General information to Shareholders

Financial information on Wellington Management Funds (Luxembourg) II SICAV (the "Company")

The Company was incorporated on March 23, 2007. The Articles of Incorporation were published in Mémorial on June 14, 2007 and deposited with Register of Commerce and Companies on April 26, 2007. These Articles of Incorporation have been amended several times, most recently on April 22, 2020.

The Company publishes annual financial statements containing a list of each Fund's holdings, qualitative information on the Fund's holdings and their market values as of the end of the relevant period.

For information concerning issue and repurchase prices, purchases and sales of securities, the financial situation of the Company, and where copies of the annual report can be requested, contact:

State Street Bank International GmbH, Luxembourg Branch

49, Avenue J.F. Kennedy

L - 1855 Luxembourg

Grand Duchy of Luxembourg

Email: WellingtonGlobalTA@statestreet.com

Financial information concerning the Company shall be available at the registered office of the Company and of State Street Bank International GmbH, Luxembourg Branch every bank working day in Luxembourg.

Notices to Shareholders:

All notices to Shareholders shall be sent by email and/or by registered mail to the Shareholders at the address inscribed in the register of Shareholders. In addition, the Board of Directors may decide to inform the Shareholders by other means.

The list of changes in the statement of investments for the financial year ended September 30, 2023 is available at the registered office of the Company and Total Expense Ratio ("TER") figures are calculated in accordance with the requirements of AMAS ("Asset Management Association Switzerland") guidelines.

For Swiss investors:

BNP PARIBAS, Paris, Zurich branch, Selnaustrasse 16, CH-8002, Zürich, Switzerland, is the Swiss Representative and Paying Agent of the Company. The Articles of Incorporation, the Offering Memorandum, audited annual reports and the statement of changes in the composition of the Funds can be obtained free of charge from BNP PARIBAS. The Funds can only be distributed to Qualified Investors (as defined in Article 10, 3 (a) and (b) of the Swiss Federal Act on Collective Investment Schemes).

The Company and its agent may pay retrocessions as remuneration for distribution activity in respect of Fund shares in or from Switzerland. Retrocessions are included in TER. At the request of the investor, the Investment Manager must disclose the amounts of such rebates free of charge. In respect of the shares distributed in or from Switzerland, the place of performance and jurisdiction is the registered office of the Representative in Switzerland.

Wellington Management Funds (Luxembourg) II SICAV Report of the Board of Directors

September 30, 2023

WELLINGTON MANAGEMENT FUNDS (LUXEMBOURG) II SICAV (the "Company") is an open-ended investment fund organised under the Luxembourg Law of February 13, 2007 ("2007 Law") on specialised investment funds, as amended from time to time, and qualifies as an alternative investment fund ("AIF") pursuant to the law of July 12, 2013 on alternative investment fund managers ("AIFM Law") and the Directive (2011/61/EU) of the European Parliament and of the Council of June 8, 2011 on Alternative Investment Fund Managers and amending Directives 2003/41/EC and 2009/65/EC and Regulations (EC) No 1060/2009 and (EU) No 1905/2010 ("AIFMD"). The Company is an investment company with variable capital (société d'investissement à capital variable) of the umbrella type and was incorporated in Luxembourg on March 23, 2007 for an unlimited period. Wellington Luxembourg S.à r.l. acts as Alternative Investment Fund Manager ("AIFM") in accordance with the Luxembourg Law of July 12, 2013.

As at September 30, 2023, the Company consisted of six funds (the "Funds"):

- Wellington Global Total Return Fund Feeder Fund (SFDR Article 8)
- Wellington Commodities Fund (GBP Hedged Feeder)
- · Wellington Multi-Sector Credit Fund
- Wellington Global Multi-Asset Target Return Fund
- Wellington Responsible Values Multi-Sector Credit Fund (SFDR Article 8)
- Wellington Global Multi-Asset Target Return II Fund

The Funds subject to the disclosure requirements of Article 8 of the SFDR Regulation are presented in the Appendix 3 – Sustainable Finance Disclosure Regulation (SFDR) (Unaudited) to these financial statements.

The following Funds will invest substantially all of their assets through a "master-feeder" fund structure as follows:

Wellington Commodities Fund (GBP Hedged Feeder) in the Wellington Commodities Fund of Wellington Management Funds (Luxembourg) II.

Wellington Global Total Return Fund – Feeder Fund in the Wellington Global Total Return Fund of Wellington Management Funds (Luxembourg) II.

State Street Bank International GmbH, Luxembourg Branch serves as a Depositary, Administrator, Registrar and Transfer Agent and Paying Agent of the Company.

In relation to the financial reporting of the Company, the Board of Directors of the Company ("the Directors") assumes responsibility in accordance with article 52(4) of the Law of February 13, 2007, as amended. Accordingly this annual report includes a combined statement of net assets, a combined statement of operations and changes in net assets for the financial year, a report on the activities of the past financial year and the other information provided for Annex I to the Law of February 13, 2007, as amended, as well as any significant information in order to enable investors to make an informed judgment on the development of the activities and the results of the Company.

Corporate governance and ALFI (the Association of the Luxembourg Fund Industry)

Code of conduct

The preparation of the financial statements of the Company is carried out by State Street Bank International GmbH, Luxembourg Branch, as Administrator under the supervision of the Directors. In accordance with the Luxembourg laws and regulations, the Directors have put the procedures in place to ensure that appropriate internal controls relevant to accounting records, including the preparation and fair presentation of the financial statements are in place at the Company and its services providers, and otherwise to exercise oversight with respect to accounting estimates or judgments made in connection with the preparation of the financial statements. The Directors are satisfied that they have fully complied with these requirements.

The Directors are responsible for ensuring that a high level of corporate governance is met and consider that the Company has complied with the best practices in the Luxembourg funds industry.

In particular, the Directors have adopted the ALFI Code of Conduct (the "Code"), as last updated in 2022, which sets out principles of good governance.

The Directors meet at least four times a year and ensure that the AIFM maintains high standards of integrity and control in the Company's operations and that it possesses adequate governance and means of control as Luxembourg laws and regulation demand.

Report of the Board of Directors (continued)

September 30, 2023

Corporate governance and ALFI (the Association of the Luxembourg Fund Industry) (continued)

Code of conduct (continued)

The Directors consider that the Company has complied with the principles of the Code in all material aspects throughout the financial year ended September 30, 2023. The Directors undertake an annual review of ongoing compliance with the principles of the Code.

The invasion of Ukraine by Russia

The invasion of Ukraine by Russia which began on February 24, 2022 has increased valuation, liquidity and market risk for securities issued by Ukraine, Belarus and Russia, and to a lesser extent, most global markets. As of the date of this report the resolution of this event, and the full potential impact on the Funds, continues to be uncertain. Management continues to monitor developments that may impact financial markets including sanctions, currency repatriation restrictions, debt forgiveness or defaults, and any other actions by governments and developments of the crisis. Management will further assess the impact on the Funds' portfolio operations and valuation and will take any potential actions needed, as facts and circumstances are subject to change and may be specific to investment strategies and jurisdictions. Please refer to the country concentration table presented for each of the Funds in these financial statements to assess the exposure of the net assets to securities issued by companies in Russia, Ukraine or Belarus as of September 30, 2023.

Audit report

To the Shareholders of Wellington Management Funds (Luxembourg) II SICAV

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Wellington Management Funds (Luxembourg) II SICAV (the "Fund") and of each of its sub-funds as at 30 September 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined statement of net assets as at 30 September 2023;
- the statement of investments as at 30 September 2023;
- the combined statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and events
 in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative Represented by

Luxembourg, 7 March 2024

Wellington Global Total Return Fund – Feeder Fund

Investment Manager's Report September 30, 2023

Summary of Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The Wellington Global Total Return Fund – Feeder Fund seeks absolute returns above a cash benchmark over the medium to long term. The Fund seeks to achieve the objective through direct investments of up to 100% of its assets through a master–feeder structure in the Wellington Global Total Return Fund class T USD unit class of Wellington Management Funds (Luxembourg) II ("Master Fund"). The Master Fund will be managed in compliance with the principle of risk diversification. The investment objectives and policies of the Master Fund and the Master Fund's approach to i) Sustainability Risks, ii) integration of ESG characteristics, iii) consideration of the Principal Averse Impacts of the Level II SFDR Regulatory Technical Standards and iv) Regulation (EU) 2020/852 (Taxonomy) on the establishment of a framework to facilitate sustainable investment are described in detail in the Master Fund Offering Memorandum.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Master Fund is provided at the Appendix 3 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of this report.

The ICE Bank of America 3-Month T-Bill Index ("Index") will serve as the cash benchmark. The Index consists of short-term U.S. Government securities with a remaining term to final maturity of less than three months.

The Fund is denominated in US Dollars.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Offering Memorandum.

Report on Financial Activities of the Year

The Fund's gross excess returns were positive for the year ending September 30, 2023. Macro and credit strategies were positive while quantitative strategies detracted.

In macro strategies, rates strategies drove underperformance while currency strategies were negative.

Performance was positive in macro duration strategies, driven largely by our short duration positions in the United States, Germany, and the United Kingdom. In the US, even though inflation has decelerated from its 2022 high, it continues to hover at elevated levels. Amidst a robust economy, the Federal Reserve's hawkish stance has led to a repricing in the market. In the UK and Europe, yields ended higher amid growing concerns about persistently high inflation.

Within macro currency, a long JPY vs short USD detracted. The JPY declined as the BOJ opted to maintain its ultra-loose monetary policy despite more evidence of sustainable inflation and growing risks of foreign exchange interventions. Our short MXN vs long USD also detracted. MXN strengthened versus USD in the first half of 2023 on improving economic data, nearshoring trends, and rising capital investments from foreign investors. Negative performance was somewhat offset by our short EM FX (PLN, ZAR) vs long USD positions. EM FX declined broadly over the period as some emerging market central banks have begun cutting rates while others appears to be at the end of their hiking cycle.

Quantitative strategies had negative performance, with duration and FX strategies both detracting particulary in the first quarter of 2023. Our short duration bias at the aggregate portfolio level, held through January, detracted as global sovereign yields moved lower amid easing inflation signs and expectations central banks were closer to the end of their hiking cycle. This was offset in February as yields moved higher as a tight labor market weighed heavily on fixed income markets. During March, we were positioned short at the aggregate portfolio level which detracted as rates rallied following regional bank failures in the US. In currencies, Momentum-driven FX strategies positioned with a long dollar bias detracted as most currencies rallied versus the greenback in March following a dovish repricing of the Fed Funds rate.

Credit strategies were additive as spreads tightened. Most credit sectors saw spread tightening over the period amid continued strength in the economy.

Outlook

Global interest rates

Central banks have united in 'rate higher for longer' credo as unprecedented policy tightening seemingly reached a peak, though conditions on the ground varied across regions. Major central banks are now approaching the end of their hiking cycles, but the inflation battle might not be over. Inflation remains well above central banks' targets, and recent disinflationary factors seem to be running out of steam. We expect to see steeper curves in major economies with frontend rates potentially plateauing and the long end of curves moving upwards as higher inflation expectations become embedded in the system. We are positioned closer to neutral duration stance at the aggregate portfolio level with a yield curve steepening bias in the US, Europe and UK expressed via long the intermediate part of yield curves and short the back end.

Wellington Global Total Return Fund – Feeder Fund (continued)

Investment Manager's Report (continued) September 30, 2023

Outlook (continued)

Currency

We have a mixed outlook on the US dollar. Within the DM FX space, we are tactically trading USD against most G10 currencies. While we think most major central banks are nearing the end of their hiking cycle, dollar should weaken from its current, relatively elevated valuation. Stabilization of the Chinese economy should provide support for currencies with close trade ties to China (EUR, AUD). In contrast, the UK's longterm growth outlook remains concerning. The BOE's lack of willingness to tackle inflation and the country's historically outsized fiscal deficit against a backdrop of shrinking global liquidity will weigh on GBP. In EM FX, dollar valuation is on the lower end the historical range. EM currencies that are highly exposed to the global economic cycle and overvalued. EM central banks have already started cutting rates or are expected to cut soon given domestic inflation has come down meaningfully, whereas rate cuts are coming out of market pricing for DM central banks. During periods of flight to quality, we still expect USD to be well supported given its safehaven characteristics.

Performance

The Wellington Global Total Return Fund – Feeder Fund launched on March 31, 2010. The table below details the performance of all funded share classes within the Fund.

Wellington Commodities Fund (GBP Hedged Feeder)

Investment Manager's Report September 30, 2023

Summary of Investment Objective and Policy

The Wellington Commodities Fund (GBP Hedged Feeder) seeks long–term returns from direct investments of up to 100% of its assets through a master–feeder structure in the Wellington Commodities Fund class S GBP hedged unit class of Wellington Management Funds (Luxembourg) II ("Master Fund"). The Master Fund is managed in compliance with the principle of risk diversification. The Master Fund's investment approach is primarily based on proprietary top–down and bottom–up fundamental research. Quantitative analysis and technical models are also used.

