrued daily in the net asset value of the class of shares and paid quarterly in arrears. The administrative fee rate will vary across Funds and classes of shares, reflecting the differing expenses of such Funds and/or classes of shares, but the maximum administrative fee that is paid shall not exceed 0.25% per annum for all classes of shares with the exception of classes N, BN, GD, GN, DL, D, ED and EN where the maximum administrative fee that is paid shall not exceed 0.40% per annum.

The administrative fee is paid for the provision of various services to the Funds. The purpose of the administrative fee is to provide a fixed level of fees to cover the expenses of the Funds for the various services provided, which expenses might otherwise be subject to fluctuation over time. The administrative fee ensures that the Funds are protected from these fluctuations, which would not be the case if the Funds were to pay such charges directly. Any increase in the maximum rate of the administrative fee shown above will only be implemented upon receipt of the affected Shareholders' approval.

The administrative fees are fixed which means that Wellington Group Entities will bear any costs and expenses incurred by the relevant class of shares in any period in excess of the administrative fee charged to the class of shares but conversely will be entitled to retain any amount of the administrative fee paid to it which exceeds the actual operating expenses incurred by the relevant class of shares during any period. Wellington Group Entities at their discretion may choose to waive a portion of the administrative fee at any time where they consider it appropriate to do so taking into account the level of assets in a particular Fund.

Further the Wellington Group Entities may instruct the Company to pay a portion of the administrative fee directly out of the assets of the Funds to any third-party service providers. In such case the administrative fee due to the Wellington Group Entities will be reduced by the same amount.

Wellington Management Funds (Ireland) plc

Notes to the financial statements (continued)

June 30, 2023

5. Fees (continued)

(c) Administrative fees (continued)

The administrative fee covers the following expenses, if applicable to the relevant class of shares:

- Depository fees and reasonable, properly incurred out of pocket expenses
- Administrator fees and reasonable out of pocket expenses
- Transfer Agent fees and reasonable out of pocket expenses
- fees relating to services provided to the Company by affiliates within the Wellington Management group, including, but not limited to, providing, procuring, overseeing, and/or monitoring of various services including administrative, domiciliary, corporate, risk management, regulatory compliance, reporting services and fees incurred by these entities and payable to third parties providing certain infrastructure and other support services
- fees in consideration of the services provided by the Distributor (and its affiliates) in establishing, servicing on an ongoing basis and administering relationships with financial intermediaries and distributors and the cost incurred, including the costs of performing diligence on financial intermediaries/distributors, the additional oversight of third parties service providers, and the provision of additional marketing support
- fees of the Directors of the Company who are not employed by affiliates of the Wellington Management group, as well as reasonable out of pocket expenses incurred in discharging their Directors' duties
- Auditor's and Company secretarial fees and reasonable out of pocket expenses
- professional costs (including, without limitation, the fees and disbursements of counsel, consultants, tax and other advisers or third-party support services) that may be incurred by the Company, the Depository, the correspondents or the Administrator or affiliates of the Wellington Management group while acting in the interest of the Shareholders
- the costs of taking out and maintaining any insurance policy in relation to the Company and/or its Directors
- any start-up costs associated with the creation of a new Fund or class and the offer of its shares
- the costs associated with preparing and/or filing, translating, distributing, or maintaining any materials or documents of the Company, including, without limitation, the Prospectus (as well as any amendments or supplements), Key Investor Information Documents, Fact sheets, websites, annual and semi-annual reports or other documents as may be required under the Articles of Association or under the applicable laws or regulations as well as registration or private placement costs incurred for purposes of distributing shares of the Company (including any lawyers', auditors' and other experts' fee in connection with the foregoing, as well as any administrative charges or taxes incurred) and the costs associated with ratings and/or ranking of Funds
- fees payable to third parties for currency management services in relation to the hedged share classes or SC and TC share class (with the exception of the Wellington Emerging Local Debt Advanced Beta Fund, where fees for services related to managing currency at the share class level are borne by the Investment Manager directly).

The funds use a volume discount mechanism ("VDM") which allows to pass on economies of scale achieved by a Fund reaching significant levels of assets.

