

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## db x-trackers II FED FUNDS EFFECTIVE RATE TOTAL RETURN INDEX ETF Share Class: 1C (ISIN: LU0321465469), (WKN: DBX0A0), (Currency: USD)

a sub fund of db x-trackers II. The Fund is managed by DB Platinum Advisors, part of the Deutsche Bank Group.

### Objectives & Investment Policy

The aim is for your investment to reflect the performance of the FED FUNDS EFFECTIVE RATE TOTAL RETURN INDEX®.

The Index reflects the performance of a notional deposit earning the federal funds effective rate with interest being reinvested in the deposit daily. The federal funds rate is the interest rate that is charged by depository institutions, with excess reserves at a United States Federal Reserve District Bank, to lend money to other depository institutions overnight. The federal funds effective rate is the average interest rate charged in relation to such loans on a given day. The Federal Open Market Committee sets a target

rate and the federal funds effective rate tends to be within a range of that target. The Index is calculated using a specific formula and published by Deutsche Bank on a daily basis on all calendar days.

To achieve the aim, the Fund will buy tradable debt (bonds) and/or invest in cash deposits and enter into financial contract(s) (derivative(s)) with Deutsche Bank relating to the bonds/deposits and the Index, in order to obtain the return on the Index.

No dividends will be paid on your shares.

You may redeem your investment on demand on a daily basis.

### Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund's future risk profile.

The risk and reward category may shift over time and is not a target or a guarantee.

The lowest category (i.e. Category 1) does not mean a risk-free investment.

The Fund is in Category 1 because of the low range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.

Deutsche Bank and its related companies may act in several roles in relation to the Fund such as promoter, distributor and management company which may involve conflicts of interest.

The Fund will enter into a derivative with a counterparty (initially Deutsche Bank). If the counterparty fails to make payments (for example, it becomes insolvent) this may result in your investment suffering a loss.

The Fund may invest in bonds the value of which depends on the issuer being able to make its payments. There is always a risk that the issuer will fail to do so which may result in your investment suffering a loss.

The Fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up.

The fund provides a notional exposure to interest rates, which may be volatile. Interest rates react to various economic, fiscal, monetary and political factors. This may result in your investment suffering a loss, up to a total loss.

The exposure of the Fund is concentrated in the short term money market in the United States of America and may be more volatile than funds adopting a more diversified strategy.

Your investment is dependent on the performance of the Index less costs but your investment is not expected to match that performance precisely.

The Index may also be subject to disruption or adjustment events which may prevent its calculation or lead to adjustments to the rules of the index which may cause your investment to suffer losses.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

<b>One-off charges taken before or after you invest</b>		The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser or distributor.
Entry charge*	3.00%	
Exit charge*	3.00%	
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).		The ongoing charges figure is based on expenses for the year ending October 2011. It may vary from year to year. It excludes portfolio transaction costs and performance fees, if any.
<b>Charges taken from the Fund over a year</b>		
Ongoing charges	0.15%	More detailed charges information may be found in the "Fees and Expenses" section of the prospectus.
<b>Charges taken from the Fund under certain specific conditions</b>		
Performance fee	None	* or USD 10,000 whichever is the higher.

## Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2007 and the share class was launched in 2007.

Past performance has been calculated in USD.