The Fund will seek to achieve the objective through direct investments of up to 100% of its assets in the Master Fund GBP-Hedged Share Class. The Investment Manager will actively manage the Master Fund against the customised equal sector-weighted S&P Goldman Sachs Commodities index. The Master Fund will be managed in compliance with the principle of risk diversification. The investment objectives and policies of the Master Fund and the Master Fund's approach to Sustainability Risks and Regulation (EU) 2020/852 (Taxonomy) on the establishment of a framework to facilitate sustainable investment are described in detail in the Master Fund Offering Memorandum.

The Fund is denominated in Great Britain Pound.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Offering Memorandum.

Report on Financial Activities of the Year

The Fund underperformed the Strategic Benchmark for the year ended September 30, 2023. Sector allocation and commodity selection decisions drove relative outperformance, while contract selection detracted from returns.

Sector allocation decisions are primarily the result of bottom-up security positioning. An average underweight to the agriculture and livestock sector as well as average overweights to the energy and industrial metals sectors drove positive allocation effects at the portfolio level. Slightly offsetting these gains was an underweight allocation to the precious metals sector.

Commodity selection contributed to relative performance as all four sectors posted positive results. Within agriculture & livestock, our average underweight to wheat and an average overweight to corn were additive, while our decision to not own live cattle detracted. Within energy, an average underweight to US natural gas was the largest contributors, while an average underweight to heating oil slightly detracted. Positive security selection within the industrial metals sector was driven by an out-of-benchmark position in iron ore and an average underweight to nickel, while an average underweight to lead detracted. In precious metals, an average overweight to silver contributed, while an out-of-benchmark position in palladium modestly detracted.

Weak contract selection detracted from relative performance over the period. Within the energy sector, curve positioning within crude oil drove negative effects. Contract selection within agriculture and livestock, industrial metals and precious metals also detracted from relative results, due to curve positioning within corn, aluminum, and gold.

Outlook

Commodity markets continue to wrestle with the dueling market drivers of structural scarcity and cyclical macro headwinds. While economic risks persist in the short term and the macro-outlook remains uncertain, we have high conviction that commodities offer a compelling structural investment opportunity supported by an attractive roll yield, mid-single digit collateral returns and rising production costs. These all lead commodities to behave entirely differently than the last cycle.

Commodities went through a decade of very weak returns from 2010-2019. While spot returns were flat for the decade, an underappreciated part of the story was only earning 0.5% on collateral due to zero percent cash rates and the roll yield negatively compounding due to oversupply issues. This annual headwind has turned into a tailwind. During the recent drawdown, the collateral yield has been positive and has continued to improve as the Fed has increased rates. Additionally, the roll yield return has been positive as inventories have remained low despite the economic weakness. The positive contribution of roll yield over the last two years and collateral return illustrates the ability for commodity futures returns to compound over time. Critically, we believe the structural backdrop and key commodity-specific factors present a strong foundation for the asset class. Inventories remain low across all four commodity sectors, which should support backwardated futures curves and an attractive roll yield. As such, we believe that corrections related to a weakening macro environment should be viewed as buying opportunities, especially when prices approach incentive costs of production. And as macro concerns recede, prices have the potential to return quickly to demand destruction levels, given the absence of the typical cushion presented by inventories and spare capacity.

Wellington Commodities Fund (GBP Hedged Feeder) (continued)

Investment Manager's Report (continued) September 30, 2023

Outlook (continued)

Energy continues to demonstrate both a compelling bear and bull case for through the end of 2023. The bear case continues to center on concerns over demand destruction driven by macro concerns. The bull case focuses on supply-side initiatives that could drive the market into a deficit, including production cuts implemented by OPEC+ nations (including discretionary cuts by Saudi Arabia) and ongoing discipline from US shale producers. We view a higher probability for upside asymmetry in oil prices as we believe the market is underestimating the impact that OPEC+ actions will have on oil balances through the end of the year, all while demand indicators are generally showing resilience. We believe we are in one of the larger oil market deficits in several quarters, which should support prices and the roll yield.

Across Europe, energy concerns continue, given the significant reductions in natural gas flows from Russia, particularly via Nord Stream 1 and 2 pipelines, which have halted operations. However, benign weather has led to higher-than-expected storage at this time of year, making the near-term situation in Europe more manageable. We continue to monitor demand from Asia, recognizing that a surprise to the upside could heavily impact prices given limited supply levers.

In the US, natural gas prices have been under pressure from near-term production increases, complications at a key liquified natural gas (LNG) export terminal, which had allowed inventories to grow, and higher storage levels driven by a warmer than expected winter. With prices reflecting these headwinds, we view the price environment as more balanced, at least until a new wave of US LNG export capacity comes online toward the end of 2024.

We continue to expect divergence of short-term fundamentals within the industrial metals complex. We continue to see favorable trends for copper, while nickel fundamentals look troubled. In China, we have seen real estate completions and growth in renewables, which have helped drive a drawdown in copper inventories. Meanwhile in nickel, expectation for an increase in lower quality Indonesian nickel pig-iron inventories driven by higher quality nickel usage in Chinese EV batteries along with weakening stainless steel demand, should weigh on prices. That said, we find the medium- to long-term outlook for metals particularly attractive, as the energy transition represents a significant driver of incremental demand for copper, nickel, and other metals. Add this to the persistent underinvestment scenario, and we anticipate a strong long-term setup for these commodities.

Within precious metals, as concerns over the regional banking crisis and debt ceiling have waned, we see a less constructive setup for gold and silver in the short-term. On the other hand, within the platinum group metal (PGM) complex, we continue to see strong fundamentals for platinum. We expect a structural deficit in platinum driven by underestimated demand trends and limited additional supply. "Green" regulations for vehicles globally are likely to continue to intensify the need for the metal, which is leveraged to reduce emissions within internal combustion engines (ICE) and in medium/heavy duty vehicles where EV adoption is not as prevalent.

Within agriculture, weaker fundamentals for corn driven by high planted corn acreage and a strong Brazilian crop should lead to inventories rebuilding. On the other hand, we have a favorable view of the soybean complex, as we anticipate balances tightening through the end of the year. Soybeans are currently undervalued under our process given a backup of exports on the Mississippi River due to low levels of precipitation, which has disrupted shipping.

Performance

The Wellington Commodities Fund (GBP Hedged Feeder) launched on March 29, 2007. The table below details the performance of all funded share classes within the Fund.

Wellington Multi-Sector Credit Fund

Investment Manager's Report September 30, 2023

Summary of Investment Objective and Policy

The Wellington Multi-Sector Credit Fund seeks long-term total returns. The Investment Manager will actively manage the Fund and seeks to achieve the objective by allocating its assets primarily across a broadly diversified portfolio of both direct and derivative credit instruments including emerging market debt, high yield debt, and bank loans. The Fund is not constructed relative to a benchmark and does not use a benchmark for performance comparison purposes. The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities. The Fund does not consider the adverse impacts of its investment decisions on Sustainability Factors.

Sustainability Risk consideration

Whilst the Fund does not promote any specific environmental, social and governance (ESG) characteristics or have a sustainable investment objective, the evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers environmental, social and governance ("ESG") factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of the security over the time horizon of the Fund.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under "Sustainability Risks" within the section of the Prospectus entitled "Risk Factors".

The Fund is denominated in US Dollars.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Offering Memorandum.

Report on Financial Activities of the Year

The Fund generated a gross total return of 10.41% (USD, unhedged) for the year ended September 30, 2023. Allocations to emerging markets debt (sovereign, local, and corporate debt), as well as positioning within global high yield and bank loans contributed the most to the Fund's 12-month performance. Global economic data remained resilient over the period, though it diverged across regions. Global fixed income sectors generated mixed total returns during the trailing twelve months amid elevated interest rate volatility, particularly over the second half of the period. US Treasuries and agency mortgages generated negative returns while corporates produced positive returns. Higher-yielding sectors generally outperformed, benefiting from their coupon advantage and spread tightening. Performance across most securitized sectors rebounded by the end of the period as markets absorbed the FDIC asset sales of mortgage-backed securities. Inflation showed signs of peaking but at levels well above central bank targets and wages remained elevated. Sovereign yields rose over the period amid multiple rate hikes from the Fed and other major central banks across Europe, while Asian central banks pursued more dovish approaches.

Despite concerns about tighter lending standards following turmoil in the banking sector, credit sectors produced positive excess returns over duration-equivalent government bonds as spreads narrowed. Exposure to developed market high yield was the main positive contributor to performance within credit, particularly an allocation to industrials and financials, as well as our credit derivative index exposure. Within bank loans, security selection within industrials contributed favorably to performance. An allocation to convertible bonds, focusing on digitization and healthcare innovation themes, also benefited returns.

Within EM debt, the Fund maintained an allocation to select emerging markets sovereign external, local, and corporate debt throughout the period. Emerging markets debt (EMD) positioning, hard-currency sovereign debt (in particular African nation issuers), EM corporates (primarily materials and energy sectors), and local debt (mainly Russia) contributed positively to results during the period as spreads compressed.

Wellington Multi-Sector Credit Fund (continued)

Investment Manager's Report (continued) September 30, 2023

Report on Financial Activities of the Year (continued)

The Fund's allocations to securitized sectors benefited performance amid generally resilient economic data. An allocation to non-agency residential mortgage-backed securities (NA RMBS) helped results the most within securitized sectors. We believe low supply will continue to support the housing market and offset weak affordability. Asset backed securities (ABS) and commercial mortgage-backed securities (CMBS) also helped performance. Meanwhile, an allocation to agency mortgage-backed securities (MBS) passthroughs hurt performance during the period as interest rate volatility remained elevated.

Tactical duration/yield curve positioning benefited performance. We also maintained exposure to Treasury Inflation Protected Securities (TIPS) as we continued to believe the TIPS market was underpricing inflation expectations. This positioning had a negative impact on results as real yields increased by more than breakeven inflation rates over the period.

Outlook

We believe the resilient consumer has delayed a US economic growth slowdown, indicating Fed policy may be working with a longer lag than past cycles, and that the effect of tighter lending standards will likely be uneven. The Fund is positioned for a steepening of yield curve and with a below average credit risk profile, while preserving liquid instruments to take advantage of future dislocations.

We believe high yield spreads reflect an optimistic soft-landing scenario and bouts of volatility could create better entry points to add exposure. We favor European high yield credit over US high yield, particularly banks, that we expect will outperform, buoyed by fiscal support.

We believe bank loans offer diversification benefits and valuations appear attractive. We continue to favor issuers with strong and sustainable cash flows and pricing power.

We believe EM fundamentals are supported by sufficient balance of payments, improved fiscal deficits, supportive of commodity prices, and inflation that is expected to wane. We maintain a pro-risk lean within the EM allocation with a focus on exporters and countries with good macro policies.

Within structured finance, we believe low supply will continue to support the housing market and offset weak affordability. We favor seasoned residential mortgages and remain opportunistic in buying dislocated commercial mortgages and collateralized loan obligations.

We hold select exposure to convertible bonds in the digitization and healthcare innovation sectors, which offer exposure to issuers with strong upside potential benefiting from positive convexity.

Performance

The Wellington Multi-Sector Credit Fund launched on January 15, 2014 with an S GBP (hedged) share class. The table below details the performance of all funded share classes within the Fund.

Wellington Global Multi-Āsset Target Return Fund

Investment Manager's Report September 30, 2023

Summary of Investment Objective and Policy

The investment objective of the Fund is to seek total returns, targeting 3% (net of investment management fee) above the 3 month Singapore Overnight Rate Average ("SORA") over the medium to long term. There is no guarantee that the Fund will meet this objective.

The Investment Manager will actively manage the Fund, seeking to achieve the objective by investing in a diverse range of global asset classes while employing a disciplined multi-layered risk management process.

As stated in the objective SORA will serve as the Fund's cash benchmark. SORA is the average interest rate at which banks and financial institutions in Singapore borrow from each other overnight. A similar cash benchmark may be used for non-SGD currency share classes. For example, for USD share classes this would be the ICE Bank of America 3-month US Treasury Bill Index instead of SORA.

Sustainability Risk consideration

Whilst the Fund does not promote any specific environmental, social and governance ("ESG") characteristics or have a sustainable investment objective, the evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process. In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of the security over the time horizon of the Fund.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The Fund is denominated in US Dollars.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Offering Memorandum.

Report on Financial Activities of the Year

The Wellington Global Multi-Asset Target Return Fund was positive on a total return basis for the one-year period ending September 30, 2023. Positive performance was led by global equities, global fixed income and gold while partly offset by risk management and active asset allocation.

Within global equities, performance was positive across the regions, with gains led by Europe and the United States as both economies remained on a solid footing in the face of resilient macroeconomic data. On a sector level, financials and information technology drove performance. Overall gains were partly offset by our equity risk management hedges. Within global fixed income, investment grade credit and nominal government bonds contributed to gains as a result of tightening spreads and carry. Gold also added to performance on the back of the banking crisis and geopolitical tensions. Lastly, our active asset allocation detracted over the period, driven by our short Europe and US equity positions, while partially mitigated by gains from our strategic short Europe and US duration positions and long Japanese equity positions.