The administrative fee rates applicable to each of the share classes of each of the Funds are outlined later in this note. All percentages are unchanged from December 31, 2022 unless otherwise stated. These fees are included under 'administrative fees' in the statement of comprehensive income. The amounts payable are included under 'administrative fees payable' in the statement of financial position.

Summary of fee rates per share class and Total Expense Ratios (TER)

The investment management fees, distribution fees, administrative fees and ongoing charges rates (which is the sum of those three fee types) applicable to each of the share classes of each of the Funds for the financial period ended June 30, 2023 are outlined below.

The below table also shows the ongoing charges rates for the financial year ended December 31, 2022 and the financial period ended June 30, 2022.

Details of share class launches and closures during the financial period ended June 30, 2023 are listed in the relevant Investment Manager's report.

Ongoing charges are equivalent to the total expense ratios calculated for the twelve months ended June 30, 2023, December 31, 2022 and June 30, 2022. Total Expense Ratios have been calculated in accordance with the Asset Management Association Switzerland guidelines dated May 16, 2008.

Wellington Management Funds (Ireland) plc

Notes to the financial statements (continued)

June 30, 2023

5. Fees (continued)

(d) Performance fees

In addition to the base investment management fee, the Investment Manager may also be paid a performance fee, based on the share class' net return or NAV per share (excluding any swing pricing adjustment) but inclusive of any performance fee previously accrued in respect of such performance period.

The period at the end of which the accrued performance fee is crystallised and paid (the "performance period") is generally the Company's fiscal year (January 1 - December 31), but may also begin or end mid-year in certain circumstances a) from the launch of a Fund or share class to the performance period end, b) from the previous performance period end to the closure of a Fund or share class. When this occurs, the performance period may be less than one calendar year.

The performance fee is crystallised at the end of the performance period and is paid as soon as practicable after the end of the relevant performance period. The end of the performance period is generally the Company's fiscal year end, except where a Fund or share class closes mid-year as described above. As well as crystallising at the end of each performance period, a proportion of accrued performance fees is crystallised on any dealing day (other than the last dealing day of the performance period) in which there is a net reduction in the number of shares in a share class but only in respect of such net reduction. Any accrued performance fee with respect to such net reduction of shares will crystallise on that dealing day and will be paid as soon as is practicable to the Investment Manager.

The calculation of the performance fee is verified by the Depositary and is based on unswung Fund net asset values.

This fee is included under 'performance fees' in the statement of comprehensive income. The amounts payable are included under 'performance fees payable' in the statement of financial position.

The below table also shows the actual performance fees incurred by share class of Fund and the relevant total expense TER during the previous twelve months ended June 30, 2023, December 31, 2022 and June 30, 2022 expressed as a percentage of the average net asset value of each Fund for the corresponding period.

* The % net assets is calculated based on the average net assets of each share class in the financial period.

For certain classes a High Water Mark, Performance Benchmark, Hurdle or Performance Benchmark with a High Water Mark may also be applicable:

(i) High water mark (HWM)

Where a HWM mechanism applies, a performance fee will be accrued on the basis of the increase in a share class' NAV per share in excess of the HWM, over a performance period, multiplied by the average number of shares in issue for the performance period calculated for each dealing day.

The average number of shares used for the performance fee calculation is calculated on each dealing day and adjusted on any dealing day in which there is a net reduction of shares in a share class. At the launch of a share class, the HWM means the initial issue price and is taken as the starting point for the performance fee calculation. If the NAV per share on the last dealing day of a performance period is higher than the previous HWM, the HWM is set to the NAV per share calculated at the end of the performance period.

To the extent that the share class' NAV per share did not exceed its HWM at the end of a performance period, the HWM is carried forward, and no performance fees will be accrued until the NAV per share of that share class exceeds its HWM in a subsequent performance period. When this occurs, the performance period will extend beyond one year and continue until the end of the next performance period when a performance fee does crystallise. The HWM will be adjusted for any distributions in the case of a distributing share class.