Wellington Global Multi-Asset Target Return Fund (continued)

Investment Manager's Report (continued) September 30, 2023

Report on Financial Activities of the Year (continued)

During this volatile period, we have focused on risk management to help mitigate downside risks. We have in place a distinct process dedicated to risk identification and portfolio protection. Duration has traditionally offered protection during tumultuous equity markets, however the positive correlation between the two asset classes has highlighted the need for dynamic risk management. Over the period, we were nimble in adjusting our equity exposure and duration positioning via hedges amidst volatile market conditions. The portfolio has -1.4% in equity hedges as of end-September. We believe that our dynamic approach will allow us to de-risk quickly as markets become more challenged, while allowing us to re-risk efficiently to capture periods of recovery.

Looking ahead, we maintain a slightly cautious stance and favour defensive fixed income over equities. We still believe the distribution of risks for the global economy is skewed to the downside. While the effects of tighter policy are playing out with more of a lag than in the past, there will eventually be a monetary overhang, which implies lower equity valuations and downgrades in earnings expectations. That said, we have reduced our underweight views on global equities. We think the lower interest rate sensitivity of consumers and businesses, and the overall strength of the consumer, make a US hard landing less likely.

Within equities, we continue to focus on quality, preferring companies that can withstand ongoing inflationary and balance-sheet pressures. On a regional basis, we retain our conviction in Japan as we believe there is more upside as markets continue to engage with strong policy support and improved corporate governance and capital return to shareholders. We have reduced our slight underweight to US amidst the resilience of the economy and this was funded by a modest underweight to European equities driven by stagflationary risks. We have a neutral stance on Emerging Markets and China due to uncertainty in the long-term growth trajectory and policy makers motivations. Within defensive fixed income, we maintain our modest overweight stance. On a regional basis, we think Japan's real yields stand out as the most negative while weaker growth in Europe and high real yields in the US present better relative value. We have an improved outlook on investment grade credit which we believe will be better positioned to weather economic troubles and maintain our neutral stance. On gold, we are keeping it at a moderate overweight as we believe it is positioned well as a medium-term beneficiary of higher stagflationary risks, geopolitical deterioration, and/or de-dollarisation.

At the end of September 2023, the ex-ante value at risk (VaR) was 3.5%, and the ex-post VaR was 13.6%.

Our objective remains to protect your capital while also delivering on your return objectives in the medium to long term.

Performance

The Wellington Global Multi-Asset Target Return Fund launched on April 20, 2016 with S USD and S SGD (hedged) share classes. The table below details the performance of all funded share classes within the Fund.

Total Returns (%) Periods ended September 30, 2023

| | | | | | Since | |

Wellington Responsible Values Multi-Sector Credit Fund

Investment Manager's Report September 30, 2023

Summary of Investment Objective and Policy

The Fund is subject to the disclosure requirements of Article 8 of the SFDR.

The Wellington Responsible Values Multi-Sector Credit Fund seeks long-term total returns. The Investment Manager will actively allocate assets across a broadly diversified portfolio of credit instruments from an opportunity set which restricts investment in certain industries, mainly fossil fuels, conventional weapons, tobacco and cannabis. The investment universe consists of a broad range of credit sectors including high yield, bank loans, emerging market debt, securitized debt, investment grade credit, and convertible bonds. The Fund is not constructed relative to a benchmark and does not use a benchmark for performance comparison purposes.

Sustainability Risk consideration

The evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process as, in the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of global industry analysts) and external research (such as company meetings) to assess any potential impact on the value of the security over the time horizon of the Fund. While these risks vary from company to company, those that are particularly relevant include where changes in climate are posing an increasing risk to some issuers. Where data is available and considered to be material, climate change factors can be incorporated into the assessment of credit risk and security selection, using a framework which considers two key types of climate risk: physical risk and transition risk.

Through interactions with company management teams, the Investment Manager seeks a better understanding of any underlying Sustainability Risks, incorporating them into their assessments of a company's outlook, and looking to avoid investments in assets securities where the likelihood of a Sustainability Risk event is under-represented in the price of the security. The Investment Manager believes that active engagement with companies can support changes in corporate behaviour and actions that benefit the Fund and help mitigate Sustainability Risks.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

Pre-contractual disclosure information relating to the ESG characteristics, or objectives, of the Fund is provided at the Appendix 3 - Sustainable Finance Disclosure Regulation (SFDR) (unaudited) of this report.

The Fund is denominated in US Dollars.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Offering Memorandum.

Report on Financial Activities of the Year

The Fund generated a gross total return of 10.70% (USD, unhedged) for the year ended September 30, 2023. Allocations to emerging markets debt (sovereign, local, and corporate debt), as well as positioning within global high yield and bank loans contributed the most to the Fund's 12-month performance. Global economic data remained resilient over the period, though it diverged across regions. Global fixed income sectors generated mixed total returns during the trailing twelve months amid elevated interest rate volatility, particularly over the second half of the period. US Treasuries and agency mortgages generated negative returns while corporates produced positive returns. Higher-yielding sectors generally outperformed, benefiting from their coupon advantage and spread tightening. Performance across most securitized sectors rebounded by the end of the period as markets absorbed the FDIC asset sales of mortgage-backed securities. Inflation showed signs of peaking but at levels well above central bank targets and wages remained elevated. Sovereign yields rose over the period amid multiple rate hikes from the Fed and other major central banks across Europe, while Asian central banks pursued more dovish approaches.

Wellington Responsible Values Multi-Sector Credit Fund (continued)

Investment Manager's Report (continued) September 30, 2023

Report on Financial Activities of the Year (continued)

Despite concerns about tighter lending standards following turmoil in the banking sector, credit sectors produced positive excess returns over duration-equivalent government bonds as spreads narrowed. Exposure to developed market high yield was the main positive contributor to performance within credit, particularly an allocation to industrials and financials, as well as our credit derivative index exposure. Within bank loans, security selection within industrials contributed favorably to performance. An allocation to convertible bonds, focusing on digitization and healthcare innovation themes, also benefited returns.

Within EM debt, the Fund maintained an allocation to select emerging markets sovereign external, local, and corporate debt throughout the period. Emerging markets debt (EMD) positioning, hard-currency sovereign debt (in particular African nation issuers), EM corporates (primarily industrials and utilities sectors), and local debt (mainly Romania and Hungary) contributed positively to results during the period as spreads compressed.

The Fund's allocations to securitized sectors benefited performance amid generally resilient economic data. An allocation to non-agency residential mortgage-backed securities (NA RMBS) helped results the most within securitized sectors. We believe low supply will continue to support the housing market and offset weak affordability. Asset backed securities (ABS) and commercial mortgage-backed securities (CMBS) also helped performance. Meanwhile, an allocation to agency mortgage-backed securities (MBS) passthroughs hurt performance during the period as interest rate volatility remained elevated.

Tactical duration/yield curve positioning benefited performance. We also maintained exposure to Treasury Inflation Protected Securities (TIPS) as we continued to believe the TIPS market was underpricing inflation expectations. This positioning had a negative impact on results as real yields increased by more than breakeven inflation rates over the period.

Outlook

We believe the resilient consumer has delayed a US economic growth slowdown, indicating Fed policy may be working with a longer lag than past cycles, and that the effect of tighter lending standards will likely be uneven. The Fund is positioned for a steepening of yield curve and with a below average credit risk profile, while preserving liquid instruments to take advantage of future dislocations.

We believe high yield spreads reflect an optimistic soft-landing scenario and bouts of volatility could create better entry points to add exposure. We favor European high yield credit over US high yield, particularly banks, that we expect will outperform, buoyed by fiscal support.

We believe bank loans offer diversification benefits and valuations appear attractive. We continue to favor issuers with strong and sustainable cash flows and pricing power.

We believe EM fundamentals are supported by sufficient balance of payments, improved fiscal deficits, supportive of commodity prices, and inflation that is expected to wane. We maintain a pro-risk lean within the EM allocation with a focus on exporters and countries with good macro policies.

Within structured finance, we believe low supply will continue to support the housing market and offset weak affordability. We favor seasoned residential mortgages and remain opportunistic in buying dislocated commercial mortgages and collateralized loan obligations.

We hold select exposure to convertible bonds in the digitization and healthcare innovation sectors, which offer exposure to issuers with strong upside potential benefiting from positive convexity.

Wellington Responsible Values Multi-Sector Credit Fund (continued)

Investment Manager's Report (continued) September 30, 2023

Performance

Wellington Responsible Values Multi-Sector Credit Fund launched on August 11, 2020 with N, S, T USD, S GBP (hedged) and S GBP M1 (hedged-distributing) share classes. The table below details the performance of all funded share classes within the Fund.

> Total Returns (%) Periods ended September 30, 2023

| | | | | Since | |
|--------------------------------------|---------|--------|----------|------------|-----------------|
| | 6 Mths* | 1 Year | 3 Years* | Inception* | Inception Date |
| Class N USD | 1.16% | 9.95% | (0.25%) | (0.23%) | August 11, 2020 |
| Class S USD | 1.21% | 10.06% | (0.15%) | (0.12%) | August 11, 2020 |
| Class T USD | 1.45% | 10.58% | 0.29% | 0.32% | August 11, 2020 |
| Class S GBP (hedged) | 0.82% | 8.63% | (1.10%) | (1.06%) | August 11, 2020 |
| Class S GBP M1 (hedged-distributing) | 0.82% | 8.63% | (1.09%) | (1.05%) | August 11, 2020 |

The Fund is a Non-benchmark relative strategy.

Returns are net of fees and expenses.

Returns for periods of greater than one year are annualised.

Wellington Global Multi-Āsset Target Return II Fund

Investment Manager's Report September 30, 2023

Summary of Investment Objective and Policy

The investment objective of the Fund is to seek total returns above a cash benchmark over the medium to long term, investing in a diverse range of global asset classes while employing a disciplined multi-layered risk management process. Wellington Global Multi-Asset Target Return II Fund is not constructed relative to a benchmark, but the ICE Bank of America 3-month US Treasury Bill Index (the "Index") will serve as the cash benchmark. The Index consists of short-term U.S. Government securities with a remaining term to final maturity of less than three months.

Sustainability Risk consideration

Whilst the Fund does not promote any specific environmental, social and governance ("ESG") characteristics or have a sustainable investment objective, the evaluation of Sustainability Risks through the analysis of ESG factors is part of the Fund's investment process.

In the Investment Manager's view, Sustainability Risks can materially affect a company's financial performance and competitiveness. However, Sustainability Risks are just some of a number of considerations in the overall research process so may not in isolation drive the selection or exclusion of an issuer or security from the investment universe.

The Investment Manager considers ESG factors as part of its broader analysis of individual issuers (including with regards to Sustainability Risk assessment), using inputs from the Investment Manager's team of ESG analysts to help identify global best practices, prepare for company engagement and collaborate on new research inputs. The factors which will be considered will vary depending on the security in question, but typically include ownership structure, board structure and membership, capital allocation track record, management incentives, labour relations history, and climate risks.

The Investment Manager believes that the Fund will be exposed to a broad range of Sustainability Risks. In assessing these risks, the Investment Manager draws upon a wide variety of internal (such as research by their team of Global Industry Analysts) and external research (such as company meetings) to assess any potential impact on the value of the security over the time horizon of the Fund.

It is not anticipated that any single Sustainability Risk will materially drive a negative financial impact on the value of the Fund. Further details on the Sustainability Risks considered and their potential impacts are included under Sustainability Risks within the section of the Prospectus entitled Risk Factors.

The Fund is denominated in US Dollars.

The full investment objective and policies including the details of the types of securities and the ways in which the Fund may invest in them are set out in the Fund's Supplement section of the Offering Memorandum.

Report on Financial Activities of the Period

The Wellington Global Multi-Asset Target Return II Fund was positive on a total return basis for the one-year period ending September 30, 2023. Positive performance was led by global equities, global fixed income and gold while partly offset by risk management and active asset allocation.

Within global equities, performance was positive across the regions, with gains led by the United States and Europe as both economies remained on a solid footing in the face of resilient macroeconomic data. On a sector level, information technology and financials drove performance. Overall gains were partly offset by our equity risk management hedges. Within global fixed income, investment grade credit contributed to gains as a result of tightening spreads. Gold also added to performance on the back of the banking crisis and geopolitical tensions. Lastly, our active asset allocation detracted over the period, driven by our short Europe and US equity positions, while partially mitigated by gains from our strategic short Europe and US duration positions and long Japanese equity positions.

During this volatile period, we have focused on risk management to help mitigate downside risks. We have in place a distinct process dedicated to risk identification and portfolio protection. Duration has traditionally offered protection during tumultuous equity markets, however the positive correlation between the two asset classes has highlighted the need for dynamic risk management. Over the period, we were nimble in adjusting our equity exposure and duration positioning via hedges amidst volatile market conditions. The portfolio has -1.2% in equity hedges as of end-September. We believe that our dynamic approach will allow us to de-risk quickly as markets become more challenged, while allowing us to re-risk efficiently to capture periods of recovery.

Wellington Global Multi-Asset Target Return II Fund (continued)

Investment Manager's Report (continued) September 30, 2023

Report on Financial Activities of the Period (continued)

Looking ahead, we maintain a slightly cautious stance and favour defensive fixed income over equities. We still believe the distribution of risks for the global economy is skewed to the downside. While the effects of tighter policy are playing out with more of a lag than in the past, there will eventually be a monetary overhang, which implies lower equity valuations and downgrades in earnings expectations. That said, we have reduced our underweight views on global equities. We think the lower interest rate sensitivity of consumers and businesses, and the overall strength of the consumer, make a US hard landing less likely.

Within equities, we continue to focus on quality, preferring companies that can withstand ongoing inflationary and balance-sheet pressures. On a regional basis, we retain our conviction in Japan as we believe there is more upside as markets continue to engage with strong policy support and improved corporate governance and capital return to shareholders. We have reduced our slight underweight to US amidst the resilience of the economy and this was funded by a modest underweight to European equities driven by stagflationary risks. We have a neutral stance on Emerging Markets and China due to uncertainty in the long-term growth trajectory and policy makers motivations. Within defensive fixed income, we maintain our modest overweight stance. On a regional basis, we think Japan's real yields stand out as the most negative while weaker growth in Europe and high real yields in the US present better relative value. We have an improved outlook on investment grade credit which we believe will be better positioned to weather economic troubles and maintain our neutral stance. On gold, we are keeping it at a moderate overweight as we believe it is positioned well as a medium-term beneficiary of higher stagflationary risks, geopolitical deterioration, and/or de-dollarisation.

At the end of September 2023, the ex-ante value at risk (VaR) was 3.5%, and the ex-post VaR was 14.3%.

Our objective remains to protect your capital while also delivering on your return objectives in the medium to long term.

Overview

The Fund has been managed in accordance with its investment objective and policy as set out in the Offering Memorandum.

Performance

Wellington Global Multi-Asset Target Return II Fund launched on July 1, 2021 with S USD and T SGD H1 (hedged-distributing) share classes. The table below details the performance of all funded share classes within the Fund.

| | Total Return | ns (%) | | | |
|--|----------------------------------|--------|------------|----------------|--|
| | Periods ended September 30, 2023 | | | | |

Notes to the financial statements

September 30, 2023

1. Significant events during the financial year

- (a) With effect from January 1, 2023, the following changes were implemented to the Offering Memorandum:
 - Pre-contractual disclosure information ("PCD") incorporated into the Offering Memorandum from 1st January for Article 8 and Article 9 Funds in line with the requirements of SFDR Level II. In addition, the do no significant harm ("DNSH") test which is applied to Sustainable Investments made by the Funds, will now take into account each of the mandatory corporate and/or sovereign Principal Adverse Impacts ("PAI's") under SFDR. This may result in divestment from certain holdings which no longer meet the new DNSH assessment.
- (b) Changes to the Board of Managers of the AIFM:
 - Alan J. Brody resigned from the Board of Managers of the AIFM with effect June 30, 2023;
 - · Louise Kooy-Henckel resigned from the Board of Managers of the AIFM with effect June 30, 2023.
- (c) Changes to the Conducting Officers of the AIFM:
 - · Helen Dewar resigned as Conducting Officer of the AIFM with effect from June 9, 2023;
 - · Jennifer Nye was appointed as Conducting Officer of the AIFM with effect from August 14, 2023.
- (d) Share classes launched or liquidated during the financial year

Details of share classes launched and liquidated during the financial year ended September 30, 2023 are listed in the relevant Investment Manager's Reports.

2. Summary of significant accounting policies

(a) Presentation of financial statements

The financial statements are prepared in accordance with the Luxembourg GAAP and the requirement on the 2013 Law.

The combined figures are presented in Euro, the Company Currency, and in US Dollar for information only and were computed with the following exchange rates prevailing as at September 30, 2023: USD 1 = EUR 0.944510; GBP 1 = EUR 1.152821 and GBP 1 = USD 1.220550.

The financial statements are prepared on a going concern basis.

(b) Valuation of the investments in securities

The AIFM has been designated by the Board of Directors to carry out the valuation function in accordance with the Article 17(4) (b) of the 2013 Law.

The assets of the Funds are valued as follows:

The value of shares of the Master Funds shall be based on the last available net asset value per share provided by the Administration Agent of the Master Funds calculated as described in their respective Offering Memorandum.

Transferable securities and derivative instruments that are listed or dealt on an official stock exchange or dealt on another regulated market, which operates regularly and is recognised and is open to the public, are valued on the basis of the latest available closing price. If the same security is quoted on several markets, the last available price of the main market for this security is used.

For non-quoted assets or assets not traded or dealt on any stock exchange or another regulated market, as well as quoted or non-quoted assets on such other market for which no valuation price is available, or assets for which the quoted prices are not representative of the fair market value, the value thereof shall be determined prudently and in good faith by the AIFM on the basis of foreseeable purchase and sale prices.

Notes to the financial statements (continued)

September 30, 2023

2. Summary of significant accounting policies (continued)

(b) Valuation of the investments in securities (continued)

Money market instruments with a remaining maturity of less than ninety days at the time of purchase or securities whose applicable interest rate or reference interest rate is adjusted at least any ninety days on the basis of market conditions shall be valued at cost plus accrued interest from its date of acquisition, adjusted by an amount equal to the sum of any accrued interest paid on its acquisition and any premium or discount from its face amount paid or credited at the time of its acquisition, multiplied by a fraction the numerator of which is the number of days elapsed from its date of acquisition to the relevant Valuation Day and the denominator of which is the number of days between such acquisition date and the maturity date of such instruments.

Money market instruments with a remaining maturity of more than ninety days at the time of purchase shall be valued at their market price. When their remaining maturity falls under ninety days, the AIFM may decide to value them as stipulated above.

In the case of a discount or a premium fixed income instrument, the value of the instrument, based on the net acquisition cost, is gradually adjusted upward or downward, as the case may be, to the redemption price considering the business days within the period plus accrued interest, if any.

Liquid assets are valued at their nominal value plus accrued interest or on an amortised cost basis.

Shares in open-ended undertakings for collective investments are valued at their last available net asset value.

The value of derivative contracts not traded on exchanges or other regulated markets shall be determined prudently and in good faith by the AIFM on the basis of the foreseeable purchase and sale prices.

All other assets of any kind or nature will be valued at their net realisable value as determined in good faith by the AIFM in accordance with generally accepted valuation principles and procedures.

(c) Net realised appreciation/(depreciation) on sales of securities

The net realised appreciation/(depreciation) on sales of securities is calculated on the basis of the average cost of the securities sold.

(d) Foreign exchange transactions

Bank accounts, market value of the investment portfolio and other assets or liabilities expressed in currencies other than the base currencies of the Funds are translated into these base currencies at applicable exchange rates prevailing at the end of the financial year.

Dividends are converted using currency exchange rates prevailing at the ex-dividend date.

Other income and expenses expressed in currencies other than base currencies of the Funds are translated into base currency at the applicable exchange rates prevailing at payment date or at the exchange rates prevailing at the end of the financial year if they are accrued. Resulting realised and unrealised foreign exchange appreciations or depreciations are included in the combined statement of operations and changes in net assets.

The cost of investment securities expressed in currencies other than the base currencies of the Funds is translated into base currencies at the exchange rate prevailing at the transaction date.

| INR | 83.0413 | | |

(e) Dividend and interest income

Dividend income is recorded on the ex-dividend date and is shown net of non-recoverable withholding taxes. Dividend income not yet received is included in 'dividend income receivable' in the combined statement of net assets. Interest income (including amortisation of premium and discount) is accrued daily. Interest income not yet received is included in 'interest receivable' in the combined statement of net assets.

(f) Financial derivative instruments

Realised appreciation or depreciation and change in unrealised appreciation or depreciation are recorded under 'net realised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' and under 'net change in unrealised appreciation/(depreciation) on sale of investments, currency transactions and financial derivative instruments' in the combined statement of operations and changes in net assets respectively.

(i) Forward and spot foreign exchange contracts

The unrealised gain or loss on open forward foreign exchange contracts and open spot foreign exchange contracts is calculated by reference to the difference between the contracted rate and the forward rate to close out the contract as at the financial year-end. The forward rates applied at year end were pulled at 11:00 a.m. New York time. For each relevant Fund, gains or losses on open spot foreign exchange contracts are included in 'cash and cash equivalents' in the combined statement of net assets.

(ii) Future contracts

Initial margin deposits are made to the broker upon entering into future contracts. During the period the future contract is open, changes in the value of the contract are recognised as unrealised appreciations or depreciations by "marking-to-market" on a daily basis to reflect the market value of the contract at the end of each day's trading. Variation margin payments are made or received, depending upon whether unrealised appreciations or depreciations are incurred. When the contract is closed, a realised appreciation or depreciation is recorded. This realised appreciation or depreciation is equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract. Margin accounts are currently recorded under 'Margin cash held with/due to brokers' in the combined statement of net assets.

(iii) Swaps

The change in the value of the swap is reported within 'Investment in swaps at market value' on the combined statement of net assets, until termination of the contract when it is realised.

Periodic interest payments to be paid or received are accrued on a daily basis and included in interest income or interest expense. Premiums paid or received when entering into the agreement are recorded at cost and reflected under either 'Receivable from brokers' or 'Payable to broker' in the combined statement of net assets.

• Credit default swaps

The buyer of protection in a credit default swap agreement is obligated to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

Notes to the financial statements (continued)

September 30, 2023

2. Summary of significant accounting policies (continued)

- (f) Financial derivative instruments (continued)
- (iii) Swaps (continued)
 - Interest rate swaps

An interest rate swap is a bilateral agreement in which each of the parties agrees to exchange a series of interest payments for another series of interest payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged.

• Total return swaps

The Funds may enter into total return swap contracts in which the relevant Fund and the counterparties agree to exchange payments (periodically throughout the life of the contract) where one or both parties pay the returns generated by a security, index, commodities, or instruments on an agreed upon notional amount. The relevant indices include, but are not limited to, currencies, interest rates, prices and total return on interest rates indices, fixed income indices and stock indices.

- (iv) To Be Announced securities ("TBAs")
 - TBA purchase commitments

The Funds may hold and maintain until settlement date, cash or high-grade debt obligations in an amount sufficient to meet the purchase price, or the Funds may enter into offsetting contracts for the forward sale of other securities they own.

Income on the securities will not be earned until settlement date. Unsettled TBA purchase commitments are valued at the current market value of the underlying securities, according to the procedures described under 'Valuation of the investments' above.

Although the Funds may enter into TBA purchase commitments with the intention of acquiring securities for their Funds or for delivery pursuant to options contracts they have entered into, the Funds may dispose of a commitment prior to settlement if the Investment Manager deems it appropriate to do so.

• TBA sales commitments

Certain Funds may enter into TBA sale commitments to hedge their Fund positions or to sell mortgage backed securities they own under delayed delivery arrangements. Proceeds of TBA sale commitments are not received until the contractual settlement date.

Only two Funds had outstanding TBAs as at September 30, 2023, which are included in 'Investment in to be announced securities at market value' in the combined statement of net assets, and which are further detailed within that Fund's statement of investments - at its TBAs corresponding section.

(g) Term loans

A Fund's investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. A loan is often administered by a bank or other financial institution (the "lender") that acts as agent for all holders. The agent administers the terms of the loan, as specified in the loan agreement. When investing in a loan participation, a Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the loan agreement and only upon receipt by the lender of payments from the borrower. A Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower.

The Funds may enter into a loan agreement for a certain committed amount, however the full amount of this commitment may not be drawn down by the borrower. These unfunded commitments represent the remaining obligation of the Funds to the borrower. At any point in time, up to the maturity date of issue, the borrower may demand the unfunded portion. The Funds utilise an independent third party to value individual loans on a daily basis.

(h) Partial Swing Pricing

A Fund may suffer "dilution" of its net asset value per share due to investors buying or selling shares at a price that does not take into account dealing and other costs that arise when the AIFM makes or sells investments to accommodate cash inflows or outflows.

Notes to the financial statements (continued)

September 30, 2023

2. Summary of significant accounting policies (continued)

(h) Partial Swing Pricing (continued)

If on any valuation day, the aggregate net transactions in shares for a Fund exceed a pre-determined threshold, as determined by the AIFM from time to time, the net asset value per share may be adjusted upwards or downwards to reflect net inflows and net outflows respectively and is a means of apportioning the expected trading costs associated with such transactions to the investors that create these costs in order to protect existing or remaining Shareholders. Such adjustment is not expected to exceed 5% of the original net asset per share.