(ii) Performance benchmark

Where a performance benchmark applies, a performance fee may be accrued on the basis of a share class' net return per share in excess of the return of the performance benchmark over a performance period, multiplied by the average number of shares in issue for the performance period calculated on each dealing day.

June 30, 2023

5. Fees (continued)

(d) Performance fees (continued)

(ii) Performance benchmark (continued)

The average number of shares used for the performance fee calculation is calculated on each dealing day and adjusted on any dealing day in which there is a net reduction of shares in a share class. The performance benchmark is expressed in the denomination currency of the relevant share class, or for hedged share classes, hedged to the denomination currency of the relevant class. If the net return per share on the last dealing day of a performance period is higher than the performance benchmark over the same period, the performance fee will crystallise. The net return per share may exceed the performance benchmark and crystallise a performance fee even where the share class' NAV per share decreases.

To the extent that a class did not exceed its performance benchmark at the end of a performance period, no performance fee will accrue until the class' cumulative net return exceeds the cumulative performance benchmark return over the same period. When this occurs, the performance period will extend beyond one year and continue until the next fiscal year end that a performance fee does crystallise. The performance benchmark will be adjusted for any distributions in the case of a distributing share class.

(iii) Hurdle

Where a Hurdle mechanism applies, a performance fee may be accrued on the basis of a share class' NAV per share in excess of the Hurdle over a performance period multiplied by the average number of shares in issue for the fiscal year calculated on each dealing day. The average number of shares used for the performance fee calculation is calculated on each dealing day and adjusted on any dealing day in which there is a net reduction of shares in a share class. The Hurdle is the initial issue price of a share plus a predefined rate, set on a Fund by Fund basis. The Hurdle is calculated as a percentage of the initial Issue price, annualised to create a daily rate which is accrued daily for that performance period.

In the event that the NAV per share of a share class is higher than the accrued Hurdle on the last dealing day of that performance period, the performance fee will crystallise, and the Hurdle for the following year will be the previous performance period end NAV per share of that share class plus the predefined rate annualised, and accrued daily. To the extent that a share class' NAV per share does not exceed the Hurdle on the last dealing day of the performance period, no performance fee will crystallise, and the new Hurdle for the following year will be the Hurdle from the last dealing day of the previous performance period, plus a rate equal to the predefined rate, annualised and accrued daily. When this occurs, the performance period will extend beyond one year and continue until the end of the next performance period when a performance fee does crystallise.

Note that for any non-base currency classes which are unhedged, the performance fee accrual will be calculated based on the class' net return in excess of the Hurdle which may be positively or negatively impacted by currency differentials between the Fund's base currency and the currency of the unhedged class. As a result the performance fee for these classes may differ from the performance fees for hedged/base currency classes. The Hurdle for distributing share classes will be reduced for any distributions made with respect to such share classes.

(iv) Performance benchmark with HWM

Where a performance benchmark with a HWM applies, a performance fee will be accrued on the basis of a share class' net return per share in excess of the performance benchmark and the HWM, over a performance period, multiplied by the average number of shares in issue for the fiscal year calculated on each dealing day.

The average number of shares used for the performance fee calculation is calculated on each dealing day and adjusted on any dealing day in which there is a net reduction of shares in a share class. The performance benchmark is expressed in the denomination currency of the relevant share class, or for hedged share classes, hedged to the denomination currency of the relevant class. At the launch of a share class, the HWM means the initial issue price and is taken as the starting point for the performance fee calculation. If (i) the net return per share on the last dealing day of a performance period is higher than the performance benchmark over the same period and (ii) the NAV per share is higher than the previous HWM, then the performance fee will crystallise.

If the NAV per share on the last dealing day of a performance period is higher than the previous HWM, the HWM is set to the NAV calculated at the end of the performance period.