Partial Swing Pricing may be applied by the AIFM to any Fund of the Company and is not aimed at addressing the specific circumstances of each individual investor transaction. The swing factor and swing thresholds are set and reviewed on a quarterly basis by a Wellington Management group Partial Swing Pricing review governance group, which reports to the Board of Managers of the AIFM on a quarterly basis. The extent of the price adjustment will be set by the AIFM in order to reflect dealing and other costs. Such adjustment may vary across the Funds. Any adjustments to net inflows and outflows are included in the combined statement of operations and changes in net assets, being added to the proceeds from subscriptions and deducted from redemptions.

(i) Collateral

In order to limit counterparty risk the Company put a collateralisation process in place. Broker cash received as collateral for financial derivative instruments transactions is recorded as an asset on the combined statement of net asset under 'Cash collateral received from brokers' and a related liability to repay the collateral is disclosed as 'Cash collateral due to brokers'.

A Fund's assets may be deposited with brokers by or on behalf of the Fund for collateral purposes. Such assets remain in the ownership of the relevant Fund and are recorded as an asset on the combined statement of net assets. Cash pledged by the Funds as collateral is recognised on the combined statement of net assets as 'Cash collateral deposited with brokers'.

(j) Capital gains tax

No tax is payable in Luxembourg on realised or unrealised capital appreciation of the assets of the Funds, however, the Funds may incur foreign taxes on capital gains upon realisation of their assets.

3. Charges and expenses

(a) Investment management fees

An Investment Management Agreement was entered into for the Funds for an indefinite period of time between the AIFM and the Investment Manager. The Investment Manager is a Limited Liability Partnership organised under the Laws of the State of Delaware, USA and is registered as an Investment Advisor with the Securities and Exchange Commission under the Investment Advisers Act 1940 as amended. The Investment Manager is entitled to an annual fee, paid monthly for its services calculated using the rates below applied to the average net assets of each share class.

The investment management fee rates applicable to each of the share classes are outlined later (Note 3e).

(b) Distribution fees

These fees are calculated as a percentage of the average net asset value attributable to the respective shares and is payable on a quarterly basis to financial intermediaries.

The distribution fee rates applicable to each of the share classes are outlined later (Note 3e).

(c) Administrative fee

The AIFM shall be paid an administrative fee out of the assets of each of the Funds attributable to the relevant share classes with the exception of the Wellington Global Total Return Fund – Feeder Fund and the Wellington Commodities Fund (GBP Hedged Feeder) where the AIFM shall be paid an administrative fee out of the assets of the Master Fund which are attributable to the relevant classes of Master Fund shares held by the Fund. This administrative fee is calculated as a percentage of the daily net assets of that class, accrued daily in the net asset value of the relevant class and paid monthly in arrears.

Notes to the financial statements (continued)

3. Charges and expenses (continued)

(c) Administrative fee (continued)

The administrative fee rate will vary across classes reflecting the differing expenses of classes but the maximum administrative fee that is paid shall not exceed 0.25% per annum for classes S and T (with the exception of Wellington Global Multi-Asset Target Return Fund the maximum administrative fee that is paid for classes S and T shall not exceed 0.15% per annum) and 0.40% for classes D, N, UD and UN.

The purpose of the administrative fee is to provide a fixed rate of fees covering the expenses of the Funds which expenses might otherwise be subject to fluctuation over time. The administrative fee ensures that the Funds are protected from these fluctuations, which would not be the case if the Funds had chosen to pay such charges directly. Any increase in the maximum rate of the administrative fee shown above will only be implemented upon giving not less than 1 month notice to affected Shareholders.

The administrative fees are fixed which means that the AIFM, or other Wellington Management affiliate elected by the AIFM will bear any costs and expenses incurred by the relevant class in any period in excess of the administrative fee charged to the class, but conversely will be entitled to retain any amount of the administrative fee paid to it which exceeds the actual operating expenses incurred by the relevant class during any period. The AIFM in its discretion may choose to waive a portion of the administrative fee as the level of assets in the Fund increases; however, as the level of assets in a particular Fund decreases, the AIFM may withdraw any waiver of the administrative fee. The maximum administrative fee per share class is disclosed above accordingly.

Further the AIFM may instruct the Company to pay a portion of the administrative fee directly out of the assets of the Funds to any third party service providers. In such case the administrative fee due to the AIFM will be reduced by the same amount.

The administrative fee covers the following expenses, if applicable to the relevant class:

- Depositary fees and reasonable out of pocket expenses;
- · Administration Agent fees and reasonable out of pocket expenses;
- Transfer Agent fees and reasonable out of pocket expenses;
- AIFM fees relating to the provision, procuring, overseeing and/or monitoring of various services to the Company
 and the Funds by the AIFM and its affiliates, including, but not limited to, administrative, domiciliary, corporate,
 company secretarial, risk management, regulatory compliance and reporting services and fees incurred by affiliates
 of the AIFM and payable to third parties providing infrastructure and other support services;
- Fees in consideration of the services provided by the Distributor (and its affiliates) in establishing, servicing on an
 ongoing basis and administering relationships with financial intermediaries and distributors and the cost incurred,
 including the costs of performing diligence on financial intermediaries/distributors, the additional oversight of third
 parties service providers, and the provision of additional marketing support. For the avoidance of doubt, these fees
 do not include the distribution fees payable to financial intermediaries and/or other distributors described under the
 'Distribution Fee' section;
- · Reasonable out of pocket expenses of the Board of Directors;
- Fees of Managers of the AIFM who are not employed by affiliates of the AIFM as well as reasonable out of pocket expenses incurred in discharging their AIFM duties;
- Auditor's fees and reasonable out of pocket expenses;
- Professional costs (including, without limitation, the fees and disbursements of counsel, consultants, tax and other
 advisers or third party support services) that may be incurred by the AIFM, the Depositary, the correspondents or
 the Administration Agent while acting in the interest of the Shareholders;
- The cost of taking out and maintaining any insurance policy in relation to the Company, its directors, the AIFM and/or the Managers;
- The Luxembourg taxe d'abonnement being 0.01% per annum for all classes of shares;
- · Any start-up costs associated with the creation of a Fund or class and the offer of its shares;
- The costs associated with preparing and/or filing, translating, distributing, or maintaining any materials or documents of the Company, including, without limitation, the offering memorandum (as well as any amendments or supplements), KIDs, Fact sheets, websites, annual reports or other documents as may be required under its Articles or under the applicable laws or regulations as well as registration or private placement costs incurred for purposes of distributing shares of the Company (including any paying agents', lawyers', auditors' and other experts' fee in connection with the foregoing, as well as any administrative charges or taxes incurred) and the costs associated with ratings and/or ranking of the Fund;
- Fees payable to third parties for class currency management services in relation to the execution of currency hedging transactions for hedged share classes.

Notes to the financial statements (continued)

September 30, 2023

3. Charges and expenses (continued)

(c) Administrative fee (continued)

The following expenses are not covered by the administrative fee and will be paid by the Company out of the assets of the Fund. These expenses may also be incurred directly by the Master Fund, in which case the Fund will bear its proportionate share of such costs indirectly through its investment in the Master Fund.

- · investment management fees;
- distribution fees as described under the 'Distribution Fee' section;
- performance fee (for the Wellington Global Total Return Fund Feeder Fund);
- all taxes (including, without limitation, all income and franchise taxes but excluding the Luxembourg taxe
 d'abonnement), levies, duties or similar charge which may be due on or with respect to the assets and the income of
 the Company;
- all costs (including brokerage fees) of purchasing or selling assets of the Company and the Master Fund including but not limited to brokerage charges, subscription and redemption charges, anti-dilution levies, implicit transactions costs, costs associated with execution/trading or settlement platforms, costs associated with derivative use and any losses incurred in connection therewith are for the account of the Fund and the Master Fund;
- · the costs of borrowing including interest expenses;
- any extraordinary expenses, such as litigation (for instance, fees connected with the filing of class action lawsuits), exceptional measures, particularly, legal, business or tax expert appraisals or legal proceedings undertaken to protect Shareholders' interests and all similar charges and expenses.

Such fees, duties and charges will be charged to the Class or class of Master Fund units in respect of which they were incurred or, where an expense is not considered by the Board of Directors (or, in the case of the Master Fund, the Managers of the AIFM) to be attributable to any one class, the expense will be allocated by the Board of Directors (or, in the case of the Master Fund, the Managers of the AIFM) with the approval of the Depositary, in such manner and on such basis as the Board of Directors (or, in the case of the Master Fund, the Managers of the AIFM) in their discretion deem fair and equitable.

The AIFM implemented a volume discount mechanism ("VDM") on the administrative fee which allows the Funds to pass on economies of scale achieved by a Fund reaching significant levels of assets.

The administrative fee rates applicable to each of the share classes of each of the Funds are outlined later (Note 3e).

(d) Performance fees

In addition to the base investment management fee, the Investment Manager may also be paid a performance fee in respect of classes S, D and N shares of the Global Total Return Fund - Feeder Fund.

The performance fee will be an amount equal to 20% of the Fund's annual performance in excess of the ICE Bank of America 3-Month T-Bill Index expressed in the denomination of the currency of the relevant share class, or with respect to any hedged shares only, hedged to the denomination currency of the relevant share class. No performance fee shall be payable with respect to the class of Master Fund units held by the Fund.

For the financial year ended September 30, 2023 the performance fee has been calculated on Wellington Global Total Return Fund - Feeder Fund.

The performance fee will be based on the unswung share class' net return or net asset value per share but inclusive of any performance fee previously accrued in respect of such performance period.

The performance fee is accrued daily in the net asset value of each relevant class and is calculated as described below in respect of the relevant performance fee mechanism.

The period at the end of which the accrued performance fee is crystallised and paid (the "performance period") is generally the Company's fiscal year (October 1 – September 30), but may also a) begin mid-year in certain circumstances from the launch of a Fund or share class and; b) end mid-year from the previous performance period's end to the closure of a Fund or share class. In cases of a launch of a Fund or a share class in the ongoing performance period the performance fee will crystalise at the end of the current performance period. When this occurs, the performance period may be less than one calendar year.

Notes to the financial statements (continued)

September 30, 2023

3. Charges and expenses (continued)

(d) Performance fees (continued)

Subject to the exceptions above, the performance fee is crystallised at the end of the performance period and is paid annually in arrears as soon as practicable after the end of the relevant performance period. The end of the performance period is generally the fund's fiscal year end, except where a fund or share class closes mid-year as described above. As well as crystallising at the end of each performance period, performance fees are crystallized on any dealing day (other than the last business day of the performance period) in which there is a net reduction in the number of shares in a share class. Any accrued performance fee with respect to such net redemption of shares will crystallise on that dealing day and will be paid as soon as is practicable to the Investment Manager.

The performance fee will be accrued on each basis of a share class' net return per share in excess of the performance benchmark and the net asset value in excess of the High Water Mark ("HWM"), over a performance period, multiplied by the average number of shares in issue for the fiscal year calculated on each business day. The average number of shares used for the performance fee calculation is calculated on each business day and adjusted on any dealing day in which there is a net reduction of shares in a share class. The performance benchmark is expressed in the denomination currency of the relevant share class, or for hedged share classes, hedged to the denomination currency of the relevant class. At the launch of a share class, the HWM means the Initial Issue Price and is taken as the starting point for the performance fee calculation. If (i) the net return per share on the last valuation day of a performance period is higher than the performance benchmark over the same period and (ii) the net asset value per share is higher than the previous HWM, then the performance fee will crystallise.

If the net asset value per share on the last business day of a performance period is higher than the previous HWM, the HWM is set to the unswung net asset value calculated at the end of the performance period. To the extent that a share class' net return per share did not exceed its performance benchmark and the net asset value per share did not exceed the HWM at the end of a performance period, no performance fee will accrue until the share class' cumulative net return exceeds the cumulative performance benchmark return and the net asset value per Share exceeds the HWM over the same period. When this occurs, the performance period will extend beyond one year and continue until the next performance period when a performance fee does crystallise. The HWM and performance benchmark will be adjusted for any distributions in the case of a distributing share class.

For shares existing prior to the introduction of the HWM, the initial HWM will be the net asset value per share as at the last valuation day of the Fund's fiscal year end 2016.

Due to differences in timing between their date(s) of investment and a share class' performance fee calculation period, subscribers and shareholders of the fund should be aware that their own individual performance experience as a shareholder may not be equivalent to the actual performance of the fund on which the performance fee is calculated and paid, and the performance fee paid to the Fund may be higher or lower than the actual performance they experience as a shareholder. Although a daily accrual of a portion of the performance fee in a share class' net asset value mitigates some of these timing differences, the performance fee is calculated and paid based on the share class' fiscal year assets and performance, not on the basis of a shareholder's specific assets or performance.

The share class' net return on which the performance fee is based, includes net unrealised gains and losses as at the end of each calculation period and as a result, a performance fee may be paid on unrealised gains which may subsequently never be realised. The performance fee is calculated prior to any dilution adjustments and the methodology is verified by the depositary on a periodic basis.

Performance Fees are payable even where the relevant HWM is surpassed, which may be achieved due to market movements.