Wellington Management Funds (Ireland) plc

Notes to the financial statements (continued)

June 30, 2023

5. Fees (continued)

(d) Performance fees (continued)

(iv) Performance benchmark with HWM (continued)

To the extent that a share class' net return per share did not exceed its performance benchmark and the NAV per share did not exceed the HWM at the end of a performance period, no performance fee will accrue until the share class' cumulative net return exceeds the cumulative performance benchmark return and the NAV per share exceeds the HWM over the same period. When this occurs, the performance period will extend beyond one year and continue until the next performance period when a performance fee does crystallise. The HWM and performance benchmark will be adjusted for any distributions in the case of a distributing share class.

Fund name	Performance benchmark	Predefined rate* (for Hurdle)	HWM	Class	Performance fee
Wellington Durable Companies Fund	N/A	8%	-	S,D,N	10%
Wellington Enduring Assets Fund	N/A	8%	-	G,GD,GN	10%
Wellington US Dynamic Equity Fund	S&P 500 Index	-	-	S,D,N,E,EN	20%

* The predefined rate is an additional amount added to the Hurdle which is set on a Fund by Fund basis and approved by the Directors.

Due to differences in timing between their date(s) of investment and a class' performance fee calculation period, subscribers and Shareholders of the Fund should be aware that their own individual performance experience as a Shareholder may not be equivalent to the actual performance of the Fund on which the performance fee is calculated and paid, and the performance fee paid to the Fund may be higher or lower than the actual performance they experience as a Shareholder. Although a daily accrual of a portion of the performance fee in a class' net asset value mitigates some of these timing differences, the performance fee is calculated and paid based on the class' fiscal year assets and performance, not on the basis of a Shareholder's specific assets or performance.

The class' net return on which the performance fee is based, includes net unrealised gains and losses as at the end of each calculation period and as a result, a performance fee may be paid on unrealised gains which may subsequently never be realised. The performance fee is calculated prior to any dilution adjustments and is verified by the Depositary on a periodic basis. Performance fees are paid where the relevant high water mark is surpassed, which may be achieved due to market movements.

6. Related party transactions

Transactions with key management personnel

Related parties include the Company's Directors, the Investment Managers of the Funds, Wellington Global Administrator, Ltd as the Distributor of the Funds, Wellington Luxembourg S.à r.l. as the Management Company and the Wellington Group Entities as the receivers of the administrative fee.

At the date of these financial statements neither the Directors nor any associated person have any beneficial interest in the share capital of the Company or any options in respect of such capital.

For the financial period ended June 30, 2023 the amount earned by the Directors was \$100,097 and this is covered by the administrative fee (June 30, 2022: \$96,080).

Transactions with the Investment Managers and affiliates

Amounts earned by the Investment Managers, the Distributor and Wellington Group Entities are disclosed in the statement of comprehensive income. Performance fees earned are also disclosed in the statement of comprehensive income. Fee amounts payable at financial period end are disclosed in the statement of financial position. Details of the investment management, distribution, administrative and performance fee rates are disclosed in note 5.

6. Related party transactions (continued)

Transactions with the Investment Managers and affiliates (continued)

As at June 30, 2023 and December 31, 2022 Shareholders affiliated to one of the following Investment Managers: Wellington Management Company LLP, Wellington Management International Ltd, Wellington Management Singapore Pte Ltd and Wellington Management Hong Kong Limited owned shares in a number of the Funds, details of which are disclosed in the tables below.

A Fund has a concentration risk in relation to total Fund net assets in situations where most issued shares of the Fund are held by a small number of investors. In such a situation, if investors were to redeem all or a significant proportion of their investment, this could have an impact on the operations of the Fund, including the ability of the Fund to continue as a going concern. Funds with a single investor as at June 30, 2023 and December 31, 2022 are also disclosed in the table below.

Investors holding more than 20% of the shares of a Fund are presumed to be significant investors.

As at June 30, 2023 and December 31, 2022, there were no cross investments between Funds.

Cross trade

As part of this delegation, Wellington Group carries out order execution on behalf of the Funds. These orders are executed in accordance with Wellington Group policies and procedures. Occasionally Wellington Group may execute a purchase and a sale of the same security between client accounts (a "cross trade") for accounts eligible to participate in such trades. Wellington Group initiates such trades between eligible client accounts when it reasonably determines that the trade is consistent with the guidelines of the transacting client accounts and achieves best execution on behalf of each participating client account. During the period ended 30 June 2023 there were cross trades involving Wellington Emerging Market Development Fund and Wellington Emerging Markets Equity Fund. The cross trades have been carried out at arm's length and in the best interests of investors in the transacting Funds.

Dealings with connected persons

Regulation 43 of the UCITS Regulations "Restrictions on transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is a) conducted at arm's length; and b) in the best interest of the Shareholders of the UCITS".

Wellington Management Funds (Ireland) plc

Notes to the financial statements (continued)

June 30, 2023

6. Related party transactions (continued)

Dealings with connected persons (continued)

The Directors, as responsible persons are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

7. Dividends distributions

The following distributions were declared for Funds for the financial period ended June 30, 2023. For all other Funds there were no distributions declared.

8. Soft commission arrangements and directed brokerage

Soft commission transactions occur when the Investment Manager uses certain investment research services which assist in the management of a Fund's investments and which arrangements are paid for by certain brokers. These services may include, for example, research and analysis of the relative merits of individual shares or markets. In return, the Investment Manager places a proportion of business with these brokers including transactions relating to the Fund's investments. The Investment Manager has satisfied itself that it obtains best execution on behalf of the Funds and that these arrangements are to the benefit of the Funds.

There were soft commission transactions during the financial period ended June 30, 2023 in the following Funds:

Wellington All-China Focus Equity Fund, Wellington Durable Companies Fund, Wellington Durable Enterprises Fund, Wellington Emerging Market Development Fund, Wellington Emerging Markets Equity Fund, Wellington Emerging Markets Local Equity Fund, Wellington Emerging Markets Opportunities Fund, Wellington Enduring Assets Fund, Wellington FinTech Fund, Wellington Global Health Care Equity Fund, Wellington Global Impact Fund, Wellington Global Perspectives Fund, Wellington Global Property Fund, Wellington Global Stewards Fund, Wellington India Focus Equity Fund, Wellington Universal Vision Fund, Wellington US Dynamic Equity Fund and Wellington Multi-Asset Total Return Income Fund.

There were soft commission transactions during the financial year ended December 31, 2022 in the following Funds:

Wellington All-China Focus Equity Fund, Wellington Durable Companies Fund, Wellington Durable Enterprises Fund, Wellington Emerging Market Development Fund, Wellington Emerging Markets Equity Fund, Wellington Emerging Markets Local Equity Fund, Wellington Emerging Markets Opportunities Fund, Wellington Global Impact Fund, Wellington Global Perspectives Fund, Wellington Global Property Fund, Wellington Global Stewards Fund, Wellington India Focus Equity Fund, Wellington Universal Vision Fund, Wellington US Dynamic Equity Fund and Wellington Multi-Asset Total Return Income Fund.

There were no directed brokerage services utilised for the financial period ended June 30, 2023 and financial year ended December 31, 2022.

Wellington Management Funds (Ireland) plc

Notes to the financial statements (continued)

June 30, 2023

9. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 as amended. On that basis, it is not chargeable to Irish tax on its income and gains.

However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payments to Shareholders or any encashment, repurchase, redemption, cancellation, transfer or deemed disposal of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (i) a Shareholder who is not Irish resident and not ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997 as amended, are held by the Company or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (ii) certain exempted Irish tax resident investors who have provided the Company with the necessary signed statutory declarations.

Dividend income, interest and capital gains (if any) received on investments made by the Company may be subject to withholding and capital gains taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders, although where possible or appropriate, the Company may file for tax reclaims or exemptions.

10. Financial derivative instruments and other financial instruments

Some of the Funds make use of FDIs to aid in managing their risks and market exposures. Some of these FDIs also carry with them their own inherent risks. The FDIs are held in pursuit of the investment objectives of the Funds and for efficient portfolio management purposes, including hedging against risk. The FDIs and other financial instruments note should be read in conjunction with the schedule of investments, where details of the counterparties used and collateral held are disclosed. The types of FDIs used currently and the reasoning behind their use are summarised as follows:

Forward foreign exchange contracts

These are used both in order to hedge unwanted currency risk as well as to achieve a specific currency exposure. Forward foreign exchange contracts have the risk of currency exposure in the same way as a regular currency spot transaction.