For further information on performance fees, please refer to the Offering Memorandum.

The below table shows the actual performance fees incurred by share class of Fund and the relevant Total Expense Ratio ("TER") for a period of one year expressed as a percentage of the average net asset value of the Fund for the corresponding period of one year. Calculations are related to a period of less than a year and have been annualised.

Notes to the financial statements (continued)

September 30, 2023

3. Charges and expenses (continued)

(d) Performance fees (continued)

TER have been calculated in accordance with the requirements of Asset Management Association Switzerland ("AMAS") guidelines.

| Septeml | oer 30, | 2023 |
|---------|---------|------|
|---------|---------|------|

Wellington Global Total Return Fund – Feeder Fund S GBP (hedged)

| Performance fee TER | 0.28% |

6. Partial Swing Pricing

The following table provides details of the swing factors in place as at September 30, 2023:

| Fund | Swing factor % | Methodology |
|--|----------------|-------------|
| Wellington Multi-Sector Credit Fund | 0.95 | In Only |
| Wellington Global Multi-Asset Target Return Fund | 0.15 | In/Out |
| Wellington Responsible Values Multi-Sector Credit Fund | 0.85 | In Only |
| Wellington Global Multi-Asset Target Return II Fund | 0.15 | In/Out |

As at September 30, 2023, no swing pricing was applied to any Funds.

7. Subsequent events

- (a) With effect from October 16, 2023, the following changes were implemented to the Offering Memorandum:
 - Updates to the ESG Ratings Framework section in the Investment Objectives and Policies in order to clarify the rating methodology of the ESG Ratings Framework so that it is aligned with the Investment Manager's ESG research process and capabilities;
 - Updates to the Taxation chapter to include additional tax related disclosures on Anti-Tax Avoidance Directive ("ATAD") 1 and 2 and EU Mandatory Disclosure Regime;
 - Update of the SFDR pre-contractual disclosures of Wellington Global Total Return Fund.
- (b) Changes to the Board of Managers of the Alternative Investment Fund Manager:
 - Alain Vincent Mandy resigned from being a Manager of the Alternative Investment Fund Manager with effect from December 22, 2023;
 - Henry C. Kelly resigned from being an Independent Manager of the Alternative Investment Fund Manager with effect from December 31, 2023;
 - Thomas Nummer appointed as an Independent Manager of the Alternative Investment Fund Manager with effect from January 1, 2024.
- (c) Changes to the Conducting Officers of the Alternative Investment Fund Manager:
 - Paul S. Mullins resigned from being a Conducting Officer of the Alternative Investment Fund Manager with effect from November 6, 2023;
 - Rami Lahoud appointed as a Conducting Officer of the Alternative Investment Fund Manager with effect from November 6, 2023.

Notes to the financial statements (continued)

September 30, 2023

7. Subsequent events (continued)

- (d) Changes to the Members of the Board of the Directors of the Company:
 - Alain Vincent Mandy resigned from being a Director of the Company with effect from December 22, 2023;
 - · Jonathan Griffin appointed as an Independent Director of the Company with effect from January 1, 2024;
 - Michael J. McKenna resigned from being a Director of the Company with effect from January 22, 2024;
 - James Barton appointed as a Director of the Company with effect from January 22, 2024.

Appendix 1 – Alternative Investment Fund Managers Directive (Unaudited)

September 30, 2023

This appendix is provided to meet the disclosure requirements of AIFMD as they relate to Annual Financial Statements and should be read in conjunction with the Investment Managers Reports together with the Monthly Fact Sheets and the Quarterly Performance Reviews which are made available to investors. Copies are available on request from the registered address of the Funds.

The AIFM for the Funds is Wellington Luxembourg S.à r.l., an EU entity (see page 6). Wellington Luxembourg S.à r.l. replaced Wellington Management Company LLP as the AIFM of the Funds on November 28, 2016.

Disclosure of Material Changes

The Investment Objectives and Investment Policies of the Funds is determined by the Directors, in consultation with the Investment Manager and in conjunction with the AIFM. The Investment objectives and Investment Policies are disclosed in the Offering Memorandum. The Directors must approve any changes to the Offering Memorandum, including any changes to the Investment Objectives and Investment Policies. Furthermore, any changes to the Offering Memorandum require CSSF approval and the CSSF may direct that at least a one month notice period be given to all Shareholders in order to allow Shareholders to redeem from the Funds without penalty prior to a proposed change taking effect, if it considers the change to have a potentially material impact on Shareholders.

All Material Changes in the Period under review and Subsequent Changes have been previously notified to Investors. A summary of all such changes can be found in Note 1 and in Note 7.

Risk Disclosures

Descriptions of the Risk profiles of the Funds are disclosed in the Monthly Fact Sheets made available to Investors. Copies are available on request.

Please refer to the Offering Memorandum for further risk and pre-investment disclosures.

No material changes to the risk profiles or risk management systems of the Funds occurred during the financial year ended September 30, 2023 (see "Disclosure of Material Changes" above). There are no assets subject to special arrangements as at September 30, 2023 and no new arrangements for managing the liquidity of the Funds were introduced in the financial year ended September 30, 2023.

Use of Leverage

Within the meaning of AIFMD, leverage is any method by which the Directors or Investment Manager may, as the case may be, increase the exposure of the Funds whether through borrowing of cash or transferable securities, or leverage embedded in derivative positions or by any other means.

The Funds may employ leverage in circumstances where the Investment Manager deems it appropriate to do so in order to implement the investment approach and to achieve the investment objective.

| Fund | Maximum Gross Leverage (% of Net Asset Value) |
|--|--|
| Wellington Global Total Return Fund – Feeder Fund | 410% |
| Wellington Commodities Fund (GBP Hedged Feeder) | 110% |
| Wellington Multi-Sector Credit Fund | 600% |
| Wellington Global Multi-Asset Target Return Fund | 500% |
| Wellington Responsible Values Multi-Sector Credit Fund | 600% |
| Wellington Global Multi-Asset Target Return II Fund | 500% |

Monthly leverage numbers, on both a gross and committed basis, are included in the Monthly Fact Sheets made available to Investors. Copies are available on request.

Appendix 1 – Alternative Investment Fund Managers Directive (Unaudited) (continued)

September 30, 2023

Remuneration Policy

Overview

The remuneration of the AIFM's staff is governed by the AIFM's remuneration policy. Wellington Luxembourg S.à r.l. ("WLSARL") has adopted an AIFMD compliant remuneration policy which has the ability to restrict the structure and form of remuneration to certain categories of staff. Under the AIFMD Regulations, WLSARL is required to establish and apply remuneration policies and practices that are consistent with and promote sound and effective risk management and do not encourage risk taking which is inconsistent with the risk profile or constitution of the funds managed.

Introduction

WLSARL, a member of the Wellington group of companies (the "Wellington Group"), believes that its employees should be remunerated in a manner that (i) is fair and rewards achievement over time, (ii) is consistent with and promotes sound and effective risk management (and discourages inappropriate risk-taking), (iii) is in line with the business strategy, objectives, values, and interests of WLSARL and the Wellington Group, and (iv) aligns the interests of WLSARL staff with those of the Funds WLSARL manages (the "Funds") and the underlying fund investors.

These beliefs are consistent with the remuneration principles applied throughout the Wellington Group, which manages assets for a wide range of clients and for commingled Funds in a variety of structures and domiciles.

This document sets out (i) WLSARL's remuneration policy ("the Policy"), (ii) the principles on which WLSARL's Policy is based, and (iii) WLSARL's practices aimed at ensuring that its remuneration approach is consistent with applicable regulatory requirements and the above-mentioned principles.

Application of the Policy

Compliance with regulatory requirements

WLSARL manages alternative investment funds ("AIFs"), governed by the Luxembourg law of July 12, 2013 on Alternative Investment Fund Managers (the "AIFM Law"). Consistent with the remuneration requirements of the AIFM Law, including Section 5.5.9 of CSSF Circular 18/698 ("the Circular"), WLSARL applies remuneration policies, practices, and procedures that are consistent with and promote sound, prudent and effective risk management and do not encourage inappropriate risk-taking. Furthermore, these policies and practices are designed to ensure that conflicts of interest are prevented or appropriately managed. WLSARL's compliance function will review this Policy against relevant laws and regulations at least annually.

Responsibility and oversight

The Board of WLSARL ("the Board") and the Executive Committee¹ of WLSARL ("the Executive Committee") are responsible for establishing and applying the Policy. The Policy shall be reviewed and updated at least annually, and will be submitted to the Executive Committee and the Board for approval. The practices associated with implementation of the Policy are overseen by the Conducting Officers of WLSARL ("the Conducting Officers") responsible for Risk Management and Human Resources. This Policy will be subject to central and independent internal review by the Internal Auditor² at least annually.

Overall application of this policy

The Policy and the related practices described below shall be applied in a flexible way that (i) is consistent with applicable employment and privacy laws, including pre-existing employment contracts and other obligations of the Wellington Group to its staff, (ii) aligns with the business strategy, objectives, values, and interests of WLSARL and the Wellington Group, and the interests of the Funds and investors in the Funds, (iii) is appropriate given the size, internal organisation, nature, and complexity of the business of WLSARL and the Funds, and (iv) takes into account individual circumstances. Remuneration will not be paid through vehicles or methods that facilitate the avoidance of the requirements of the Alternative Investment Fund Managers Directive ("AIFMD"). Remuneration paid in accordance with this Policy will relate directly to Wellington Group's overall financial performance, and a covered individual's achievement in the performance of the duties assigned to them.

¹ "Executive Committee" in this Policy refers to the Executive Committee of Conducting Officers for the Luxembourg AIFM.

² The Investment Fund Manager has established and will maintain a permanent Internal Audit Function. The internal Auditor is a person performing the internal audit function.

Appendix 1 – Alternative Investment Fund Managers Directive (Unaudited) (continued)

September 30, 2023

Remuneration Policy (continued)

Application of the Policy (continued)

Overall application of this policy (continued)

Specific requirements (including the payout process rules) may not be applied (a) where they are not believed to be proportionate (given the factors listed above) or to promote regulatory objectives, and/or (b) based on "disapplication" standards or thresholds applicable in Luxembourg or other Member States, provided such requirements are not believed necessary to (i) promote sound and effective risk management, (ii) act in the best interests of WLSARL and/or the Funds or (iii) reward individual and functional team achievement.

Where staff are subject to remuneration rules from multiple remuneration regimes, the remuneration rules shall be applied pro rata based on the activities carried out under each regime or, if there is a conflict between the rules, the rules will be applied that are deemed more effective for achieving the outcomes both of discouraging excessive risk taking and of aligning the interests of the relevant individuals with those of the investors in the Funds they manage.

Independence

The remuneration of employees involved in control functions will be determined independently from the business units controlled by the control functions and in accordance with the achievement of the objectives linked to the relevant control functions.²

Identified Staff

The general principles set forth in this Policy apply to all WLSARL staff, however, the payout process below applies only to the WLSARL staff, including senior management, risk-takers, control functions, and any employees receiving total remuneration that takes them into the same bracket as senior management and risk-takers whose professional activities have a material impact on the risk profiles of WLSARL or the Funds (collectively the "Identified Staff").

In order to arrive at the universe of Identified Staff, WLSARL will determine whether the activities of each member of staff, senior management or the delegates could have a significant impact on WLSARL's results, WLSARL's balance sheet, or the performance of the Funds. WLSARL may also consider other relevant factors. The Conducting Officer responsible for Compliance will inform the relevant individuals of their classification as Identified Staff.

Relevant remuneration

This Policy applies to all forms of payment by WLSARL of salaries, discretionary payments, and pension benefits by WLSARL or by a Fund to Identified Staff, including any transfer of Funds' shares/units, in relation to services rendered by Identified Staff for the benefit of the applicable Funds. This Policy does not apply to payments from other Wellington Group entities (including partnership distributions), but the Wellington Group will not design remuneration practices intended to circumvent the requirements of the AIFM Law, related ESMA Guidelines and the Circular.

Policy Specifics

The following provisions are designed to ensure compliance with the remuneration requirements of the AIFM Law and with related directives, regulation, and guidance.

Guarantees and early termination

WLSARL will not normally offer guaranteed bonuses and will only do so in connection with hiring new staff. WLSARL will not offer guarantees in excess of one year. WLSARL will not make payments related to early termination of a contract, except as required by law.

Performance assessment

When assessing performance for the purposes of determining remuneration, WLSARL will assess the performance of the individual (including by reference to non-financial criteria) and the function or business unit concerned, along with the overall results of WLSARL. Fund performance will be assessed in a multi-year framework appropriate to the life cycle of the AIFs to ensure that the assessment is based on longer-term performance and that the payment of performance-based compensation is spread over a period taking into account the redemption policy of the AIFs and their investment risks. The measurement of performance used to calculate variable remuneration (or to calculate the size of pools available for variable remuneration) will include adjustment mechanisms for relevant current and future risks.

¹ Full independence is not possible, as remuneration is ultimately linked to the performance of the Wellington Group as a whole.