Forward foreign exchange contracts are OTC traded and therefore have counterparty risk. Forward foreign exchange contracts also carry roll risk, which is the risk that when a forward contract expires, a new forward foreign exchange contract to replace the expired one cannot be put into place at the same cost or on the same hedge basis. This may occur due to changes in market liquidity or interest rates, resulting in a potential slippage or loss in the hedge position due to the contract expiration and roll.

Future contracts

Interest rate future contracts are used to both achieve targeted interest rate exposure as well as to hedge unwanted exposure. Future contracts are also frequently used to achieve targeted duration segments along the yield curve. Interest rate future contracts are exchange traded and carry the interest rate risk (duration) of the cheapest to deliver bond in the deliverable basket, or the otherwise contractually set interest rate risk. Bond future contracts with a basket of allowed deliverable bonds also carry so called basis risk that can affect the returns on the margin.

Currency future contracts are used in the Funds to hedge unwanted currency exposure as well as to gain access to exposures sought in the Funds. Currency future contracts are exchange traded and do not carry counterparty risk but have the same currency risk as the underlying currency transaction.

Options and swaptions

These are used to gain investment exposure and hedge exposures both in the global fixed income markets as well as the currency market. Options and swaptions can be both exchange traded as well as OTC FDIs. Options carry the delta weighted risk of the underlying asset such as a bond or a currency pair and swaptions carry the delta weighted risk of the underlying swaps. Options on a bond future also carry the same basis risk as the future contract. In addition, OTC traded FDIs have counterparty risk.

June 30, 2023

10. Financial derivative instruments and other financial instruments (continued)

Swaps

Interest rate and total return swaps are used to adjust sector exposures without paying the transaction costs associated with purchasing individual securities. Interest rate swaps are also used to adjust interest rate exposures at the individual country and aggregate Fund levels, while allowing for more precise yield curve positioning. Swaps are two party contracts and therefore carry counterparty risk. In addition, because swaps are two-party contracts and may have terms of greater than seven days, swap contracts may be considered to be illiquid or difficult to value.

A credit default swap is an instrument used to seek exposure or protection from a credit default event. Interest payments are made or received on a net basis on the stated payment dates and are recognised as gains or losses in the period in which they arise.

The Funds may enter into a credit default swap to isolate and transfer the credit risk associated with a particular reference asset. Credit default swaps provide a measure of protection against defaults of debt issuers. The use of credit default swaps does not assure their use will be effective or will have the desired result.

The Funds may either be the buyer or the seller in a credit default swap transaction. Credit default swaps are transactions under which the parties' obligations depend on whether a credit event has occurred in relation to the reference asset. The credit events are specified in the contract and are intended to identify the occurrence of a significant deterioration in the creditworthiness of the reference asset.

If a Fund is a buyer and no credit event occurs, that Fund's losses will be limited to the periodic stream of payments over the term of the contract. As a seller, the Fund will receive a fixed-rate of income throughout the term of the contract, provided that there is no credit event. If a credit event occurs, the seller must pay the buyer the full notional value of the reference obligation in exchange for such obligation or the difference between the notional and market values of the obligation, if agreed between the parties.

Interest rate and total return swaps are used to adjust sector exposures without paying the transaction costs associated with purchasing individual securities. Interest rate swaps are also used to adjust interest rate exposures at the individual country and aggregate Fund levels, while allowing for more precise yield curve positioning. Swaps are two party contracts and therefore carry counterparty risk. In addition, because swaps are two-party contracts and may have terms of greater than seven days, swap contracts may be considered to be illiquid or difficult to value.

TBAs

TBA commitments are forward agreements for the purchase or sale of mortgage-backed securities for a fixed price, with payment and delivery taking place beyond the customary settlement period. The specific securities to be delivered are not identified at the trade date; however, delivered securities must meet certain specified terms, including issuer, rate, and mortgage terms.

Warrants

Warrants are sometimes used to gain exposure to emerging market equities where custody, liquidity, or other issues make ownership of local shares sub-optimal. It is expected that warrants will have similar market risk characteristics as the underlying equity security. In addition, these instruments have issuer (counterparty) risk to the issuer of the warrant and may have different liquidity risks as deemed appropriate by the Investment Manager.

11. Financial assets and financial liabilities at fair value through profit or loss

In relation to fair value measurement, IFRS 13 Fair value measurement requires the Company to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. IFRS 13 requires an entity to provide a quantitative and qualitative analysis of those instruments recognised at fair value based on a three-level measurement hierarchy.

The fair value of bank loans is determined based on the liquidity score of the positions and the contributor depth scores.

Wellington Management Funds (Ireland) plc

Notes to the financial statements (continued)

June 30, 2023

11. Financial assets and financial liabilities at fair value through profit or loss (continued)

The fair value hierarchy has the following levels as defined under IFRS 13:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date.

Level 2 - Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices).

Level 3 - Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Furthermore, for those instruments which have significant unobservable inputs (level 3), IFRS 13 requires disclosures on the transfers into and out of level 3, a reconciliation of the opening and closing balances, total gains and losses for the period split between those recognised in the statement of comprehensive income and recognised through the statement of total recognised gains and losses, purchases, sales issues and settlements, and a sensitivity analysis of assumptions used in determining the fair value of level 3 positions.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety.

For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Cash and cash equivalents, bank overdrafts, other short-term investments in an active market, cash held with/due to brokers and counterparties for open FDIs, cash received as collateral and collateral due to counterparties are categorised as level 1.

Sales awaiting settlement and other receivables (interest income receivable, dividends receivable and other debtors) include the contractual amounts for settlement of trades and other obligations due to the Company. Purchases awaiting settlement and other payables (expenses payable, distributions payable, withholding and capital gains tax payable) include the contractual amounts and other obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as level 2.

The redeemable shares can be repurchased by the Company at any time for cash equal to a proportionate share of the Company's net asset value. These shares are not traded on an active market. Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable shares.

The following tables analyse within the fair value hierarchy the Company's financial assets and financial liabilities measured at fair value as at June 30, 2023 and December 31, 2022.

Investments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded FDIs, US government treasury bills and certain non-US sovereign obligations. The Company does not adjust the quoted price for these instruments.

Financial instruments that do not have quoted market prices but are valued based on market values, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include investment-grade corporate bonds, certain non-US sovereign obligations, bank loans and OTC FDIs. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently. Level 3 instruments include private equity, corporate debt securities and bank loans. As observable prices are not available for these securities, the Company has used valuation techniques to derive the fair value.

As at June 30, 2023 the valuation methodology for the level 3 positions held on the Wellington Blended Opportunistic Emerging Markets Debt Fund, Wellington Opportunistic Emerging Markets Debt Fund, Wellington Opportunistic Fixed Income Fund and Wellington World Bond Fund are based on the last available price.

As at June 30, 2023 the valuation methodology for the level 3 positions held on the Wellington Opportunistic Fixed Income Fund, Wellington Emerging Market Development Fund, Wellington Emerging Markets Opportunities Fund, Wellington Global Impact Fund, Wellington Universal Vision Fund and Wellington Multi-Asset Total Return Income Fund are based on the intrinsic value.

As at December 31, 2022 the valuation methodology for the level 3 positions held on the Wellington Opportunistic Fixed Income Fund is based on the last available price.

As at December 31, 2022 the valuation methodology for the level 3 positions held on the Wellington Emerging Market Development Fund, Wellington Emerging Markets Opportunities Fund, Wellington Global Impact Fund, Wellington Universal Vision Fund and Wellington Multi-Asset Total Return Income Fund are based on the intrinsic value.

The following tables present the transfers between levels for the financial period ended June 30, 2023. The values are presented in Fund's base currency.