² In light of the "need" identified in European Securities and Markets Authority ("ESMA") guidance to preserve a level playing field among AIFMs and jurisdictions.

Appendix 1 – Alternative Investment Fund Managers Directive (Unaudited) (continued)

September 30, 2023

Remuneration Policy (continued)

Policy Specifics (continued)

Bonus withholding and claw-back

Should it be proven that an employee took excessive risks or breached WLSARL's compliance rules or any regulations, no bonus will be paid to that employee and claw-back proceedings may be invoked in relation to bonuses paid during prior periods.

The Board will be able to require employees to repay all or part of any bonus that has been paid for performance based on data which was subsequently proven to be fraudulent or subject to a material error or misstatement.

Payout process

WLSARL will regularly carry out an assessment of proportionality in relation to the appropriateness and applicability of the design of the payout process. The payout process may include the below relevant components depending on the assessment of proportionality at a given time.

- 1. <u>Fixed/variable balance</u>: The fixed and variable components of remuneration will be appropriately balanced, and the fixed compensation component will represent a sufficiently high proportion of total compensation to allow for a flexible policy (e.g., payment of no variable remuneration in any given year). Variable remuneration will only be paid if it is sustainable given the overall financial situation of WLSARL and of the Wellington Group combined and justified given the performance of the business unit, the Funds, and the individuals concerned.
- 2. <u>Variable remuneration in shares or units</u>: this process is not currently in place. Subject to the legal structure of the Funds and their rules or instruments of incorporation and considering the outcome of a proportionality assessment, a substantial portion (at least 50%) of variable remuneration may consist of units or shares of the Funds concerned or unit/share-linked non-cash instruments, unless the management of AIFs accounts for less than half of the portfolios managed by WLSARL, in which case the 50% minimum shall not apply. Any non-cash instruments granted in accordance with the above will be subject to an appropriate retention policy, designed to align the Identified Staffs' incentives with the interests of the Funds.
- 3. Variable remuneration deferral: this process is not currently in place.
 - A substantial portion (at least 40%) of the variable remuneration may be deferred over an appropriate period, in view of the life cycles and redemption policies of the AIFs concerned and will be aligned with the nature of the risks of the Funds in question.
 - This period shall be at least three to five years for AIFs unless the life cycle of the AIFs concerned is shorter, and vesting will occur no faster than on a pro-rata basis.
 - If variable remuneration is particularly high, 60% may be deferred.
 - Variable remuneration will generally be considerably reduced where negative financial performance of WLSARL or the Funds it manages occurs, taking into account current compensation and reductions in payouts previously earned.
- 4. <u>Discretionary pension benefits</u>: this process is not currently in place. If WLSARL is aware of Identified Staff leaving WLSARL before retirement, any discretionary pension benefits that may have been awarded will be held by WLSARL for a period of five years in the form of shares or share-linked instruments. Otherwise, discretionary pension benefits shall be paid in the form of shares or share-linked instruments, subject to a five-year retention period.
- 5. <u>Hedging</u>: Identified Staff subject to the payout process rules must undertake not to use personal hedging or remuneration-related insurance to undermine the risk-alignment effects of their remuneration arrangements.

Delegates

When delegating portfolio management or risk management activities and where the remuneration rules would otherwise be circumvented, WLSARL will ensure that (i) the delegates are subject to regulatory requirements on remuneration deemed equally effective as those applicable under the European Securities and Markets Authority ("ESMA") Guidelines on Sound Remuneration Policies Under the AIFMD (ESMA/2016/579 and ESMA/2016/575) (the "ESMA Guidelines") or (ii) appropriate contractual arrangements are put in place to ensure that there is no circumvention of the remuneration rules set out in the ESMA Guidelines. This practice adopted by WLSARL is in line with Sub-section 6.3.2.2, paragraph 495, of the Circular.

Remuneration committee

On the basis of proportionality given the number of employees of the WLSARL is currently not intending to establish a remuneration committee. WLSARL will establish a remuneration committee if at any point it deems such establishment proportionate to oversee the implementation of this Policy with respect to decisions with risk implications relating to WLSARL and the Funds managed by WLSARL.

Appendix 1 – Alternative Investment Fund Managers Directive (Unaudited) (continued)

September 30, 2023

Remuneration Policy (continued)

Policy Specifics (continued)

Sustainability Risks

In accordance with Article 5 of the Sustainable Finance Disclosure Regulation, WLSARL believes this Policy to be consistent with the integration of the consideration of sustainability risks in the investment decision-making process. For more information, please see www.wellingtonfunds.com/SFDR.

Adoption and Annual Review

WLSARL's remuneration policy was adopted by the Board of Managers on November 15, 2015 for adoption on January 1, 2016. The policy was updated in May 2023.

The Board of Managers is satisfied that WLSARL's remuneration policies are designed to be consistent with the AIFMD.

Remuneration for the year ended September 30, 2023

For the financial year ended September 30, 2023, WLSARL acted as the Management Company of Wellington Management Funds (Luxembourg), Wellington Management Funds (Luxembourg) III SICAV and Wellington Management Funds Ireland plc, and as Alternative Investment Fund Manager of Wellington Management Funds (Luxembourg) II and Wellington Management Funds (Luxembourg) II SICAV.

The remuneration information provided below represents information relevant to the Company and is calculated as outlined in the footnotes.

Quantitative remuneration information is outlined below:

| Remuneration | Fixed | Variable | Total |
|---|--------------|--------------|--------------|
| Year ended September 30, 2023 | Remuneration | Remuneration | Remuneration |
| Total amount paid by the AIFM to its staff, attributable to the Company ¹ | \$199,020 | \$37,101 | \$236,121 |
| Total number of beneficiaries ² | | | 19 |
| Aggregate amount paid to the AIFM senior management, attributable to the $\mbox{\sc Company}^3$ | \$78,791 | \$32,992 | \$111,783 |
| Aggregate amount paid to members of staff of entities to which investment management activities have been delegated by the AIFM whose actions have a material impact on the risk profile of the | | | |
| Company, attributable to the Company ⁴ | \$357,775 | \$815,437 | \$1,173,212 |

¹ The total remuneration has been allocated based on the proportion of the total net assets of the Company with respect to the total net assets of the Funds managed by the AIFM.

² The average number of staff through the year from October 1, 2022 to September 30, 2023 excluding senior management.

³ The total remuneration has been allocated based on the proportion of the total net assets of the Company with respect to the total net assets of the Funds managed by the AIFM, as well as the proportionate time spent on Management functions.

⁴ The total remuneration has been aggregated based on the incentives earned by staff for each Fund of the Company.

Appendix 2 – Securities Financing Transactions Regulation ("SFTR") (Unaudited)

September 30, 2023

The SFTR introduces, inter alia, reporting requirements for securities financing transactions ("SFTs") and total return swaps. Article 13 of SFTR, which sets out the information to be included in annual reports, came into effect on January 13, 2017 and impacted Funds reporting after this date.

A Securities Financing Transaction (SFT) is defined as per Article 3 (11) of the SFTR as:

- a repurchase/reverse repurchase agreement
- securities or commodities lending and securities or commodities borrowing
- · a buy-sell back transaction or sell-buy back transaction, or
- a margin lending transaction

As at September 30, 2023, the Funds did not hold any SFTR instruments to be reported.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the

investee companies follow good

governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Legal entity identifier:

Wellington Global Total Return Fund (Feeder)

Environmental and/or social characteristics

| Do | Does this financial product have a sustainable investment objective? | | | | | |
|----|--|---|---|--|--|--|
| • | • 🗆 | Yes | • | o ⊠ No | | |
| | | ade sustainable investments with an ironmental objective:% | | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments | | |
| | | in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | |
| | | in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | □ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy □ with a social objective | | |
| | | nade sustainable investments with a ial objective:% | × | It promoted E/S characteristics, but did not make any sustainable investments | | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund will invest substantially all of its assets in the Master Fund and will therefore conduct its investment strategy via the Master Fund. The following environmental and/or social characteristics were promoted by the Master Fund during the financial year ending September 30, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

- 1. Issuers are screened to enable the Fund to limit its exposure to sovereign issuers whose fossil fuels exports represent a significant portion of their total exports to 1.5% of the Fund's NAV.
- 2. Issuers with an E or S Rating to enable the Fund to invest in corporate issuers which are not severely lagging relative to their peers, from an environmental or social perspective. In order to do this, the

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

Investment manager assigns corporate issuers an individual E and S Rating, based on Wellington Management's proprietary ratings framework, using a rating scale of 1-5, where 1 is the highest rating. A rating of 1 is the most positive rating, indicating that the issuer is a leader among its peers in managing material environmental or social risks or incorporating environmental or social factors into its practices. A rating of 5 is the most negative, indicating that the issuer may be lagging its peers in managing certain material environmental or social risks or incorporating environmental or social factors into its practices. E Ratings use environmental indicators (such as energy efficiency, carbon emissions and pollutants, sustainable packaging and hazardous waste), and S Ratings use social indicators (such as corruption and bribery, labour relations, product safety and supply chain management) in the assessment of the environmental and social activities and attributes of corporate issuers. Where corporate issuers have received an E and a S Rating, the Fund will only invest in those corporate issuers that are rated 1-4, without preference for a specific rating.

A reference benchmark has not been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

The AIFM is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are

attained.

How did the sustainability indicators perform?

| Sustainability Indicator | September 30, 2023 |
|---|--------------------|
| The number of corporate issuers held with an E Rating or S Rating of 5. Since the Fund seeks to exclude such issuers, this number | 0 |
| should be 0. | |
| The percentage of the Fund's NAV invested in sovereign issuers | |
| where fossil fuels make up more than 67% of their exports. Since | 0.00% |
| this percentage is limited to 1.5% of the Fund's NAV, this | |
| percentage should be 1.5% or less. | |

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption

and anti-bribery

matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. This Fund does not invest in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. This Fund does not invest in sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable. This Fund does not invest in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable. This Fund does not invest in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

By virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the Principal Adverse Impacts listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs") into consideration either directly or indirectly on all or a portion of the Fund:

- 1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy PAI: Exposure to controversial weapons.
- 2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

| PAIs considered | September 30, 2023 |
|--|--------------------|
| 4. Exposure to companies active in the fossil fuel sector | 0.14 % |
| 5. Share of non - renewable energy consumption and production | 60.65 % |
| 14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons) | 0.00 % |

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 2022-10 -01/2023-09-30

| Largest investments | Sector | % net assets | Country |
|---------------------|----------------|--------------|---------|
| U.S. Treasury Bills | Not classified | 66.90% | US |

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, subsovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- environmental or social characteristics promoted by the financial product.
- #2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 51% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

| Asset allocation overview | % of the net assets as at September 30, 2023 |
|-------------------------------------|--|
| #1 Aligned with E/S characteristics | 100.00% |
| #2 Other | 0.00% |

Represents point-in-time data. Please note that the over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

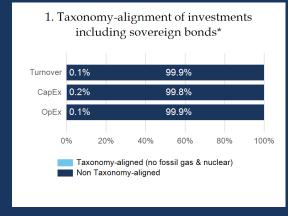

The Fund does not currently commit to invest in any Sustainable Investments within the meaning of the SFDR, accordingly the minimum share of EU Taxonomy-aligned investments is 0%.

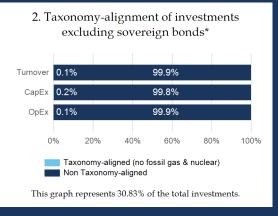

The fund does not have any sustainable investments. However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

☐ Yes ☐ In fossil gas ☐ In nuclear energy ☑ No

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Represents point-in-time data. Please note that the over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. This Fund does not invest in sustainable investments.

What was the share of socially sustainable investments?

Not applicable. This Fund does not invest in sustainable investments.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for hedging and investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

Periodic disclosure for financial products referred to in Article 8(1) of Regulation (EU) 2019/2088 and Article 6 of Regulation (EU) 2020/852

Sustainable
investment means an
investment in an
economic activity that
contributes to an
environmental or social
objective, provided that
the investment does not
significantly harm any
environmental or social
objective and that the
investee companies

follow good

governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Wellington Responsible Values Multi-Sector Credit Fund

Legal entity identifier:

5493008TJ1VW6NPWKR13

Environmental and/or social characteristics

| Does this financial product have a sustainable investment objective ? | | | | |
|---|---|---|--|--|
| • • | ☐ Yes | • | ■ No | |
| | It made sustainable investments with an environmental objective:% | × | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.20% of sustainable investments | |
| | ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy | |
| | ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| | It made sustainable investments with a social objective:% | | It promoted E/S characteristics, but did not make any sustainable investments | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following environmental and/or social characteristics were promoted by the Fund during the financial year ending September 30, 2023:

Pre-contractual disclosure commitment:

The Fund invests a portion of its assets in securities that meet one or more of the following environmental or social characteristics.