Equities	(54,765)	-	54,765

The equity securities transferred out of Level 1 relate to positions that were either priced as stale or fair valued as at the financial period end. The debt securities transferred out of Level 2 relate to positions that resumed active trading during the reporting period. Transfers between levels of the fair value hierarchy, for the purpose of preparing the above table, are deemed to have occurred at the beginning of the reporting period.

Level 3 reconciliation

The following table shows a reconciliation of all movements in the fair value of financial instruments categorised within level 3 between the beginning and the end of the reporting period:

	Total June 30, 2023	Total December 31, 2022

Wellington Management Funds (Ireland) plc

Appendix 2 Securities financing transactions regulations (unaudited)

June 30, 2023

The Securities Financing Transactions Regulation (Regulation (EU) 2015/2365) ("SFTR") came into force on January 12, 2016 and, amongst other requirements, introduces new disclosure requirements in the Company's annual and semi-annual reports published after January 13, 2017 detailing the Company's use of securities financing transactions and total return swaps. Under Regulation (EU) 2015/2365 on transparency of securities financing transactions (SFTs) and of reuse, and amending Regulation (EU) No 648/2012, Article 13 requires UCITS investment companies to provide the following information on the use made of SFTs.

A Securities Financing Transaction (SFT) is defined as per Article 3(11) of the SFTR as:

- a repurchase transaction
- securities or commodities lending and securities or commodities borrowing
- a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at June 30, 2023, the Funds held reverse repurchase agreements and total return swaps which are types of securities in scope for the SFTR Reporting Disclosure Requirements.

1. Market value of assets engaged in securities financing transactions as at June 30, 2023

Below is the amount of assets engaged in each type of SFTs and total return swaps expressed as an absolute amount and as a proportion of the Funds' assets under management ("AUM"). The AUM is equivalent to the Funds' total net assets.

	Currency	Reverse repurchase agreements	% of AUM	Currency	Total return swaps notional	% of AUM
Wellington Blended Opportunistic Emerging Markets Debt Fund	USD	17,406,000	1.65	-	-	-
Wellington Opportunistic Fixed Income Fund	-	-	-	USD	54,946,991	5.77
Wellington Emerging Market Development Fund	-	-	-	USD	623,153	0.10
Wellington Emerging Markets Local Equity Fund	-	-	-	USD	437,283	0.10
Wellington Global Impact Fund	-	-	-	CAD	429,826	0.04

2a). Top 10 counterparties used for the reverse repurchase agreements held as at June 30, 2023*

Listed below are the top 10 counterparties in respect of reverse repurchase agreements including the name of the counterparty, volume of outstanding transactions and country in which the counterparties are established.

Counterparty Name	State Street Corporation
Country of Establishment	United States

* This list is a complete list of the counterparties for the reverse repurchase agreements held as at June 30, 2023, the market value of outstanding transactions for each Fund is as per table 1 above.

2b). Top 10 counterparties used for the total return swaps held as at June 30, 2023*

Listed below are the top 10 counterparties in respect of total return swaps including the name of the counterparty, volume of outstanding transactions and country in which the counterparties are established.

Fund name	Counterparty name	Currency	Gross value of outstanding assets	Gross value of outstanding liabilities
Wellington Opportunistic Fixed Income Fund	JPMorgan Chase	USD	-	28,870,000
Wellington Emerging Market Development Fund	Morgan Stanley	USD	3,546,991	22,530,000
Wellington Emerging Markets Local Equity Fund	Goldman Sachs	USD	-	266,537
Wellington Emerging Markets Development Fund	Morgan Stanley	USD	-	356,616
Wellington Emerging Markets Local Equity Fund	JPMorgan Chase	USD	19,830	-
Wellington Global Impact Fund	Morgan Stanley	USD	417,453	-
Wellington Global Impact Fund	Goldman Sachs	CAD	-	429,826
Counterparty name	Country of establishment			
Goldman Sachs	United States			
JPMorgan Chase	United States			
Morgan Stanley	United States			

* This list is a complete list of the counterparties for the total return swaps held as at June 30, 2023.

Wellington Management Funds (Ireland) plc

Appendix 2 Securities financing transactions regulations (unaudited) (continued)