- 1. Issuers that are screened to enable the Fund to define a responsible investment universe by using standard industry classifications to exclude certain corporate and sovereign issuers significantly involved in the following industries: fossil fuels, controversial and conventional weapons; and tobacco and cannabis (in addition to the criteria set out in the Exclusion Policy).
- 2. Companies that are considered Sustainable Investments. The Fund will also maintain an allocation to

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

Sustainable Investments, seeking investment in companies and organisations that the Investment Manager believes are addressing the world's social and environmental challenges in a differentiated way through their products, services and projects. Through the Fund's Sustainable Investments, the Investment Manager seeks to invest in the three following impact theme which improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

- Life essentials addresses social objectives such as increasing access to affordable housing and improving access and outcomes related to health, Life essentials also addresses social and environmental objectives through increasing access to clean water and sanitation and health; and sustainable agriculture and nutrition;
- Human empowerment addresses social objectives such as bridging the digital divide and improving access to education and job training; expanding financial inclusion and increasing safety and security;
- Environment addresses environmental objectives such as combating climate change through the development and promotion of alternative energy and resource efficiency, while also considering resource stewardship.

As described in the paragraph above, each of the themes includes either predominantly environmental or predominantly social objectives. However, each such objective may have both environmental and social benefits.

In defining the opportunity set, the Investment Manager takes into account both quantitative and qualitative considerations to fulfil each of the three impact criteria:

- Material: Impact activity must be central to the investee company.
- Additional: The Investment Manager evaluates each value proposition, the specific needs it addresses, competitor product and services, and the degree to which alternative solutions already exist.
- Measurable key performance indicators (KPIs): The impact case must be quantifiable. The Investment Manager uses company reports and proprietary models, to develop individualized KPIs to understand the nature of the impact generated by a portfolio company on an annual basis.

Sustainable Investments may contribute to either environmental or social objectives in line with the environmental and social themes above. Although the Investment Manager will maintain at least 5% in Sustainable Investments, the proportion of Sustainable Investments with environmental or social objectives may vary over time.

A reference benchmark has not been designated for the purpose of attaining the environmental and social characteristics promoted by the Fund.

The AIFM is not aware of any significant challenges that prevented the Fund from ensuring adherence to the stated guidelines.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

| Sustainability Indicator | September 30, 2023 |
|---|--------------------|
| The number of corporate issuers held that are involved in the manufacturing and sale of controversial munitions. As the Fund seeks to exclude such companies, this number is expected to be 0. | 0 |
| The number of corporate issuers held that generate >5% of their revenue from either the production of conventional weapons systems, components, and support systems and services; or the manufacture or retail of civilian firearms and ammunition. Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Sustainability indicators are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Sustainability indicators may not be available for derivatives and these instruments have been excluded. The data does not provide for look-through to underlying investments.

Source: MSCI and Wellington.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Pre-contractual disclosure commitment:

The Investment Manager will seek to understand the world's social and environmental challenges and to identify and invest in companies and organizations that it believes addresses these challenges in a differentiated way through their core products and services. Through the Fund's investments, the Investment Manager seeks to improve access to, and quality of, basic life essentials, reduce inequality, and mitigate the effects of climate change.

The Investment Manager invested across all of the impact themes mentioned above during the period. All impact themes are therefore considered contributors to the sustainable objective. Allocation to individual topics within the impact themes may fluctuate throughout the year.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

While this periodic report is published after the effective date of SFDR Level II, the reference period from October 1, 2022, through December 31, 2022, falls under the scope of SFDR Level I. As such, during the reference period and pursuant to Level 1 of SFDR, a UN Global Compact (UNGC) compliance screen was implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. During the reporting period, all sustainable investments passed the UN Global Compact screen in line with the fund guidelines.

Effective January 1, 2023, Sustainable Investments were assessed against each of the mandatory corporate and/or sovereign Principal Adverse Impacts, as appropriate for the asset type, and as listed in Annex I Table I of the Level II SFDR Regulatory Technical Standards ("PAIs"). PAIs were assessed quantitatively and/or qualitatively according to third party data or by Wellington's research analysts and investment teams using company disclosures, internal research and analysis regarding issuer activities. Where PAI data was determined to be unreliable or unavailable, and as applicable to the asset type, the Investment Manager conducted further due diligence and assessed the issuer's activities, processes or policies related to climate, environmental, social and/or anti-bribery/anti-corruption matters to determine that the issuer was not doing significant harm. Instances of controversy or negative findings were evaluated against the issuer's response in alignment with the expectations set forth by the UN Guiding Principles on Business and Human Rights.

Please refer to the Fund's Pre-Contractual Disclosure, attached to the Fund's prospectus, for additional detail on this assessment.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

How were the indicators for adverse impacts on sustainability factors taken into account?

As per the above, during the reference period from October 1, 2022, through December 31, 2022, and pursuant to Level 1 of SFDR, a UN Global Compact (UNGC) compliance screen was implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Accordingly, the primary indicator for adverse impacts on sustainability factors taken into account during the reference period was ongoing compliance with the 10 principles of the United Nations Global Compact relating to human rights, labour, the environment and anti-corruption.

Effective January 1, 2023, and pursuant to Level II of SFDR, adverse impact compliance screens were implemented to assess Do No Significant Harm (DNSH) for Sustainable Investments. Where the PAIs reflect a quantitative data point and such quantitative data is available, each Sustainable Investment is compared against quantitative thresholds set by the Investment Manager as applicable to the asset type. The thresholds may be determined by setting express conditions or fixed numerical thresholds for a given PAI.

Certain PAIs are evaluated relative to industry peers and the worst companies in those industries will set the standard for determining significant harm. Where the Investment Manager has determined that industry differentiation is less meaningful, thresholds will be set in the context of all issuers. Where the Investment Manager has determined that differentiation is less meaningful or for PAIs which are more qualitative in nature (e.g., PAIs relating to the UNGC Principles and the OECD Guidelines for Multinational Enterprises) significant harm is assessed by evaluating, among others, companies' activities, management policies and practices, remediation activities or unresolved controversies using third party data.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested as part of the Investment Manager's process to identify Sustainable Investments. Assessment of management policies and practices is used to determine alignment. Misalignment with the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights may be determined where the Investment Manager identifies UN Global Compact non-compliance, inadequate policies and/or unresolved controversies.

Issuers assessed to be in breach of the OECD Guidelines for Multinational Enterprises or the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights are not eligible to be classified as Sustainable Investments. As of September 30, 2023, none of the Fund's Sustainable Investments were identified to have failed the test.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

How did this financial product consider principal adverse impacts on sustainability factors?

Pre-contractual disclosure commitment:

The Fund's Sustainable Investments are assessed against each of the mandatory corporate and/or sovereign PAIs to determine that the Sustainable Investments do not cause significant harm to any environmental or social sustainable objective. In addition, by virtue of the Fund's existing investment guidelines, the Fund takes certain, but not all, of the PAIs into consideration either directly or indirectly on all or a portion of the Fund as follows:

- 1. The Fund does not invest in companies which produce controversial weapons in accordance with the Exclusion Policy PAI: Exposure to controversial weapons.
- 2. The Fund does not invest in companies principally involved in the extraction of thermal coal, the production of thermal coal energy and the extraction of oil sands in accordance with the Exclusion Policy PAIs: Exposure to companies active in the fossil fuel sector; Share of non-renewable energy consumption and production.

While these restrictions consider certain of the PAIs, such consideration does not necessarily eliminate the Fund's exposure to such PAIs altogether. In addition, the extent to which these restrictions impact the investment process may be limited where such investments are outside of the scope of the investment objective of the Fund.

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.

| PAIs considered | September 30, 2023 |
|--|--------------------|
| 4. Exposure to companies active in the fossil fuel sector | 0.00 % |
| 5. Share of non - renewable energy consumption and production | 68.52 % |
| 14. Exposure to controversial weapons (anti - personnel mines, cluster munitions, chemical weapons and biological weapons) | 0.00 % |

Represents point-in-time data. Please note that over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data. Principal Adverse Impacts are calculated by rescaling exposures based upon available data, where appropriate. Data used to calculate Principal Adverse Impacts may not be available for derivatives and these instruments have been excluded. The figures above are provided using MSCI data only and may differ from the results of the Investment Manager's compliance screening process based on the Exclusion Policy. The data does not provide look-through for indirect investments. Source: MSCI

| Network i2i Ltd. | Communication services | 0.77% | IN |
| Banca Transilvania SA | Financials | 0.75% | RO |

The top investments table is populated based on the largest individual issuers. The weightings do not reflect exposure gained through the use of derivatives. 'Not Classified' includes governments, and government related securities (including supranationals, subsovereign and agencies), cash and cash equivalents, and other holdings for which there is insufficient data, which are not classified under the MSCI GICS sector classification hierarchy. Largest Investments as of FYE.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

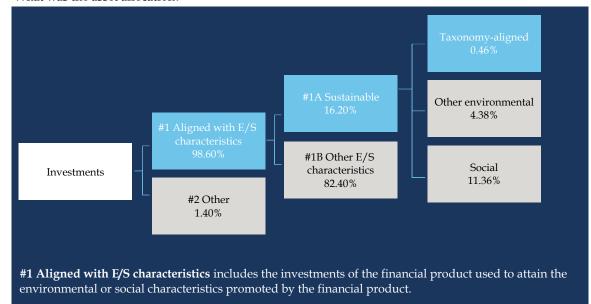

for the financial year ended September 30, 2023

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Pre-contractual disclosure commitment:

A minimum of 90% of the Fund's net assets will be aligned to the E/S characteristics of the Fund.

The Fund will also make Sustainable Investments with a minimum of 5% of the Fund's net assets, in debt issued by companies and organisations that the Investment Manager believes are addressing the world's social and environmental challenges in a differentiated way through their products, services and projects. Although the proportion of Sustainable Investments with environmental or social objectives may vary over time, the Investment Manager will maintain at least 1% in Sustainable Investments with an environmental objective and at least 1% in Sustainable Investments with a social objective.

| Asset allocation overview | % of the net assets as at September 30, 2023 |
|-------------------------------------|--|
| #1 Aligned with E/S characteristics | 98.60% |
| #2 Other | 1.40% |

Represents point-in-time data. Please note that the over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to invest in Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of EU Taxonomy-aligned investments is 0%.

However, please see below for taxonomy alignment data, which is stated as a percentage of market value as of September 30, 2023:

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹?

| | Yes | ☐ In fossil gas | ☐ In nuclear energy |
|---|-----|-----------------|---------------------|
| × | No | | - |

for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To comply with the EU Taxonomy, the criteria

Enabling activities

Wellington Responsible Values Multi-Sector Credit Fund

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

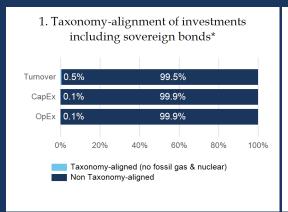

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

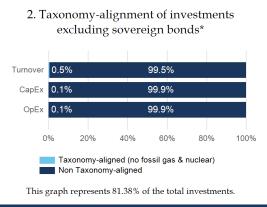

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

operational
 expenditure (OpEx)
 reflecting green
 operational activities of investee companies.

The graphs below show in light blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

 st For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Represents point-in-time data. Please note that the over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Appendix 3 – Sustainable Finance Disclosure Regulation ("SFDR") (Unaudited)

for the financial year ended September 30, 2023

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Pre-contractual disclosure commitment:

Although the Fund commits to make Sustainable Investments with an environmental objective within the meaning of the SFDR, the minimum share of such investments with an environmental objective not EU Taxonomy-aligned is 1%. These investments could be aligned with the EU Taxonomy but the Investment Manager is not currently in a position to specify the exact proportion of the Fund's underlying investments which take into account the EU criteria for environmentally sustainable economic activities. However, the position is kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

| Asset allocation overview | % of the net assets as at September 30, 2023 |

Source: Clarity AI

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

Pre-contractual disclosure commitment:

The investments under '#2 Other' may include cash and cash equivalents for liquidity purposes, derivatives for EPM, hedging and/or investment purposes or investments in securities which may create exposure to multiple underlying issuers such as collective investment schemes or index positions. It may also include any securities where data to measure the environmental and/or social characteristics is not available, is not used to meet the environmental or social characteristics, or does not meet the environmental or social characteristics promoted by the Fund. Except with regards to the Exclusions Policy, these do not have any minimum environmental or social safeguards. However, some minimum safeguards may still be considered to apply to the extent such holdings are aligned with one or more but not all of the Fund's environmental or social characteristics.

| Asset allocation overview | % of the net assets as at September 30, 2023 |
|---------------------------|--|
| #2 Other Investments | 1.40% |

Represents point-in-time data. Please note that the over the course of the reference period, data may vary depending on the overall allocation of asset types in the fund, the level of cash and cash equivalents, market movements, and the amount of holdings for which there is insufficient data.

Source: Clarity AI

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager uses internal compliance screening processes to monitor the binding environmental and social characteristics referenced above. Compliance screening is performed pre-trade, intra-day, and in an overnight post-trade process.
